Executive Summary

BACKGROUND

USF contracted with Rankin & Associates Consulting (R&A) to conduct a campus-wide study entitled, “University of San Francisco Assessment of Climate for Learning, Living, and Working.” The purpose of the study was to develop a better understanding of the learning, living, and working environment on campus. In the Fall of 2017, data was gathered from reviews of relevant USF literature, campus focus groups, and a campus-wide survey addressing the experiences and perceptions of various constituent groups. The results were then summarized and presented via a final report, as well as at community forums during the Spring of 2018.

PURPOSE OF REPORT

The Office of Institutional Research and Analytics, within the Center for Institutional Planning and Effectiveness, was tasked with taking a deeper dive into the data, at a department level. This report summarizes the results of the raw data given to us by R&A, specific to the School of Nursing and Health Professions (SoNHP).

METHODOLOGY

R&A provided us with an Excel spreadsheet of the raw data, along with the data dictionary. That data was then brought into Tableau, analyzed, and used to create the charts and visualizations of the basic descriptive statistics in this report. Because of the small population sizes, the potential lack of significant meaning, and the input from the lead R&A analyst, it was decided that more extensive analysis of the individual departments/colleges would not be done at this time. Throughout the report, the data is shown by the School of Nursing and Health Professions respondent population versus the rest of the USF respondent population. Data was masked as well as possible for privacy purposes. Decisions were made on a table-by-table basis as to how the data would be displayed, but any total that was less than five, was changed to “<5” to mask the actual number. Due to privacy concerns, the demographics section of the report was treated the most sensitively. However, the remainder of the report left room for more transparency, and therefore totals and percentages were included more frequently. All of the School of Nursing and Health Professions qualitative comments were also pulled from the raw data, separated out by position, and analyzed. Themes within the qualitative comments emerged very clearly, and were grouped together and presented in a summarized form at the end of this report. Please be aware that all totals and data in this report are as of Fall 2017.

SAMPLE SIZE

In total, 690 members of the School of Nursing and Health Professions completed the survey. 316 (46%) were undergraduate students, 257 (37%) were graduate students, 29 (4%) were tenured or tenure-track faculty, 26 (4%) were term faculty, 39 (6%) were adjunct faculty, and 23 (3%) were staff.

	Sample Total	Population Total	Response Rate
<i>Undergraduate Students</i>	316	848	37%
<i>Graduate Students</i>	257	870	30%
<i>Tenured/Tenure-Track Faculty</i>	29	32	91%
<i>Term Faculty</i>	26	30	87%
<i>Adjunct Faculty</i>	39	136	29%
<i>Staff</i>	23	35	66%
Total	690	1951	35%

*Population totals were the totals at the time the survey was administered (Fall 2017).

HIGHLIGHTS

Demographics:

- 83% of respondents were students
- 81% of respondents were women
- 83% of respondents were heterosexual
- 77% of respondents were U.S. citizens
- 87% of respondents had no disability
- 53% of respondents had a Christian affiliation

Employees Only:

- 74% of respondents had worked at USF for five years or less
- 72% of Faculty respondents had a Doctoral degree
- 79% of Staff respondents had a Master's degree or higher

Students Only:

- 60% of Student respondents reported working on or off campus
- 59% of Student respondents experienced financial hardship while attending USF
- 80% of Students reported living in non-campus housing
- 30% of Undergraduates and 55% of Graduates did not participate in any clubs or organizations at USF

USF Climate Comfort: 77% of School of Nursing and Health Professions respondents communicated that they were “comfortable” or “very comfortable” with the climate at USF.

School of Nursing and Health Professions Workplace Climate Comfort: Only 53% of School of Nursing and Health Professions Employee respondents communicated that they were “comfortable” or “very comfortable” with the workplace climate.

School of Nursing and Health Professions Classroom Climate Comfort: 81% of Student and Faculty respondents communicated that they were “comfortable” or “very comfortable” with the classroom climate within the School of Nursing and Health Professions.

Experienced Exclusionary, Intimidating, Offensive, and/or Hostile Conduct: 19% of School of Nursing and Health Professions respondents stated that they personally experienced exclusionary, intimidating, offensive, and/or hostile conduct while at USF within the last year.

Reporting of Experienced Conduct: 81% of the School of Nursing and Health Professions respondents that stated that they personally experienced exclusionary, intimidating, offensive, and/or hostile conduct while at USF within the last year, did not report the conduct.

Observed Exclusionary, Intimidating, Offensive, and/or Hostile Conduct: 23% of School of Nursing and Health Professions respondents observed conduct directed toward a person or group of people on campus that they believed created an exclusionary (e.g., shunned, ignored), intimidating, offensive, and/or hostile (bullying, harassing) working or learning environment at USF within the past year.

Reporting of Observed Conduct: 90% of the School of Nursing and Health Professions respondents that observed conduct directed toward a person or group of people on campus that they believed created an exclusionary, intimidating, offensive, and/or hostile working or learning environment at USF within the past year, did not report the conduct.

Experienced Unwanted Sexual Contact/Conduct: Within the School of Nursing and Health Professions overall population, 5% of respondents experienced unwanted sexual contact/conduct. Of those 5% of School of Nursing and Health Professions respondents that experienced unwanted sexual contact/conduct, 84% experienced Unwanted Sexual Interaction.

Reporting of Unwanted Sexual Interaction: 81% of the School of Nursing and Health Professions respondents that experienced unwanted sexual interaction, did not report the conduct.

Students Only

Student Perception of Classroom Experience:

Strength: 79% of Undergraduate and Graduate School of Nursing and Health Professions student respondents “agreed” or “strongly agreed” with the statement “I have faculty whom I perceive as role models.”

Weakness: 39% of Undergraduate and Graduate School of Nursing and Health student respondents “agreed” or “strongly agreed” with the statement “I think that faculty prejudice my ability based on their perception of my identity/background.”

Student Feeling of Value:

Strength: 79% of Undergraduate and Graduate School of Nursing and Health Professions student respondents “agreed” or “strongly agreed” with the statement “I feel valued by other students in the classroom.”

Student Academic Experience:

Strength: 96% of Undergraduate and Graduate School of Nursing and Health Professions student respondents “agreed” or “strongly agreed” with the statement, “I intend to graduate from USF.”

Weakness: 52% of Undergraduate and Graduate School of Nursing and Health Professions student respondents “agreed” or “strongly agreed” with the statement, “Few of my courses this year have been intellectually stimulating.”

Graduate Student Perception of Advising:

Strength: 67% of Graduate School of Nursing and Health Professions student respondents “agreed” or “strongly agreed” with the statement “My advisor/chair responds to my emails, calls, or voicemails in a prompt manner.”

Weakness: 27% of Graduate School of Nursing and Health Professions student respondents “disagreed” or “strongly disagreed” with the statement, “I am satisfied with the quality of advising I have received from my department/program.”

Graduate Student Perception of Department/Program:

Strength: 78% of Graduate School of Nursing and Health Professions student respondents “agreed” or “strongly agreed” with the statement, “Department/program faculty members (other than my advisor) respond to my emails, calls, or voicemails in a prompt manner.”

Weakness: 36% of Graduate School of Nursing and Health Professions student respondents “disagreed” or “strongly disagreed” with the statement, “There are adequate opportunities for me to interact with other university faculty outside of my department.”

Considered Leaving USF:

- 24% of Undergraduate School of Nursing and Health Professions student respondents indicated that they had seriously considered leaving in the last year.
- 21% of Graduate School of Nursing and Health Professions student respondents indicated that they had seriously considered leaving in the last year.

Faculty & Staff Only**Faculty Perception of the Workplace:**

Strength: 59% of School of Nursing and Health Professions Faculty respondents “disagreed” or “strongly disagreed” with the statement, “I think that my department chair/program director prejudices my abilities based on their perception of my identity/background.”

Weakness: 26% of School of Nursing and Health Professions Faculty respondents “agreed” or “strongly agreed” with the statement, “I think that faculty in my department/program prejudice my abilities based on their perception of my identity/background.”

Staff Perception of the Workplace:

Strength: 74% of School of Nursing and Health Professions Staff respondents “agreed” or “strongly agreed” with the statement, “I have colleagues/coworkers who give me job/career advice or guidance when I need it.”

Weaknesses:

- 48% of School of Nursing and Health Professions Staff respondents “disagreed” or “strongly disagreed” with the statement, “The performance appraisal process is productive.”
- 48% of School of Nursing and Health Professions Staff respondents “disagreed” or “strongly disagreed” with the statement, “There are clear procedures on how I can advance at USF.”
- 48% of School of Nursing and Health Professions Staff respondents “disagreed” or “strongly disagreed” with the statement, “I believe that my department encourages free and open discussion of difficult topics.”

Faculty Feeling of Value:

Strength: 83% of School of Nursing and Health Professions Faculty respondents “agreed” or “strongly agreed” with the statement, “I feel valued by students in the classroom.”

Weakness: 27% of School of Nursing and Health Professions Faculty respondents “disagreed” or “strongly disagreed” with the statement, “I feel valued by USF senior administrators.”

Staff Feeling of Value:

Strength: 87% of School of Nursing and Health Professions Staff respondents “agreed” or “strongly agreed” with the statement, “I feel valued by coworkers in my department.”

Weakness: 52% of School of Nursing and Health Professions Staff respondents “disagreed” or “strongly disagreed” with the statement, “Staff opinions are valued by USF faculty.”

Faculty Perception of the Performance Evaluation Process: 33% of School of Nursing and Health Professions Faculty respondents “disagreed” or “strongly disagreed” with the statement, “The performance evaluation process is clear.”

Staff Perception of the Performance Evaluation Process: 48% of School of Nursing and Health Professions Staff respondents “disagreed” or “strongly disagreed” with the statement, “The performance evaluation process is productive.”

Faculty Perception of Work-Life Balance: 29% of School of Nursing and Health Professions Faculty respondents “disagreed” or “strongly disagreed” with the statement “USF provides adequate resources to help me manage work-life balance (e.g., child care, wellness services, elder care, housing location assistance, transportation).”

Staff Perception of Work-Life Balance:

Strength: 48% of School of Nursing and Health Professions Staff respondents “agreed” or “strongly agreed” with the statement “My direct supervisor provides adequate support for me to manage work-life balance.”

Weakness: 52% of School of Nursing and Health Professions Staff respondents “agreed” or “strongly agreed” with the statement “I perform more work than colleagues with similar performance expectations.”

Staff Perception of Workload and Support:

Strength: 65% of School of Nursing and Health Professions Staff respondents “agreed” or “strongly agreed” with the statement “USF provides me with resources to pursue training/professional development opportunities.”

Weakness: 61% of School of Nursing and Health Professions Staff respondents “agreed” or “strongly agreed” with the statement “There is a hierarchy within staff positions that allows some voices to be valued more than others.”

Faculty Perception of Salary and Benefits:

Strength: 50% of School of Nursing and Health Professions Faculty respondents “agreed” or “strongly agreed” with the statement “Health insurance benefits are competitive.”

Weakness: 33% of School of Nursing and Health Professions Faculty respondents “disagreed” or “strongly disagreed” with the statement “Salaries for adjunct professors are competitive.”

Staff Perception of Salary and Benefits:

Strength: 70% of School of Nursing and Health Professions Staff respondents “agreed” or “strongly agreed” with the statement, “Health insurance benefits are competitive.”

Weakness: 39% of School of Nursing and Health Professions Staff respondents “disagreed” or “strongly disagreed” with the statement, “Staff salaries are competitive.”

