Important Information About Wearing a Face Covering

As COVID-19 continues to spread within the United States, CDC has recommended additional measures to prevent the spread of SARS-CoV-2, the virus that causes COVID-19. In the context of community transmission, CDC recommends that you:

How to Put On and Wear Your Mask Correctly
- Wash your hands or use hand sanitizer before putting on your mask
- Put it over your face and mouth
- Be sure your mask fits snugly against the sides of your face and under your chin
- Make sure you can breathe easily

Wear a Mask to Protect Yourself and Others
- Wear a mask over your nose and mouth to help prevent getting and spreading COVID-19
- Wear a mask in public settings, if you are not fully vaccinated

How to Take Off Your Mask
- Untie the strings behind your head or stretch the ear loops
- Handle only by the ear loops or ties
- Fold outside corners together
- Wash hands immediately after removing

Other Ways to Protect Yourself
- Avoid crowds and places with poor ventilation
- Wash your hands often
- Get a vaccine when it is offered

For more information, go to:

Important Information About Wearing a Face Covering

As COVID-19 continues to spread within the United States, CDC has recommended additional measures to prevent the spread of SARS-CoV-2, the virus that causes COVID-19. In the context of community transmission, CDC recommends that you:

**DO choose masks that:**

- Have two or more layers of washable, breathable fabric
- Completely cover your nose and mouth
- Fit snugly against the sides of your face and don’t have gaps
- Have a nose wire to prevent air from leaking out of the top of the mask
- Wash your cloth face mask after use.

If you need a mask, disposable masks are available at Gleeson Library.

Keeping Dons Safe

Cover your cough or sneeze with a tissue, then throw the tissue in the trash and wash your hands.

It’s important to still wear a mask to keep our community safe.

Do not touch your eyes, nose, and/or mouth.

If you are not feeling well, stay home or in your resident hall and seek medical care if needed.

Wash your hands often with soap and water for at least 20 seconds.

Reasons to DON a Mask

• It takes time for the vaccine to kick in.
• The vaccines do not provide 100% protection.
• Those who have been vaccinated might be asymptomatic spreaders.
  • We still need to protect those with compromised immune systems and those who can’t be vaccinated.
• Use masks to slow the spread of COVID-19
