

University of San Francisco seeks Senior Salesforce Developers in San Francisco, California.

Be a part of the Application Services team in the implementation and adoption of Salesforce.

Collaborate with key business and technical stakeholders to design, develop and maintain Salesforce applications that support the University's business requirements.

Lead Salesforce implementations, providing both oversight and hands-on contributions to the software design, development, and integration.

Design and develop custom applications and integrations, using the configuration capabilities inherent in Salesforce and supplemented with supported technologies such as Lightning, Apex and Visual Force, as needed, to meet the desired outcome.

Implement and integrate third-party products/apps with SFDC and customize as needed, using standard configuration techniques and advanced development tools.

Develop and manage the execution of test plans to ensure a quality solution.

Thoroughly document solution and code.

Optimize application performance and scalability.

Provide technical oversight to external contractors and consultants.

Conduct code reviews for on-going projects to ensure use of quality code, adherence to security practices, and use of design patterns/best practices.

Assist and mentor other members of the Application Services team with hands-on, expert-level assistance in technical areas related to the Salesforce environment.

Requires a Bachelor's degree in Computer Science or a related field plus 4 years of related experience. Requires 2 years of experience with the following: Software development; Designing, developing, and documenting enterprise-level software using the Salesforce.com platform.