Considered Leaving USF:

- 50% of School of Nursing and Health Professions Faculty respondents stated that they had seriously considered leaving USF in the past year.
- 74% of School of Nursing and Health Professions Staff respondents stated that they had seriously considered leaving USF in the past year.

Results

Demographics

The demographic variables explored in the Campus Climate Survey were: position status, gender identity, racial identity, sexual identity, citizenship status, disability identity, religious affiliation, age range, caregiving responsibility, military service, length of employment (employees only), level of education (employees only), parents’ education level (students only), undergraduates’ year in college (students only), student employment (students only), financial hardship (students only), tuition payment type (students only), income dependency status (students only), student residency location (students only), student club participation (students only), and grade point average (students only).

Position Status Comparison:

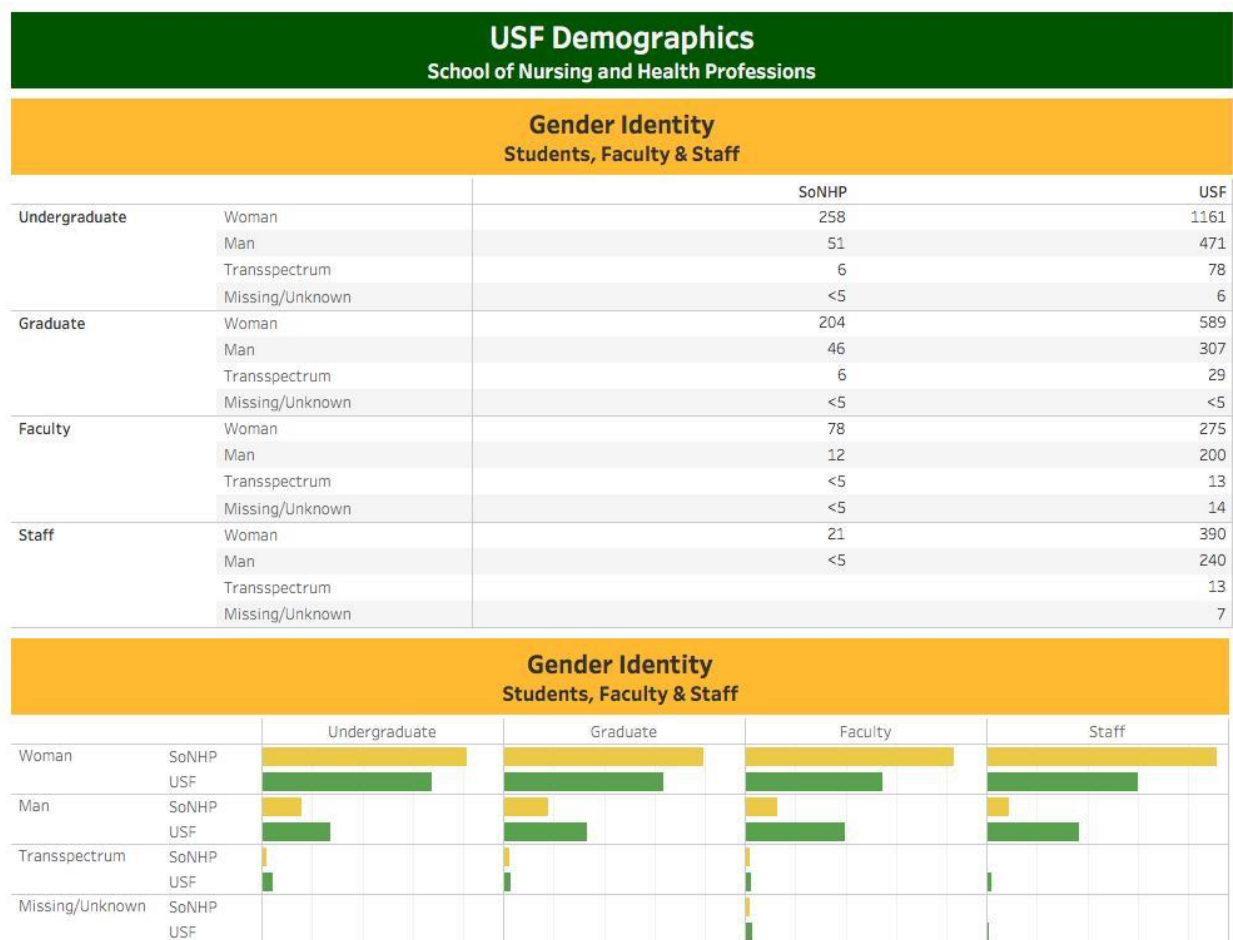

The School of Nursing and Health Professions had a higher percentage of Graduate student respondents, compared to the USF Graduate respondent population. They also had a much lower percentage of Staff respondents compared to the USF Staff respondent population.

The above visual shows the SoNHP vs USF percentage totals by Student vs Employee Status, separated out by specific position. The bar lengths illustrate the percentage differences.

Gender Identity Comparison:

The School of Nursing and Health Professions had a higher percentage of women respondents in all population categories (Overall, Students, Faculty & Staff), relative to the corresponding USF respondent populations.

The above visual shows the SoNHP vs USF percentage totals by Gender Identity, separated out by position. The bar lengths illustrate the percentage differences.

Racial Identity Comparison:

The School of Nursing and Health Professions Undergraduate student respondent population had a higher percentage of Asian/Asian American/South Asian respondents compared to the USF Undergraduate student respondent populations. The School of Nursing and Health Professions Graduate student respondent population had a slightly lower percentage of Latin@/Chican@/Hispanic respondents when compared to the USF Graduate student respondent populations, but fell very much in line with the rest of the USF Graduate student respondent racial identity groups. The School of Nursing and Health Professions Faculty had lower percentages of Latin@/Chican@/Hispanic and Multiracial respondents, and a higher percentage of Other People of Color respondents, compared to the USF Faculty respondent populations. The School of Nursing and Health Professions had a lower percentage of White Staff respondents, a higher percentage of Black/African American respondents, a lower percentage of Multiracial respondents, and a higher percentage of Other People of Color respondents compared to the USF Staff respondent populations.

USF Demographics School of Nursing and Health Professions

Racial Identity Students, Faculty & Staff

		SoNHP	USF
Undergraduate	White	67	480
	Asian/Asian American/South Asian	141	446
	Latin@/Chican@/Hispanic	42	282
	Black/African American	11	76
	Multiracial	46	339
	Other Person of Color	9	74
	Missing/Unknown		19
Graduate	White	92	336
	Asian/Asian American/South Asian	59	195
	Latin@/Chican@/Hispanic	33	153
	Black/African American	23	74

USF Demographics School of Nursing and Health Professions

Racial Identity Students, Faculty & Staff

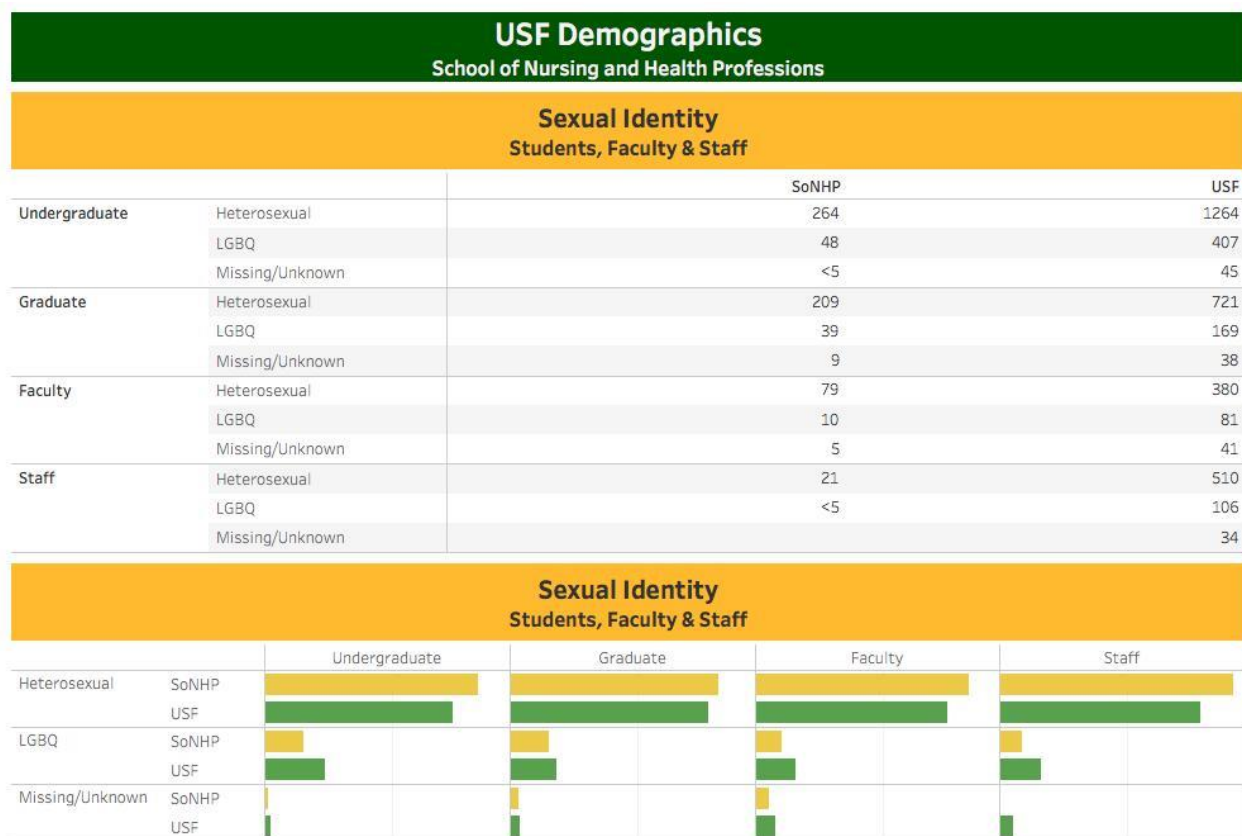

The above visual shows the SoNHP vs USF percentage totals by Racial Identity, separated out by position. The bar lengths illustrate the percentage differences.

Sexual Identity Comparison:

Sexual identity was broken into two major categories. Those who are heterosexual and those who are LGBQ (Lesbian, Gay, Bisexual, and Queer).

The School of Nursing and Health Professions had a slightly increased percentage of heterosexual respondents and decreased number of LGBQ respondents in all position categories, when compared to their corresponding USF Overall respondent populations.

Citizenship Status Comparison:

The School of Nursing and Health Professions had a lower percentage of Not U.S. Citizen/Multiple Citizenships Undergraduate student, Graduate student and Faculty respondents, as well as a higher percentage of Not U.S. Citizen/Multiple Citizenships Staff respondents, compared to the corresponding USF respondent populations.

USF Demographics School of Nursing and Health Professions

Citizenship Status Students, Faculty & Staff

		SoNHP	USF
Undergraduate	U.S. Citizen-Birth	244	1360

	Multiple Disability	<5	16
	Missing/Unknown	<5	8

Disability Status Students, Faculty & Staff

The above visual shows the SoNHP vs USF percentage totals by Disability Status, separated out by position. The bar lengths illustrate the percentage differences.

Of the 11.7% of School of Nursing and Health Professions respondents who reported having a disability, the most common were mental health/psychological condition (42%), learning difference/disability (28%), and chronic diagnosis or medical condition (21%). These were also the top three disabilities reported for the USF Overall respondent population.

