*Quote from EDA literature: "In E.D.A., recovery means living life without obsessing on food, weight or body image. Suggestions that help us build recovery include: Eat when hungry, stop when moderately full. Consistent nutrition is essential for recovery. Recovery is about feelings, not food, but we can’t reason or build trust when binging, purging or starving. EDA endorses sound nutrition and discourages any form of rigidity around food. Balance – not abstinence – is our goal."
