

INFLATION REPORT

Summer 2022

The Consumer Price Index for all urban consumers (CPI-U) "is a statistical measure of change over time of the prices of goods and services in major expenditure groups--such as food, housing, apparel, transportation and medical care--typically purchased by urban consumers," according to the Bureau of Labor Statistics. The Core CPI-U is another measure of inflation that excludes certain items including food and energy. CPI-SF&EBay covers all urban consumers in San Francisco, Oakland and Hayward.

The CPI-U increase for the calendar year 2021 was 4.7% and Core CPI-U increase was 3.6% according to the Bureau of Labor Statistics on August 3rd, 2022. For the calendar year 2022, Wells Fargo estimates inflation rates to be 8.3% for the CPI-U and 6.3% for Core CPI-U. For calendar year 2023, Wells Fargo estimates inflation rates to be 3.2% for the CPI-U and 4.0% for Core CPI-U.

Another measure of inflation within the higher education industry is the Higher Education Price Index. "The Higher Education Price Index (HEPI) measures the average relative level in the prices of a fixed market basket of goods and services purchased by colleges and universities through current fund educational and general expenditures excluding expenditures for research," according to Commonfund Institute.