Respondents' Conditions that Affect Learning, Working, Living Activities

School of Nursing and Health Professions

Disability Status Students, Faculty & Staff

	SoNHP		USF	
	n	%	n	%
No Disability	599	86.8%	3244	85.5%
Single Disability	56	8.1%	356	9.4%
Multiple Disability	25	3.6%	150	4.0%
Missing/Unknown	10	1.4%	46	1.2%
Grand Total	690	100.0%	3796	100.0%

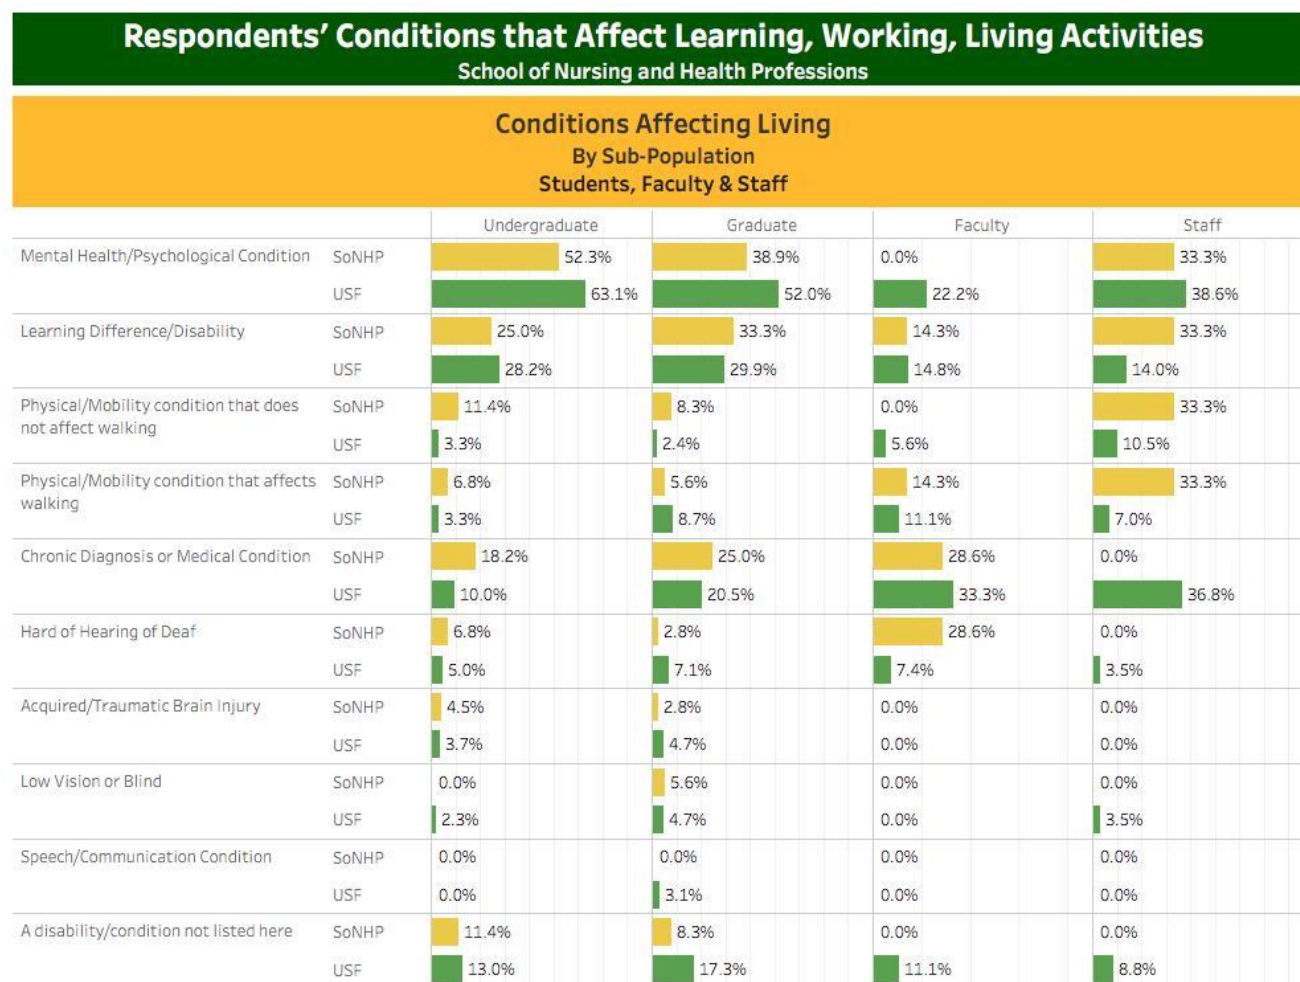

Conditions Affecting Living Students, Faculty & Staff

Condition	SoNHP	USF
Mental Health/Psychological Condition	42.2%	53.8%
Learning Difference/Disability	27.8%	25.8%
Chronic Diagnosis or Medical Condition	21.1%	17.6%
Physical/Mobility condition that does not affect walking	10.0%	4.1%
Physical/Mobility condition that affects walking	7.8%	5.8%
Hard of Hearing or Deaf	6.7%	5.6%
Acquired/Traumatic Brain Injury	3.3%	3.2%
Low Vision or Blind	2.2%	2.8%
Speech/Communication Condition	0.0%	0.7%
A disability/condition not listed here	8.9%	13.4%

Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

These top three conditions affecting living remained true for both Undergraduate and Graduate student respondents in the School of Nursing and Health Professions. The only difference when compared to the USF Student respondent population was that USF Undergraduate student respondents reported having a higher percentage of students with a disability/condition not listed here (13%), as opposed to chronic diagnosis or medical condition (10%). The results varied from the overall top conditions for both the Staff and Faculty respondent populations as well. For School of Nursing and Health Professions Faculty respondents, the top conditions affecting living were chronic diagnosis or medical condition (28.6%) and hard of hearing or deaf (28.6%). The top conditions within the USF Faculty respondent population were chronic diagnosis or medical condition (33.3%), and mental health/psychological condition (22.2%). For School of Nursing and Health Professions Staff respondents, the conditions affecting living were physical/mobility condition that does not affect walking (33.3%), physical/mobility condition that affects walking (33.3%), mental health/psychological condition (33.3%) and learning

difference/disability (33.3%). The top conditions within the USF Staff respondent population were mental health/psychological condition (38.6%), and chronic diagnosis or medical condition (36.8%)

The above visual shows the SoNHP vs USF percentage totals by Conditions Affecting Living, separated out by position. The bar lengths illustrate the percentage differences. Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

Disabled respondents were asked to identify any general barriers they encountered at USF. In the School of Nursing and Health Professions, office furniture (24%), campus transportation/parking (20%), and classroom/labs (17%) were the key barriers identified by respondents. The top general barrier faced by disabled USF Overall respondents was campus transportation/parking (14%).

Religious Affiliation Comparison:

The School of Nursing and Health Professions respondent population had a higher percentage of individuals with a Christian affiliation than the USF Overall respondent population. This remained consistent through all of the sub-populations (Students, Faculty & Staff).

The above visual shows the SoNHP vs USF percentage totals by Religious Affiliation, separated out by position. The bar lengths illustrate the percentage differences.

Age Range Comparison:

The School of Nursing and Health Professions Undergraduate student respondent population had lower percentages of respondents in age categories 18-21, and higher percentages of respondents in age categories 22-44, compared to the USF Undergraduate student respondent population. The School of Nursing and Health Professions Graduate student respondent population had lower

percentages of respondents in age categories 22-24, and higher percentages of respondents in age categories 25-64, compared to the USF Graduate student respondent population. The School of Nursing and Health Professions Faculty respondents had lower percentages of respondents in age categories 25-54, and higher percentages of respondents in age categories 55-74, compared to the USF Faculty respondent population. The School of Nursing and Health Professions Staff respondents had lower percentages of respondents in age categories 35-54, and higher percentages of respondents in age categories 25-34 and 55-64, compared to the USF Staff respondent population.

Age Range Students, Faculty & Staff

The above visual shows the SoNHP vs USF percentage totals by Age Range, separated out by position. The bar lengths illustrate the percentage differences.

Caregiving Responsibilities Comparison:

Students, Faculty and Staff were asked whether or not they had caregiving responsibilities, and then were asked to indicate what the responsibility was. A higher percentage of the School of Nursing and Health Professions Undergraduate and Graduate student respondents indicated having substantial caregiving responsibilities, compared to the USF Undergraduate and Graduate student respondent populations. A lower percentage of the School of Nursing and Health Professions Faculty and Staff respondents indicated having substantial caregiving responsibilities, compared to the USF Faculty and Staff respondent populations. Of the 20% of the School of Nursing and Health Professions respondents that indicated having substantial caregiving responsibilities, the top responsibilities were for children 6-18 years (49%), children 5 years or under (34%), and senior or other family member (31%). This was in line with that of the USF Overall respondent population, in which the top responsibilities reported were for children 6-18 years (54%), children 5 years or under (35%), and senior or other family member (23%).

The School of Nursing and Health Professions Undergraduate student respondent population had a much higher percentage that reported having caregiving responsibilities for senior or other family member, compared to the USF Undergraduate student respondent population. The School of Nursing and Health Professions Graduate student respondent population had a higher percentage of respondents responsible for children 6-18 years, and senior or other family member, compared to the USF Graduate student respondent population. The School of Nursing and Health Professions Faculty respondents had a much lower percentage of respondents responsible for children 6-18 years, and a much higher percentage of respondents responsible for children over 18 years of age (but still legally dependent), compared to the USF Faculty respondent population. The School of Nursing and Health Professions Staff respondents had a lower percentage of respondents responsible for children under 18 years, and higher percentages of respondents responsible for children over 18 years of age (but still legally dependent), and senior or other family member, when compared to the USF Staff respondent population.

Respondents' Caregiving Responsibilities

Student Population Only

Students were asked to indicate the highest level of education achieved by their parent(s)/guardian(s).

Parent/Guardian #1 Education Level Comparison:

The School of Nursing and Health Professions Undergraduate student respondents had a higher percentage that reported having a parent/guardian #1 with a Bachelor's degree, compared to the USF Undergraduate student respondents. The School of Nursing and Health Professions Graduate student respondents had a lower percentage of respondents that had a parent/guardian #1 with a Bachelor's degree, and a higher percentage with no high school, compared to the USF Graduate student respondents.

Second Parent's/Guardian's Highest Level of Education Undergraduate & Graduate Students

The above visual shows the SoNHP vs USF percentage totals by Second Parent's/Guardian's Highest Level of Education, separated out by position. The bar lengths illustrate the percentage differences.

Undergraduate Students were asked what year in college they were at the time the survey was administered.

Undergraduate Student Year in College Comparison:

The School of Nursing and Health Professions had a lower percentage of Undergraduate student respondents in their first and fourth year, and a higher percentage of respondents in their second and third year, compared to USF Undergraduate student respondent population.

Students were asked whether they were employed either on campus or off campus during the academic year.

Student Employment Comparison:

Within the School of Nursing and Health Professions Undergraduate student respondent population, 58% indicated that they worked. Similarly, 58% of the USF Undergraduate student respondents indicated that they worked. Within the School of Nursing and Health Professions

Graduate student respondent population, 63% indicated that they worked, compared to 59% of the USF Graduate student respondent population.

The above visual shows the SoNHP vs USF percentage totals by Employment Status, separated out by position. The bar lengths illustrate the percentage differences.

Students were then asked to indicate the total number of hours they work per week on campus and off campus.

