BULK REFILL EVENT

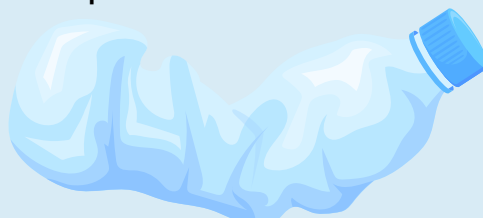

WHY IS THIS IMPORTANT?

Each year, Americans throw away more than 1 billion plastic jugs, and only 30% of those get recycled. The rest of the jugs end up in landfill, where they continue leaching

With plastic pollution being an environmental issue, the event also aims to teach students the actual harm caused by this form of pollution, as well as reminding students that reusable containers will always be an option.

WHAT PRODUCT ARE WE GIVING OUT?

Our laundry detergent and dish soap come from a brand known as Rustic Strength, a company that prioritizes making hypoallergenic cleaning products. This company specializes in using clean chemicals for its products, as they had a history with hurtful reactions from other hypoallergenic products.

Their products are all phthalate-free, paraben-free, phosphate-free, SLS-free, SLES-free, and as they say: "simply worry free"

Adding in laundry detergent!

HOW MUCH LAUNDRY DETERGENT SHOULD YOU USE?

✗ Using an excessive amount

If there is too much laundry detergent, both the clothes and the machine can get damaged!

✓ Using the right amount

Your average load of laundry requires very little laundry detergent as even 12 pounds of laundry only really needs 2 tablespoons of detergent, or 1 ounce.

STEP-BY-STEP TUTORIAL

Step 1: Place your container on a scale.

Step 2: Fill your container with the product

Step 3: Add essential oils and Mix

WHY DO WE HOLD THIS EVENT?

As the Sustainability Representative, it is my responsibility to reduce waste on campus and actively promote any activities with sustainability in mind, which is where we came up with the Bulk Refill Event, an event to help students build the habit of reusing containers. On top of this, the aim of the event is to provide students with clean, healthy cleaning products for further health support.
