

Inflation Report

March 2025

The Consumer Price Index for all urban consumers (CPI-U) "is a statistical measure of change over time of the prices of goods and services in major expenditure groups--such as food, housing, apparel, transportation and medical care--typically purchased by urban consumers," according to the Bureau of Labor Statistics. The Core CPI-U is another measure of inflation that excludes certain items including food and energy. CPI-SF&EBay covers all urban consumers in San Francisco, Oakland and Hayward.

The CPI-U increase for the calendar year 2024 was 3.0% and Core CPI-U increase was 3.7% according to the Bureau of Labor Statistics on March 24th, 2025. For the calendar year 2025, Wells Fargo estimates inflation rates to be 2.8% for the CPI-U and 3.1% for Core CPI-U. For calendar year 2026, Wells Fargo estimates inflation rates to be 2.6% for the CPI-U and 2.8% for Core CPI-U.

Another measure of inflation within the higher education industry is the Higher Education Price Index. By academic fiscal year, "The Higher Education Price Index (HEPI) measures the average relative level in the prices of a fixed market basket of goods and services purchased by colleges and universities through current fund educational and general expenditures excluding expenditures for research," according to Commonfund Institute.

IMPORTANT NOTE: In 2015, the American Association of University Professors (AAUP) began using a new methodology to calculate salary and total compensation that was not directly comparable with the past. Further adjustments were made to the data for FY2022 and data for fiscal years 2015 through 2022 have now been restated to account for the change and to make the data compatible with past reporting. As of FY2023 and moving forward, HEPI incorporates an amended materials category due to expiration of collection for one of its many components, with no material change on the category outcomes when mapped to prior years.