The School of Nursing and Health Professions Undergraduate student respondents had a higher percentage of respondents that worked on campus for 1-10 hours/week, and a lower percentage that worked 21-30 hours/week, compared to the USF Undergraduate student respondent population. The School of Nursing and Health Professions Graduate student respondents had a much higher percentage of respondents that worked on campus for 1-10 hours/week, and a much lower percentage that worked 21-30 hours/week, compared to the USF Graduate student respondent population. The School of Nursing and Health Professions Undergraduate student respondents had a much higher percentage that worked off campus for 1-10 hours/week, compared to the USF Undergraduate student respondent population. The School of Nursing and Health Professions Graduate student respondents had a higher percentage of students that worked

off campus for all categories under 40 hours/week, compared to the USF Graduate student respondent population.

USF Demographics

School of Nursing and Health Professions

Of the students who were employed, the following indicates the amount of hours worked in a week.

On Campus Employment Hours Undergraduate & Graduate Students

		SoNHP	USF
Undergraduate	1-10 hours/week	37	221
	11-20 hours/week	35	242
	21-30 hours/week	6	65
	31-40 hours/week	<5	8
	More than 40 hours/week		<5
Graduate	1-10 hours/week	10	49
	11-20 hours/week	6	41
	21-30 hours/week	<5	17
	31-40 hours/week		<5
	More than 40 hours/week		5

The above visual shows the SoNHP vs USF percentage totals by On Campus Employment Hours, separated out by position. The bar lengths illustrate the percentage differences.

Off Campus Employment Hours Undergraduate & Graduate Students

		SoNHP	USF
Undergraduate	1-10 hours/week	48	136
	11-20 hours/week	45	209
	21-30 hours/week	15	95
	31-40 hours/week	7	40
	More than 40 hours/week	<5	23
Graduate	1-10 hours/week	26	36
	11-20 hours/week	31	80
	21-30 hours/week	22	61
	31-40 hours/week	40	120
	More than 40 hours/week	22	142

The above visual shows the SoNHP vs USF percentage totals by Off Campus Employment Hours, separated out by position. The bar lengths illustrate the percentage differences.

Students were asked whether they experienced financial hardship while attending USF.

Student Financial Hardship Comparison:

Sixty percent of the School of Nursing and Health Professions Undergraduate student respondents indicated that they experienced financial hardship, compared to the fifty-five percent of USF Undergraduate student respondents that experienced financial hardship. Fifty-eight percent of the School of Nursing and Health Professions Graduate student respondents indicated that they experienced financial hardship, compared to the fifty-two percent of USF Undergraduate student respondents that experienced financial hardship.

Students were then asked how they experienced financial hardship. Of the 60% of the School of Nursing and Health Professions Undergraduate student respondents that indicated they experienced financial hardship, the top types of hardship were difficulty affording tuition (86%), difficulty purchasing books/course materials (72%) and difficulty in affording housing (48%). These were also the top three experienced financial hardships for the USF Undergraduate student respondent population. Of the 58% of the School of Nursing and Health Professions Graduate student respondents that indicated they experienced financial hardship, the top types of hardship were difficulty affording tuition (74%), difficulty purchasing books/course materials (57%) and difficulty in affording housing (51%). Again, these were also the top three experienced financial hardships for the USF Graduate student respondent population.

Missing/Unknown	6.8%	4.6%

The above visual shows the SoNHP vs USF percentage totals by Type of Financial Hardship, for Graduate Students only. The bar lengths illustrate the percentage differences.

Students were asked how they were paying for their tuition at USF. Students could select multiple payment types. In the School of Nursing and Health Professions, the top payment type for Undergraduate student respondents was loans (66%). The top payment type for USF Undergraduate student respondents was family contribution (64%). The top tuition payment type for the School of Nursing and Health Professions Graduate student respondents was loans (69%). The top tuition payment type for the USF Graduate student respondent population was also loans (58%).

The above visual shows the SoNHP vs USF percentage totals by Tuition Payment Types, separated out by position. The bar lengths illustrate the percentage differences.

Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

Students were asked whether they received financial support from a family member or guardian to assist them with living/educational expenses.

Student Financial Support Comparison:

The School of Nursing and Health Professions Undergraduate student respondents had a slightly lower percentage indicate that they received support for living/educational expenses from family/guardian (78%), compared to the USF Undergraduate student respondent population (83%). The School of Nursing and Health Professions Graduate student respondents had a

slightly lower percentage indicate that they received support for living/educational expenses from family/guardian (41%), compared to the USF Graduate student respondent population (43%).

Within the School of Nursing and Health Professions Undergraduate student respondent population that indicated receiving financial support from their family/guardian, 71% had annual incomes greater than or equal to \$70,000. In contrast, within the School of Nursing and Health Professions Undergraduate student respondent population that indicated receiving No financial support from their family/guardian, 21% had annual incomes greater than or equal to \$70,000. Within the USF Undergraduate student respondent population that indicated receiving financial support from their family/guardian, 63% had annual incomes greater than or equal to \$70,000. Of the USF Undergraduate student respondents that indicated receiving No financial support from their family/guardian, 29% had annual incomes greater than or equal to \$70,000.

Within the School of Nursing and Health Professions Graduate student respondent population that indicated receiving financial support from their family/guardian, 53% had annual incomes greater than or equal to \$70,000. Within the School of Nursing and Health Professions Graduate student respondent population that indicated receiving No financial support from their family/guardian, 40% had annual incomes greater than or equal to \$70,000. Within the USF Graduate student respondent population that indicated receiving financial support from their family/guardian, 49% had annual incomes greater than or equal to \$70,000. Of the USF Graduate student respondents that indicated receiving No financial support from their family/guardian, 37% had annual incomes greater than or equal to \$70,000.

Student Club Experience:

Students were asked if they were a member of, or have participated in, any of the following clubs/organizations since having been at USF. Thirty percent of the School of Nursing and Health Professions Undergraduate student respondents and fifty-five percent of the School of Nursing and Health Professions Graduate student respondents indicated that they did not participate in any clubs or organizations at USF. Twenty-eight percent of USF Undergraduate student respondents and sixty-one percent of USF Graduate student respondents indicated that they do not participate in any clubs or organizations at USF. Within the population of School of Nursing and Health Professions Undergraduate student respondents that indicated participating in a club or organization, the top one was academic/honorary organization (27%). The top selection for USF Undergraduate student respondents was cultural/multicultural/international organization (23%). Within the population of School of Nursing and Health Professions Graduate student respondents that indicated participating in a club or organization, the top one was departmental/cohort/program involvement (19%). This was also the top selection for the USF Graduate student respondent population, in which 10% indicated having departmental/cohort/program involvement.

Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

The above visual shows the SoNHP vs USF percentage totals by Clubs/Organizations, separated out by position. The bar lengths illustrate the percentage differences.

Students were asked what their cumulative grade point average was after their last semester.

Student Self-Reported GPA Comparison:

The School of Nursing and Health Professions Undergraduate student respondents had a higher percentage of respondents indicate that they had a GPA greater than or equal to 3.25 (70%), when compared to the USF Undergraduate student respondents (49%). The School of Nursing and Health Professions Graduate student respondents also had a higher percentage of respondents indicate that they had a GPA greater than or equal to 3.25 (69%), when compared to the USF Graduate student respondents (51%).

Climate Results

The following section reviews the climate findings for the School of Nursing and Health Professions. The analysis explored the climate at USF through an examination of respondents' personal experiences, their general perceptions of campus climate, and their perceptions of institutional actions regarding climate on campus, including administrative policies and academic initiatives.

Comfort with Overall Campus Climate at USF:

Seventy-seven percent of the School of Nursing and Health Professions population stated that they were either "comfortable" or "very comfortable" with the climate at USF. In comparison, seventy-seven percent of the USF Overall population also said they were either "comfortable" or "very comfortable" with the climate at USF.

Comfort with the Climate in the Department/Program or Work Unit:

Only fifty-three percent of the School of Nursing and Health Professions Faculty and Staff respondent population stated that they were either "comfortable" or "very comfortable" with the climate in their department/program or work unit. In comparison, seventy-two percent of the USF Faculty and Staff respondent population stated that they were either "comfortable" or "very comfortable" with the climate in their department/program or work unit.

Analyses was conducted to determine whether respondents' levels of comfort with the overall climate, and the climate in their workplaces differed based on various demographic characteristics, such as position status, gender identity, racial identity, sexual identity, disability status, income level status (students only), and first-generation status (students only).

Comfort with Climate in Workplace by Position Status:

Fifty-five percent of Faculty and forty-four percent of Staff in the School of Nursing and Health Professions respondent population stated that they were either “comfortable” or “very comfortable” with the climate in their department/program or work unit. In comparison, seventy percent of Faculty and seventy-three percent of Staff in the USF Faculty and Staff respondent populations stated that they were either “comfortable” or “very comfortable” with the climate in their department/program or work unit.

Comfort with Climate in the Classroom by Position Status:

Eighty-one percent of the School of Nursing and Health Professions Undergraduate student respondents, seventy-nine percent of the School of Nursing and Health Professions Graduate student respondents, and eighty-seven percent of the School of Nursing and Health Professions Faculty respondents stated that they were either “comfortable” or “very comfortable” with the climate in the classroom. In comparison, eighty percent of the USF Undergraduate student respondent population, eighty-five percent of the USF Graduate student respondent population, and eighty-six percent of the USF Faculty respondent population stated that they were either “comfortable” or “very comfortable” with the climate in the classroom.

Exclusionary, Intimidating, Offensive, and/or Hostile Conduct

Experienced Exclusionary, Intimidating, Offensive, and/or Hostile Conduct

Exclusionary (e.g., shunned, ignored), intimidating, offensive, and/or hostile (bullied, harassed) conduct that interfered with one's ability to work, learn, or live at USF within the past year, was examined. Within the School of Nursing and Health Professions population, 19% of Students, Faculty and Staff respondents stated that they personally experienced exclusionary, intimidating, offensive, and/or hostile conduct while at USF within the last year. Within the USF Overall population, 19% of Student, Faculty and Staff respondents stated that they personally experienced exclusionary, intimidating, offensive, and/or hostile conduct while at USF within the last year.

Conduct as a Result of Position Status

Of the 19% of the School of Nursing and Health Professions respondent population that experienced exclusionary, intimidating, offensive, and/or hostile conduct while at USF within the last year, 22% believed that this conduct was a result of their position status. Similarly, of the 19% of the USF Overall respondent population that experienced exclusionary, intimidating, offensive, and/or hostile conduct while at USF within the last year, 21% believed that this conduct was a result of their position status.

Conduct as a Result of Gender Identity

Of the School of Nursing and Health Professions population that experienced exclusionary, intimidating, offensive, and/or hostile conduct within the last year at USF, 3% were Transspectrum, 81% were Women, and 13% were Men. The Transspectrum population was too small to draw any meaningful conclusions from. However, a higher percentage of Women respondents (15%) than Men respondents (6%) who had experienced such conduct, believed that their experience was due to their gender identity. Of the USF Overall population that experienced exclusionary, intimidating, offensive, and/or hostile conduct within the last year at USF, 5% were Transspectrum, 66% were Women and 27% were Men. A higher percentage of Transspectrum respondents (75%) than Women respondents (27%) than Men respondents (13%) that had experienced such conduct, believed that their experience was due to their gender identity.

