

CALIFORNIA  
ACADEMY OF  
SCIENCES

Golden Gate Park  
San Francisco

Home to an aquarium, planetarium,  
natural history museum, four-story  
rainforest and research & education  
programs all under a living roof!

Step inside a realm known as the twilight zone—a narrow, dimly lit band of the world's oceans more mysterious to scientists than the surface of the Moon. Discover the beauty and importance of the little-known reefs that exist between 200 and 500 feet below the ocean's surface, located within the California Academy of Sciences' newly updated Coral Reefs of the World gallery.

Asteroids and comets have collided with our planet throughout its history, changing the course of life on Earth and shaping the world we know today. *Incoming!*, the latest original planetarium show from the California Academy of Sciences, explores the past, present, and future of our Solar System and the landmark discoveries scientists have made sending spacecraft to visit tiny worlds. Narrated by George Takei.
