Course: 
Energy Law

Professor: 
Frank Lindh

Course Materials: 
There is no required text book for this course. All required materials are described in the Syllabus. The course materials are either available via links provided in the syllabus, or posted on TWEN.

First Assignment: 
Our first class meets on Wednesday, January 8, at 6:30 PM. To prepare for the first class, students are expected to read the material for Class 1 in the Syllabus. As noted above, all course materials are either contained in the Syllabus, available on links provided in the Syllabus, or posted on TWEN. For Class 1, no TWEN materials will be used. For the first class, please read and familiarize yourself with the materials set forth in the Syllabus for Class 1. Below is a synopsis of the assignments for Class 1, but please note that you also are expected to read the Syllabus materials for Class 1.

Class 1 – Wednesday January 8: Industry Overview (Part 1 of 2) – Infrastructure Basics
(1) Bring to class a copy of a recent monthly bill for natural gas and electric service – either your own or someone else’s. Note the distinction between infrastructure costs and commodity costs.
(2) Please review and familiarize yourself with the various schematics of the electric and gas systems, as set forth on pages 10 and 11 of the Syllabus.(or via the links provided on those pages).
(3) Please familiarize yourself with the colored chart on page 12 of the Syllabus, showing the mix of resources used to generate electricity in the 50 states of the United States, plus the District of Columbia.
(4) Please review and familiarize yourself with the natural gas pipeline system depicted in the graphic on page 16 of the Syllabus.
(5) Please review and familiarize yourself with the Western U.S. natural gas pipeline system, depicted in the graphics on pages 17-18 of the Syllabus.