The above visual shows the SoNHP vs USF percentage totals by Employees' Primary Forms of Experienced Conduct. The bar lengths illustrate the percentage differences. Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

Source of Experienced Conduct

The respondents were also asked to identify who was the source of the experienced exclusionary, intimidating, offensive, and/or hostile conduct. The School of Nursing and Health Professions population that experienced this conduct indicated that the top source of the conduct was a Faculty Member/Other Instructional Staff (39%). The School of Nursing and Health Professions Undergraduate and Graduate student respondent population that experienced this conduct indicated that the top sources of the conduct were a Student (38%), with a close second being a Faculty Member/Other Instructional Staff (36%). The School of Nursing and Health Professions Faculty respondent population that experienced this conduct indicated that the top source of the conduct was a Faculty Member/Other Instructional Staff (34%). The School of Nursing and Health Professions Staff respondent population that experienced this conduct indicated that the top source of the conduct was a Senior Administrator (16%). The USF Overall respondent population that experienced this conduct indicated that the main source of the conduct came from a Student (42%), and Faculty Member/Other Instructional Staff (22%). The USF Undergraduate and Graduate student respondent population that experienced this conduct identified the top source of such conduct as being a Student (66%). The USF Faculty respondent population that experienced this conduct identified the top sources of such conduct as being a Coworker/Colleague (18%). The USF Staff respondent population that experienced this conduct identified the top source of such conduct as being a Coworker/Colleague (23%).

Respondents' Source of Experienced Exclusionary, Intimidating, Offensive, and/or Hostile Conduct

School of Nursing and Health Professions

School of Nursing and Health Professions

The above visual shows the SoNHP vs USF percentage totals by Employees' Source of Experienced Conduct. The bar lengths illustrate the percentage differences.
 Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

Location of Experienced Conduct

The respondents were also asked to identify the location of the experienced exclusionary, intimidating, offensive, and/or hostile conduct. The top location of reported conduct for the School of Nursing and Health Professions respondents that experienced this conduct was In a Class/Lab (43%). The top location of reported conduct for the School of Nursing and Health

Professions Undergraduate and Graduate student respondents that experienced this conduct was In a Class/Lab (61%). The top location of reported conduct for the School of Nursing and Health Professions Faculty respondents that experienced this conduct was In a Meeting with a Group of People (59%). The top location of reported conduct for the School of Nursing and Health Professions Staff population that experienced this conduct, was In a USF Administrative Office (80%). The top locations of reported conduct for the USF Overall respondent population that experienced this conduct, were in a Class/Lab (28%), and In a Meeting with a Group of People (25%). The top location of reported conduct for the USF Undergraduate and Graduate student respondent population that experienced this conduct was in a Class/Lab (44%). The top location of reported conduct for the USF Faculty respondent population that experienced this conduct, was In a Meeting with a Group of People (37%). The top locations of reported conduct for the USF Staff respondent population that experienced this conduct, were While Working at a USF Job (45%), In a Meeting with a Group of People (39%), and In a USF Administrative Office (37%).

Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

Actions in Response to Experienced Conduct

The respondents were also asked what their action was in response to the experienced exclusionary, intimidating, offensive, and/or hostile conduct. Within the School of Nursing and Health Professions population that experienced this conduct, the top reactions to such conduct were that they Told a Friend (49%), they Avoided the Person/Venue (40%), and/or they Did Not Do Anything (37%). Similarly, within the USF Overall population that experienced this conduct, the main reactions to such conduct were that they Told a Friend (48%), they Avoided the

Person/Venue (38%), and/or they Did Not Do Anything (37%). In the School of Nursing and Health Professions, 17% of respondents that experienced this conduct, indicated that they Contacted a USF Resource as a course of action. Of these individuals, 74% indicated that they contacted a Faculty Member. In the USF Overall respondent population that experienced this conduct, 19% of respondents indicated that they Contacted a USF Resource as a course of action. Of these individuals, the top USF Resources contacted were a Faculty Member (33%), and a Senior Administrator (32%).

Characteristics of Observed Conduct

Respondents were asked to identify what they believed to be the basis of the observed exclusionary, intimidating, offensive and/or hostile conduct. Within the School of Nursing and Health Professions respondent population, the primary basis identified was Ethnicity (30%). Within the USF Overall respondent population, the top bases identified were Ethnicity (31%), Racial Identity (28%), and Gender/Gender Identity (27%).

The above visual shows the SoNHP vs USF percentage totals by Characteristics for Observed Conduct. The bar lengths illustrate the percentage differences. Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

Form of Observed Conduct

Respondents were asked to identify what they believed to be the forms of the observed exclusionary, intimidating, offensive and/or hostile conduct. For the School of Nursing and Health Professions respondent population, the top forms of observed conduct were the Person Being Ignored/Excluded (47%), the Person Being Isolated or Left Out (38%), and Derogatory Verbal Remarks (38%). For the USF Overall respondent population, the top forms of observed conduct were Derogatory Verbal Remarks (46%) and the Person Being Ignored/Excluded (37%).

The above visual shows the SoNHP vs USF percentage totals by Form of Observed Conduct. The bar lengths illustrate the percentage differences.
Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

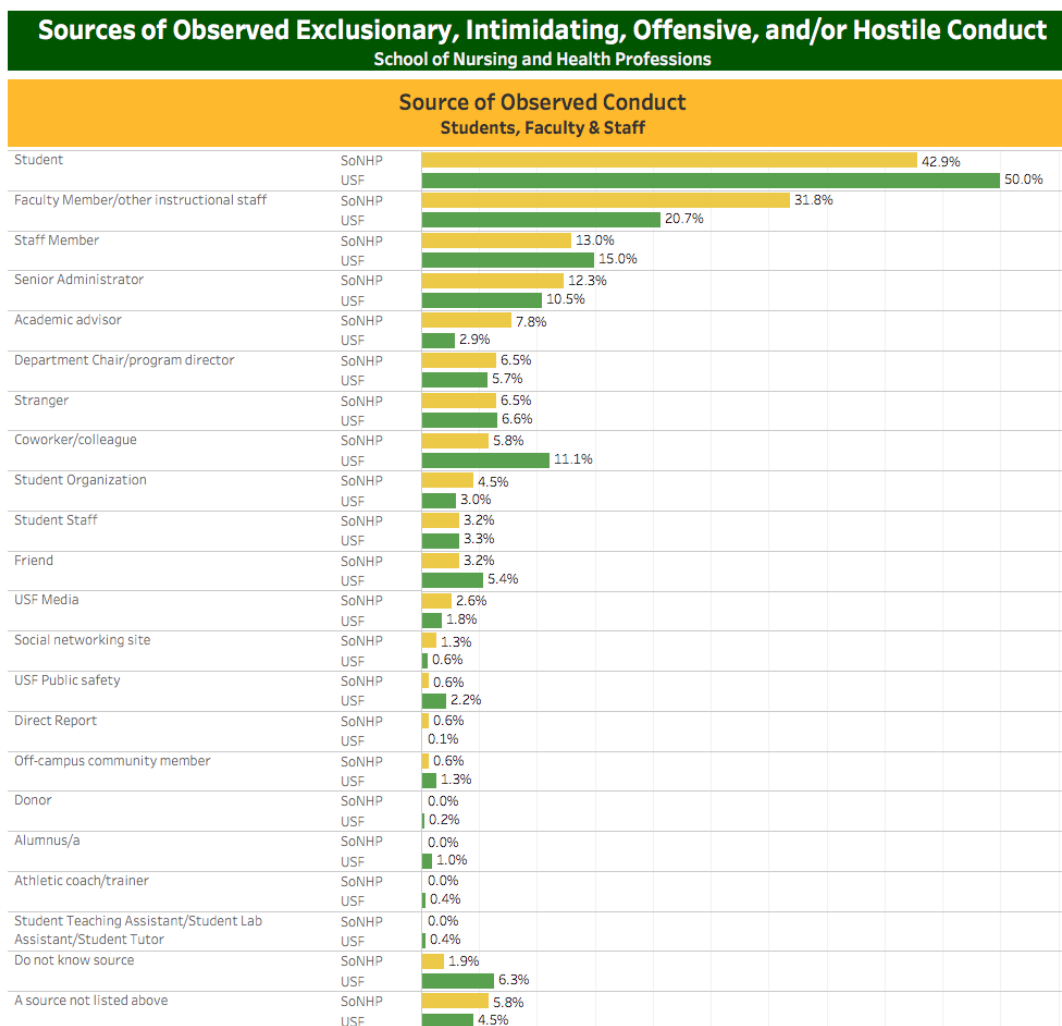

Target of Observed Conduct

Respondents were asked to identify who they believed to be the target of the observed exclusionary, intimidating, offensive and/or hostile conduct. For the School of Nursing and Health Professions respondent population, the top reported target of the observed conduct was a Student (66%). For the USF Overall respondent population, the top reported target of the observed conduct was also a Student (63%).

Source of Observed Conduct

Respondents were asked to identify the source of the observed exclusionary, intimidating, offensive and/or hostile conduct. For the School of Nursing and Health Professions respondent population, the top source of observed conduct was a Student (43%), and a Faculty Member/Other Instructional Staff (32%). For the USF Overall respondent population, the top source of observed conduct was a Student (50%).

The above visual shows the SoNHP vs USF percentage totals by Source of Observed Conduct. The bar lengths illustrate the percentage differences.
Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

Location of Observed Conduct

Respondents were asked to identify the location of the observed exclusionary, intimidating, offensive and/or hostile conduct. The top location of observed conduct for the School of Nursing and Health Professions respondent population was in a Class/Lab (52%). The top location of observed conduct for the USF Overall respondent population was also in a Class/Lab (29%).

The above visual shows the SoNHP vs USF percentage totals by Location of Observed Conduct. The bar lengths illustrate the percentage differences.
Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

Action in Response to Observed Conduct

Respondents were asked to identify what their action was in response to the observed exclusionary, intimidating, offensive and/or hostile conduct. Within the School of Nursing and Health Professions respondent population, the top actions in response to the observed conduct were that they Did Not Do Anything (42%), and that they Told a Friend (35%). Eleven percent of the School of Nursing and Health Professions respondent population that took an action in response to the observed conduct, Contacted a USF Resource. Of those 11%, over half (56%) contacted a Faculty Member. Within the USF Overall respondent population, the top actions in response to the observed conduct were that they Told a Friend (33%), or that they Did Not Do Anything (32%). Of the USF Overall respondent population that took an action in response to the

observed conduct, 13% Contacted a USF Resource. Of these 13%, the top USF resources contacted were a Senior Administrator (44%) and a Faculty Member (32%).

Emotional Reaction to Unwanted Sexual Interaction

Of the School of Nursing and Health Professions respondents that experienced Unwanted Sexual Interaction, the most common reaction was that they Felt Angry (69%). Of the USF Overall respondents that experienced Unwanted Sexual Interaction, the most common reaction was that they Felt Angry (57%).

The above visual shows the SoNHP vs USF percentage totals by Reaction to Unwanted Sexual Interaction. The bar lengths illustrate the percentage differences.
Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

Actions in Response to Unwanted Sexual Interaction

Of the School of Nursing and Health Professions respondents that experienced Unwanted Sexual Interaction, the top actions in response to such conduct were that they Told a Friend (73%) and Avoided the Person/Venue (62%). Twenty-seven percent of School of Nursing and Health Professions respondents that experienced such conduct, indicated that they Contacted a USF Resource. The top two USF resources contacted were USF Public Safety (29%) and USF Counseling and Psychological Services (29%). Of the USF Overall respondents that experienced Unwanted Sexual Interaction, the top actions in response to such conduct were that they Told a Friend (52%) and Avoided the Person/Venue (47%). Eight percent of USF Overall respondents that experienced such conduct, indicated that they Contacted a USF Resource. The top two USF resources contacted were USF Title IX Office/Coordinator (47%) and USF Counseling and Psychological Services (41%).

Knowledge of Sexual Misconduct:

In respect to sexual misconduct, respondents were asked their knowledge of unwanted sexual contact/conduct definitions, policies, and resources. The majority of School of Nursing and Health Professions respondents agreed to having a broad knowledge of definitions, policies, and resources surrounding unwanted sexual conduct. Several areas within the School of Nursing and Health Professions population negatively stood out, however. Twenty-two percent of

respondents “disagreed” or “strongly disagreed” with the statement, “I am aware of prevention programs offered at USF.” Twenty-two percent of respondents “disagreed” or “strongly disagreed” with the statement, “I know that information about the prevalence of sex offenses are available in the USF Annual Security and Fire Safety Report”. Finally, twenty-four percent of respondents “disagreed” or “strongly disagreed” with the statement, “I know how and where to report such incidents.” The majority of USF Overall respondents also agreed to having a broad knowledge of definitions, policies, and resources surrounding unwanted sexual conduct. A couple areas did negatively stand out, however. Twenty percent of USF Overall respondents “disagreed” or “strongly disagreed” with the statement, “I know that information about the prevalence of sex offenses are available in the USF Annual Security and Fire Safety Report”. In addition, eighteen percent of respondents “disagreed” or “strongly disagreed” with the statement, “I am aware of prevention programs offered at USF.”

Perceived Environment

The final section of the report describes responses to survey items focused on the subgroup's perceptions of the USF environment. This section will be divided out by Students, Faculty and Staff.

Students Perceived Environment

Considered Leaving USF

The survey asked student respondents if they had ever seriously considered leaving USF, and if they had, they were then asked why. Twenty-four percent of School of Nursing and Health

Professions Undergraduate respondents, and twenty-one percent of School of Nursing and Health Professions Graduate student respondents indicated that they had seriously considered leaving. In comparison, thirty-nine percent of USF Overall Undergraduate student respondents, and twenty-two percent of USF Graduate student respondents indicated that they had seriously considered leaving.

Respondents Seriously Considered Leaving USF in Past Year					
School of Nursing and Health Professions					
Considered Leaving USF					
Undergraduate & Graduate Students					
		SoNHP		USF	
		n	%	n	%
Undergraduate	Yes, seriously considered leaving.	77	24.4%	667	38.9%
	No, did not seriously consider leaving.	239	75.6%	1049	61.1%
Graduate	Yes, seriously considered leaving.	54	21.0%	201	21.7%
	No, did not seriously consider leaving.	203	79.0%	726	78.2%
	Missing/Unknown			<5	0.1%

The above visual shows the SoNHP vs USF percentage totals by Considered Leaving USF, separated out by position. The bar lengths illustrate the percentage differences.

Of the 24% of School of Nursing and Health Professions Undergraduate students that indicated they had seriously considered leaving USF, the top three reasons provided were Lack of Sense of Belonging (55%), Financial Reasons (48%), and Lack of Social Life at USF (48%). Of the 21% of School of Nursing and Health Professions Graduate student respondents that indicated they had seriously considered leaving USF, the top reasons provided was a Reason Not Listed (68%). Of the 39% of USF Undergraduate student respondents that indicated they had seriously considered leaving USF, the top reasons provided were a Lack of Sense of Belonging (60%), and a Lack of Social Life at USF (53%). Of the 22% of USF Graduate student respondents that indicated they had seriously considered leaving USF, the top reasons provided were a Reason Not Listed Above (37%), and Financial Reasons (37%).

Considerations for Leaving Undergraduate & Graduate Students

The above visual shows the SoNHP vs USF percentage totals by Gender Identity, separated out by position. The bar lengths illustrate the percentage differences. Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

Perception of Campus Climate

The survey queried student respondents about their perception of the climate in the classroom. The perception of climate in the classroom of Undergraduate and Graduate student respondents within the School of Nursing and Health Professions, was generally positive. However, one area did leave room for improvement. Thirty-nine percent of Undergraduate and Graduate student respondents in the School of Nursing and Health Professions “agreed” or “strongly agreed” with the statement “I think that faculty prejudice my ability based on their perception of my identity/background.” Within the USF Undergraduate and Graduate student respondent population, 36% of student respondents also “agreed” or “strongly agreed” with this statement.

Graduate Student Perceptions

Graduate students, specifically, were asked how they felt about their experience at USF. There were several areas with room for improvement. Regarding advising, 27% of School of Nursing and Health Professions respondents "disagreed" or "strongly disagreed" with the statement, "I am satisfied with the quality of advising I have received from my department/program." In comparison, 14% of the USF Graduate student respondents "disagreed" or "strongly disagreed" with the statement. There were also two areas with room for improvement within the department/program. Thirty-six percent of respondents within the School of Nursing and Health Professions "disagreed" or "strongly disagreed" with the statement, "There are adequate opportunities for me to interact with other university faculty outside of my department." In comparison, 21% of the USF Graduate student respondents "disagreed" or "strongly disagreed" with the statement. In addition, twenty-five percent of respondents within the School of Nursing and Health Professions "disagreed" or "strongly disagreed" with the statement, "My

department/program has provided me opportunities to serve the department or university in various capacities outside of teaching or research.” In comparison, 17% of the USF Graduate student respondents “disagreed” or “strongly disagreed” with the statement.

Academic Experience

Students were asked to indicate the extent to which they “agreed” with a number of statements regarding their academic experience at USF. Overall, Undergraduate and Graduate student

respondents within the School of Nursing and Health Professions reported having a positive academic experience. However, there was one area with a high percentage of negativity. Fifty-two percent of School of Nursing and Health Professions student respondents “agreed” or “strongly agreed” with the statement, “Few of my courses this year have been intellectually stimulating.” Forty-seven percent of USF Undergraduate and Graduate student respondents “agreed” or “strongly agreed” with this statement.

Institutional Initiatives

Students were also asked about their perception of a number of institutional initiatives. Within the School of Nursing and Health Professions population, of the Undergraduate and Graduate students that answered the question believing the initiative was currently available, the majority reported that the initiative positively influences climate. Similarly, of the Undergraduate and Graduate students that answered the question believing that the initiative was not currently available, the majority reported that the initiative would positively influence climate. This was in line with the results from the USF Student respondent population.

Student Respondents' Perceptions of Institutional Initiatives

Based on your knowledge of the availability of the following institutional initiatives, please indicate how each influences or would influence the climate at USF.

School of Nursing and Health Professions

The left column shows the respondents thoughts on how various initiatives influenced the climate at USF, if they were believed to be currently available. The right column shows the respondents thoughts on how initiatives would influence the climate if they were not currently available, and made available in the future.

Faculty and Staff Perceived Environment

Considered Leaving USF

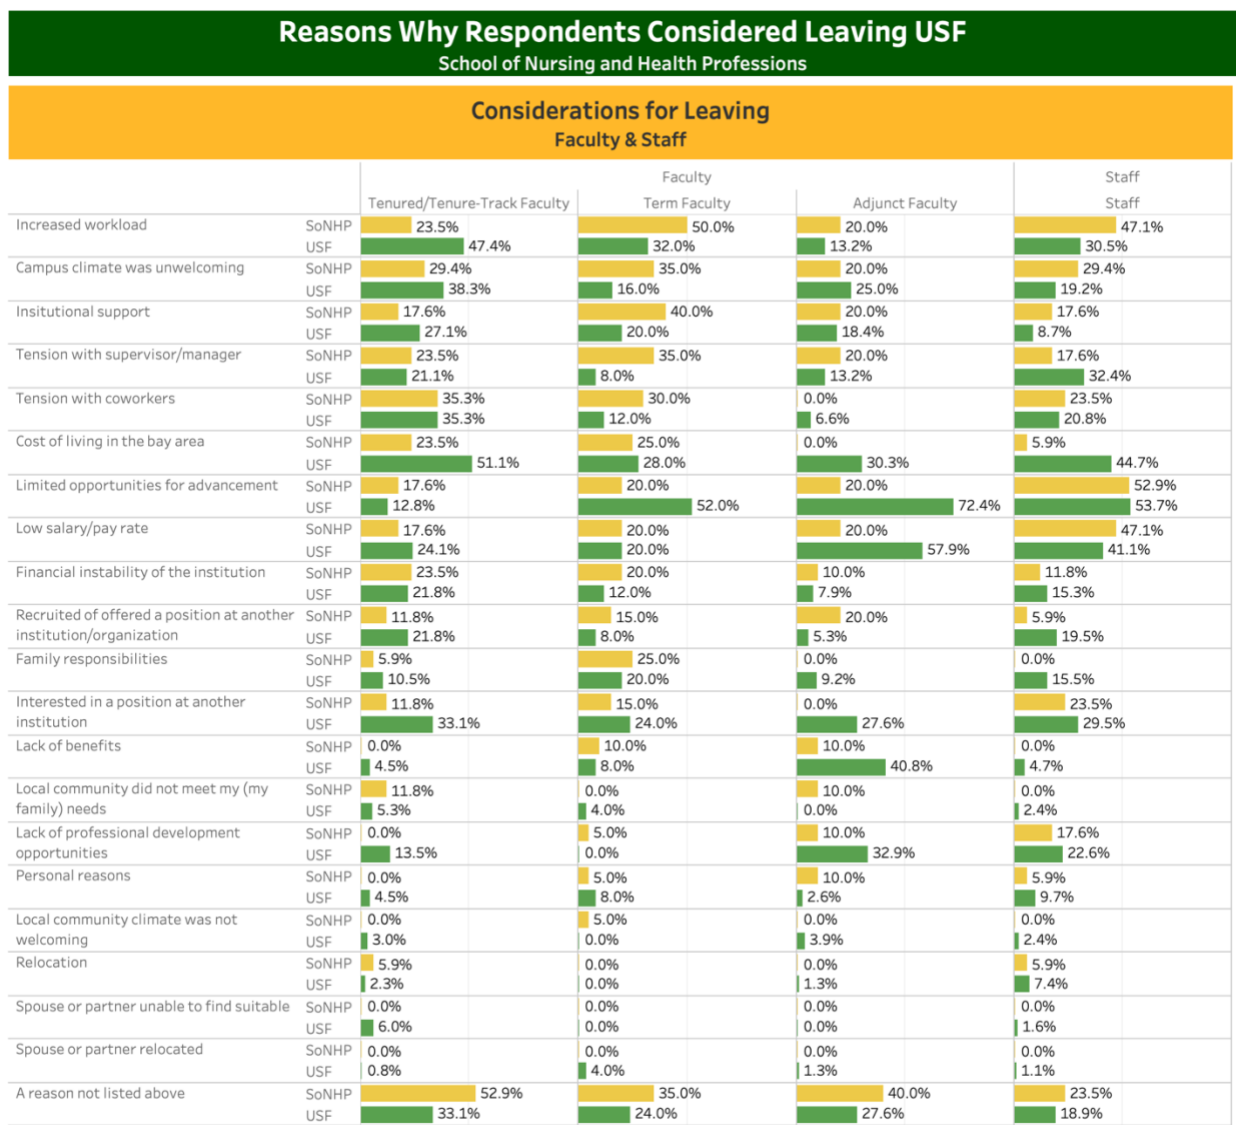

The survey asked respondents if they had ever seriously considered leaving USF, and if they had, they were then asked why. Within the School of Nursing and Health Professions, 50% of Faculty respondents (59% Tenured/Tenure-Track, 77% Term, 26% Adjunct), and 74% of Staff respondents stated that they had seriously considered leaving USF in the past year. Within the USF Overall population, 47% of Faculty respondents (56% Tenured/Tenure-Track, 39% Term, 39% Adjunct), and 59% of Staff respondents stated that they had seriously considered leaving USF in the past year.

The above visual shows the SoNHP vs USF percentage totals by Considered Leaving USF, separated out by position. The bar lengths illustrate the percentage differences.

Within the School of Nursing and Health Professions Faculty population subcategories, of the 59% of Tenured/Tenure-Track Faculty respondents that seriously considered leaving, the top reason was A Reason Not Listed Above (53%). Of the 77% of School of Nursing and Health Professions Term Faculty respondents that seriously considered leaving, the top reason was Increased Workload (50%). Of the 26% of School of Nursing and Health Professions Adjunct Faculty respondents that seriously considered leaving, the top reason was A Reason Not Listed

Above (40%). Within the USF Faculty population subcategories, of the 56% of Tenured/Tenure-Track Faculty respondents that seriously considered leaving, the top reason was Cost of Living in the Bay Area (51%). Of the 39% of USF Term Faculty respondents that seriously considered leaving, the top reason was Limited Opportunities for Advancement (52%). Of the 39% of USF Adjunct Faculty respondents that seriously considered leaving, the top reason was Limited Opportunities for Advancement (72%). Of the 74% of the School of Nursing and Health Professions Staff respondents that indicated they had seriously considered leaving USF, the top three reasons provided were Limited Opportunities for Advancement (53%), Increased Workload (47%), and Low Salary/Pay Rate (47%). The top reasons provided by USF Staff respondents, were Limited Opportunities for Advancement (54%), and Cost of Living in the Bay Area (45%).

The above visual shows the SoNHP vs USF percentage totals by Considerations for Leaving, separated out by position. The bar lengths illustrate the percentage differences. Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

Unfair Employment Practices

Employee (Faculty and Staff) respondents were asked a series of questions on their experiences with unfair employment practices at USF. Within the School of Nursing and Health Professions Faculty population subcategories, 21% of Tenured/Tenure-Track Faculty respondents, 39% of Term Faculty respondents, 3% of Adjunct Faculty respondents, and 44% of Staff respondents indicated experiencing unfair hiring practices. Within the USF Faculty population subcategories, 28% of Tenured/Tenure-Track Faculty respondents, 25% of Term Faculty respondents, 22% of Adjunct Faculty respondents, and 24% of Staff respondents indicated experiencing unfair hiring practices.

Faculty Perceived Environment

Overall Workplace

The survey queried respondents about their perception of the workplace climate. The School of Nursing and Health Professions Faculty respondents' perceptions about the workplace climate were generally positive. However, there were areas within the School of Nursing and Health Professions Faculty respondent subcategories that leave room for improvement.

Tenured/Tenure-Track Faculty

- 34% of the School of Nursing and Health Professions Tenured/Tenure-Track Faculty respondents “disagreed” or “strongly disagreed” with the statement, “As a faculty member at USF, I feel the performance evaluation process is clear.” Twenty-six percent of the USF Tenured/Tenure-Track Faculty respondents “disagreed” or “strongly disagreed” with the statement.
- 28% of the School of Nursing and Health Professions Tenured/Tenure-Track Faculty respondents “agreed” or “strongly agreed” with the statement, “As a faculty member at USF, I think that faculty in my department/program prejudice my abilities based on their perception of my identity/background.” Twenty percent of the USF Tenured/Tenure-Track Faculty respondents “agreed” or “strongly agreed” with the statement.
- 28% of the School of Nursing and Health Professions Tenured/Tenure-Track Faculty respondents “disagreed” or “strongly disagreed” with the statement, “As a faculty member at USF, I believe that USF encourages free and open discussion of difficult topics.” Twenty-seven percent of the USF Tenured/Tenure-Track Faculty respondents “disagreed” or “strongly disagreed” with the statement.
- 28% of the School of Nursing and Health Professions Tenured/Tenure-Track Faculty respondents “disagreed” or “strongly disagreed” with the statement, “As a faculty member at USF, I feel my colleagues include me in opportunities that will help my career as much as they do others in my position.” Eleven percent of the USF Tenured/Tenure-Track Faculty respondents “disagreed” or “strongly disagreed” with the statement.

Term Faculty

- 50% of the School of Nursing and Health Professions Term Faculty respondents “disagreed” or “strongly disagreed” with the statement, “As a faculty member at USF, I feel my colleagues include me in opportunities that will help my career as much as they do others in my position.” Eight percent of the USF Term Faculty respondents “disagreed” or “strongly disagreed” with the statement.
- 46% of the School of Nursing and Health Professions Term Faculty respondents “disagreed” or “strongly disagreed” with the statement, “As a faculty member at USF, I

feel the performance evaluation process is clear.” Twenty-eight percent of the USF Term Faculty respondents “disagreed” or “strongly disagreed” with the statement.

- 46% of the School of Nursing and Health Professions Term Faculty respondents “disagreed” or “strongly disagreed” with the statement, “As a faculty member at USF, I feel I have job security.” Forty-two percent of the USF Term Faculty respondents “disagreed” or “strongly disagreed” with the statement.
- 42% of the School of Nursing and Health Professions Term Faculty respondents “disagreed” or “strongly disagreed” with the statement, “As a faculty member at USF, I believe that USF encourages free and open discussion of difficult topics.” Thirteen percent of the USF Term Faculty respondents “disagreed” or “strongly disagreed” with the statement.
- 38% of the School of Nursing and Health Professions Term Faculty respondents “disagreed” or “strongly disagreed” with the statement, “As a faculty member at USF, I feel positive about my career opportunities at USF.” Seventeen percent of the USF Term Faculty respondents “disagreed” or “strongly disagreed” with the statement.
- 35% of the School of Nursing and Health Professions Term Faculty respondents “agreed” or “strongly agreed” with the statement, “As a faculty member at USF, I think that faculty in my department/program prejudice my abilities based on their perception of my identity/background.” Twenty-two percent of the USF Term Faculty respondents “agreed” or “strongly agreed” with the statement.
- 31% of the School of Nursing and Health Professions Term Faculty respondents “disagreed” or “strongly disagreed” with the statement, “As a faculty member at USF, I feel I would recommend USF as a good place to work.” Six percent of the USF Term Faculty respondents “disagreed” or “strongly disagreed” with the statement.
- 27% of the School of Nursing and Health Professions Term Faculty respondents “disagreed” or “strongly disagreed” with the statement, “As a faculty member at USF, I feel USF provides me with resources to pursue professional development.” Eleven percent of the USF Term Faculty respondents “disagreed” or “strongly disagreed” with the statement.

Adjunct Faculty

- 38% of the School of Nursing and Health Professions Adjunct Faculty respondents “disagreed” or “strongly disagreed” with the statement, “As a faculty member at USF, I feel I have job security.” Sixty-four percent of the USF Adjunct Faculty respondents “disagreed” or “strongly disagreed” with the statement.

Perception of Institutional Initiatives

Faculty were also asked about their perception of a number of institutional initiatives. Within the School of Nursing and Health Professions respondent population, of the faculty that answered the question believing the initiative was currently available, the majority reported that the initiative positively influences climate. Similarly, of the faculty that answered the question believing that the initiative was not currently available, the majority reported that the initiative would positively influence climate.

Faculty Respondents' Perceptions of Institutional Initiatives

Based on your knowledge of the availability of the following institutional initiatives, please indicate how each influences or would influence the climate at USF.

School of Nursing and Health Professions

The left column shows the respondents thoughts on how various initiatives influenced the climate at USF, if they were believed to be currently available. The right column shows the respondents thoughts on how initiatives would influence the climate if they were not currently available, and made available in the future.

Tenured, Tenure-Track, and Non-Tenure-Track Faculty were also asked a subset of questions regarding the workplace and their feelings of value.

Tenured and Tenure-Track Perceived Environment

Within the School of Nursing and Health Professions Tenured/Tenure-Track Faculty population, there were a number of areas with room for improvement.

- 48% of Tenured/Tenure-Track Faculty respondents in the School of Nursing and Health Professions “agreed” or “strongly agreed” with the statement, “As a faculty member at USF, I feel (or felt) I perform more work to help students than do my colleagues.” Within the USF Tenured/Tenure-Track Faculty respondents, 54% “agreed” or “strongly agreed” with the statement.
- 45% of Tenured/Tenure-Track Faculty respondents in the School of Nursing and Health Professions “agreed” or “strongly agreed” with the statement, “As a faculty member at USF, I feel (or felt) burdened by service responsibilities beyond those of my colleagues

with similar performance expectations.” Within the USF Tenured/Tenure-Track Faculty respondents, 56% “agreed” or “strongly agreed” with the statement.

- 31% of Tenured/Tenure-Track Faculty respondents in the School of Nursing and Health Professions “disagreed” or “strongly disagreed” with the statement, “As a faculty member at USF, I feel (or felt) supported and mentored during the tenure-track years.” Only 17% of USF Tenured/Tenure-Track Faculty respondents “disagreed” or “strongly disagreed” with the statement.
- 31% of Tenured/Tenure-Track Faculty respondents in the School of Nursing and Health Professions “disagreed” or “strongly disagreed” with the statement, “As a faculty member at USF, I feel (or felt) faculty opinions are taken seriously by senior administration.” Within the USF Tenured/Tenure-Track Faculty respondents, 52% “disagreed” or “strongly disagreed” with the statement.
- 28% of Tenured/Tenure-Track Faculty respondents in the School of Nursing and Health Professions “disagreed” or “strongly disagreed” with the statement, “As a faculty member at USF, I feel (or felt) USF policies for delay of the tenure-clock are used by all faculty.” Within the USF Tenured/Tenure-Track Faculty respondents, 24% “disagreed” or “strongly disagreed” with the statement.
- 28% of Tenured/Tenure-Track Faculty respondents in the School of Nursing and Health Professions “disagreed” or “strongly disagreed” with the statement, “As a faculty member at USF, I feel (or felt) faculty opinions are valued within USF committees.” Within the USF Tenured/Tenure-Track Faculty respondents, 28% “disagreed” or “strongly disagreed” with the statement.

Non-Tenure-Track

The Non-Tenure-Track Faculty respondents in the School of Nursing and Health Professions also indicated a number of areas with room for improvement within the Term Faculty and Adjunct Faculty subcategory respondent populations.

Term Faculty

- 69% of Term Faculty respondents in the School of Nursing and Health Professions “agreed” or “strongly agreed” with the statement, “As an employee with non-tenure-track appointment at USF I feel (or felt) I perform more work to help students than do my colleagues.” Within the USF Term Faculty respondents, 53% “agreed” or “strongly agreed” with the statement.
- 65% of Term Faculty respondents in the School of Nursing and Health Professions “agreed” or “strongly agreed” with the statement, “As an employee with non-tenure-track appointment at USF I feel (or felt) pressured to do extra work that is uncompensated.” Within the USF Term Faculty respondents, 36% “agreed” or “strongly agreed” with the statement.
- 62% of Term Faculty respondents in the School of Nursing and Health Professions “agreed” or “strongly agreed” with the statement, “As an employee with non-tenure-track

appointment at USF I feel (or felt) burdened by service responsibilities beyond those of my colleagues with similar performance expectations.” Within the Term Faculty respondents, 36% “agreed” or “strongly agreed” with the statement.

- 50% of Term Faculty respondents in the School of Nursing and Health Professions “disagreed” or “strongly disagreed” with the statement, “As an employee with non-tenure-track appointment at USF I feel (or felt) I have job security.” Within the USF Term Faculty respondents, 48% “disagreed” or “strongly disagreed” with the statement. (**This question was asked again in survey, but specific to non-tenure-track faculty. Results varied slightly from previous section when asked of all faculty.*)
- 50% of Term Faculty respondents in the School of Nursing and Health Professions “disagreed” or “strongly disagreed” with the statement, “As an employee with non-tenure-track appointment at USF I feel (or felt) the criteria for contract renewal are clear.” Within the USF Term Faculty respondents, 42% “disagreed” or “strongly disagreed” with the statement.
- 46% of Term Faculty respondents in the School of Nursing and Health Professions “disagreed” or “strongly disagreed” with the statement, “As an employee with non-tenure-track appointment at USF I feel (or felt) the criteria used for contract renewal are applied equally to all positions.” Within the USF Term Faculty respondents, 38% “disagreed” or “strongly disagreed” with the statement.
- 46% of Term Faculty respondents in the School of Nursing and Health Professions “disagreed” or “strongly disagreed” with the statement, “As an employee with non-tenure-track appointment at USF I feel (or felt) there are clear expectations of my responsibilities.” Within the USF Term Faculty respondents, 30% “disagreed” or “strongly disagreed” with the statement.
- 46% of Term Faculty respondents in the School of Nursing and Health Professions “disagreed” or “strongly disagreed” with the statement, “As an employee with non-tenure-track appointment at USF I feel (or felt) Non-Tenure-Track Faculty opinions are taken seriously by senior administrators.” Within the USF Term Faculty respondents, 34% “disagreed” or “strongly disagreed” with the statement.
- 46% of Term Faculty respondents in the School of Nursing and Health Professions “disagreed” or “strongly disagreed” with the statement, “As an employee with non-tenure-track appointment at USF I feel (or felt) Non-Tenure-Track Faculty opinions are taken seriously by tenured/tenure-track faculty.” Within the USF Term Faculty respondents, 41% “disagreed” or “strongly disagreed” with the statement.

Adjunct Faculty

- 44% of Adjunct Faculty respondents in the School of Nursing and Health Professions “disagreed” or “strongly disagreed” with the statement, “As an employee with non-tenure-track appointment at USF I feel (or felt) I have job security.” Within the USF Adjunct Faculty respondents, 64% “disagreed” or “strongly disagreed” with the statement. (**This question was asked again in survey, but specific to non-tenure-track faculty. Results varied slightly from previous section when asked of all faculty.*)
- 26% of Adjunct Faculty respondents in the School of Nursing and Health Professions “disagreed” or “strongly disagreed” with the statement, “As an employee with non-

tenure-track appointment at USF I feel (or felt) the criteria for contract renewal are clear.” Within the USF Adjunct Faculty respondents, 37% “disagreed” or “strongly disagreed” with the statement.

Staff Perceived Environment

Workplace Perceptions & Feelings of Value

The survey queried respondents about their perception of the workplace and feelings of value. The School of Nursing and Health Professions Staff respondents' perceptions about both the

workplace and their feelings of value, were slightly negative, indicating quite a few areas with room for improvement.

Workplace areas for improvement:

- 52% of Staff respondents in the School of Nursing and Health Professions “disagreed” or “strongly disagreed” with the statement, “As a staff member at USF, I feel staff opinions are valued by USF Faculty.” Within the USF Staff respondents, 34% “disagreed” or “strongly disagreed” with the statement.
- 48% of Staff respondents in the School of Nursing and Health Professions “disagreed” or “strongly disagreed” with the statement, “As a staff member at USF, I feel there are clear procedures on how I can advance at USF.” Within the USF Staff respondents, 48% “disagreed” or “strongly disagreed” with the statement.
- 48% of Staff respondents in the School of Nursing and Health Professions “disagreed” or “strongly disagreed” with the statement, “As a staff member at USF, I feel the performance appraisal process is productive.” Within the USF Staff respondents, 35% “disagreed” or “strongly disagreed” with the statement.
- 39% of Staff respondents in the School of Nursing and Health Professions “disagreed” or “strongly disagreed” with the statement, “As a staff member at USF, I feel staff opinions are valued by USF administration.” Within the USF Staff respondents, 28% “disagreed” or “strongly disagreed” with the statement.
- 35% of Staff respondents in the School of Nursing and Health Professions “agreed” or “strongly agreed” with the statement, “As a staff member at USF, I feel I think that faculty prejudice my abilities based on their perception of my identity/background.” Within the USF Staff respondents, 20% “agreed” or “strongly agreed” with the statement.
- 35% of Staff respondents in the School of Nursing and Health Professions “disagreed” or “strongly disagreed” with the statement, “As a staff member at USF, I feel my direct supervisor provides me with job/career advice or guidance when I need it.” Within the USF Staff respondent population, 18% “disagreed” or “strongly disagreed” with the statement.
- 35% of Staff respondents in the School of Nursing and Health Professions “disagreed” or “strongly disagreed” with the statement, “As a staff member at USF, I feel positive about my career opportunities at USF.” Within the USF Staff respondents, 28% “disagreed” or “strongly disagreed” with the statement.
- 35% of Staff respondents in the School of Nursing and Health Professions “disagreed” or “strongly disagreed” with the statement, “As a staff member at USF, I feel Staff opinions are valued on USF committees.” Within the USF Staff respondents, 21% “disagreed” or “strongly disagreed” with the statement.
- 30% of Staff respondents in the School of Nursing and Health Professions “disagreed” or “strongly disagreed” with the statement, “As a staff member at USF, I feel the performance appraisal process is clear.” Within the USF Staff respondents, 19% “disagreed” or “strongly disagreed” with the statement.
- 30% of Staff respondents in the School of Nursing and Health Professions “disagreed” or “strongly disagreed” with the statement, “As a staff member at USF, I feel I have job security.” Within the USF Staff respondents, 14% “disagreed” or “strongly disagreed” with the statement.

- 26% of Staff respondents in the School of Nursing and Health Professions “disagreed” or “strongly disagreed” with the statement, “As a staff member at USF, I feel there are clear expectations of my responsibilities.” Within the USF Staff respondents, 15% “disagreed” or “strongly disagreed” with the statement.
- 22% of Staff respondents in the School of Nursing and Health Professions “disagreed” or “strongly disagreed” with the statement, “As a staff member at USF, I feel I am included in opportunities that will help my career as much as others in similar positions.” Within the USF Staff respondents, 19% “disagreed” or “strongly disagreed” with the statement.

Perception of Institutional Initiatives

Staff were also asked about their perception of a number of institutional initiatives. Within the School of Nursing and Health Professions population, of the staff that answered the question believing the initiative was currently available, the majority reported that the initiative positively influences climate. Similarly, of the staff that answered the question believing that the initiative was not currently available, the majority reported that the initiative would positively influence climate.

Staff Respondents' Perception of Institutional Initiatives

Based on your knowledge of the availability of the following institutional initiatives, please indicate how each influences or would influence the climate at USF.

Qualitative Response Analysis

Faculty

The overall perception of the campus climate within the qualitative comments from the School of Nursing and Health Professions Faculty population, was negatively skewed. There were, however, a couple of positive overall campus comments such as, “Hilltop climate is excellent in my opinion” and “USF is a wonderful school it has an important mission. Faculty work very hard to provide students what they need to learn.”

There were two major negative themes that emerged within the qualitative data for Faculty respondents, that were supported by the quantitative analysis as well. The first theme was anger with specific members of the school's leadership. Due to privacy concerns, the comments related to this theme are not presented in this report.

The second theme that emerged within the qualitative data, that was also supported in the quantitative results, was the School of Nursing and Health Professions Faculty respondents' frustration with the climate in the workplace. Respondents offered the following comments:

- “It's just been bad lately. Lots of top down policies not even shared with faculty beforehand, and changes occurring mid academic year without warning. Threatening punitive emails that are disrespectful if faculty not following orders. An overall disrespect for faculty from administration treating them as pawns in a business game. Many faculty are upset, stressed, overworked.”
- “Not included by a peer clique...”
- “Lack of respect for my opinions. People in administrative positions favoring others. Folks in new administrative positions that use authoritarian style of leadership.”
- “Male faculty colleagues exert power over female colleagues...”
- “Senior faculty who is a bully with expectations to do excessive service.”
- “In a standing academic faculty committee meeting, I was singled out and told I was ‘confused’ and embarrassed publicly...”
- “I was excluded from faculty committees/meetings, etc.”
- “Microaggressions.”
- “Unrealistic expectations for workload and pressure to work well beyond service and teaching requirements (overload).”
- “Passive aggressive comments.”
- “My feelings of self-worth and self-esteem have plummeted while on this job.”
- “There are faculty that take over in the meetings and their opinion is the end all. They don't listen to others and this is in many levels and meetings.”
- “There is tension between some staff and faculty at the SONHP which I attribute to ineffective management, lack of clarification of roles/responsibilities and a prevailing

attitude that faculty should have little input into operational policies/procedures that directly affect student satisfaction. There seems to be a culture of blame, passing the buck, some overt and non-verbal lack of collaboration (eye rolling), saying one thing and doing another, and a hierarchical culture that does not promote transparency and operational effectiveness or teamwork...”

- “...I really have no idea what is wrong with them but there is a toxic and biased environment that totally lacks support and professional integrity and ethics.”
- “...I do not want to leave USF but it is increasingly frustrating to see how people treat each other when they are not in the Dean's presence...”

Staff

The overall perception of the campus climate within the qualitative comments from the School of Nursing and Health Professions Staff population, was negatively skewed. There were two major negative themes that emerged within the qualitative data. The first being that Staff felt overworked and undervalued. Respondents offered the following:

- “I need my work environment to improved almost immediately or I will seek employment elsewhere. I work too hard and give too much of myself to be treated the way that I am treated here at USF...”
- “Overworked, and duties unclear.”
- “Poor relationship with supervisors, faculty and administration. Many feel undervalued, and personally hurt.”
- “In the course of my work as a staff member, there have been multiple instances where senior leadership has turned to other resources at the university for assistance with tasks that directly relate to my job. I am unsure if this is because the senior admin is not fully aware of the scope of my role, or because this person is intentionally seeking out other people to complete tasks that I would easily (and gladly perform).”
- “In addition, staff are often tasked with duties well above and beyond the scope of their roles, without accompanying resources or support, and yet our contributions and work are not valued or respected. This can, over time, start to feel abusive.”
- “I have been made to feel inferior by faculty members on many occasions, simply because I do not cater to their needs in the exact moment and in the exact manner as they demand. I feel as if it is a direct attack on my qualifications and my person, because I do not have the ‘Superior’ title and letters next to my name.”
- “The demand and sense of urgency has increased my level of anxiety while working within my department. I am expected to respond to every email within a few hours on the same day. I am made to feel like a machine that needs to produce results and answers on demand.”
- “In general, I feel overburdened and undervalued. Things are constantly being added to my workload, and I feel uncomfortable asking for help or resources. When I have asked

for help or to have something taken off my plate, I have been given the run-around or not provided with substantive, real assistance. Some employees seem to have tacit approval to say "no" or have their responsibilities reduced, while others do not. Also, the pattern seems to be that those who are successful in their work are simply given more to do, while those that do not produce as high a level of work are not held accountable, nor trained/supervised to improve, and then have some of their work given to the people who are 'trusted' - but clearly not valued - to do the work correctly."

- "Most of us do not know where we stand within the department. The climate changes daily. It is as if it is deliberately designed to keep everyone on their toes at all times. Eventually, this tactic wears off and becomes ineffective and morale plummets. Every task cannot be performed asap. Every email cannot be answered within 24 hours."

The second theme that emerged within the qualitative data, that was also supported in the quantitative results, was the School of Nursing and Health Professions Staff respondents' frustration with the climate in the workplace and on campus. Respondents offered the following comments:

- "Uncomfortable work environment with leadership as of lately."
- "There have been a number of instances in the last year when faculty and deans within the school have communicated with me (verbally and in writing) unprofessionally and in an uncivil and bullying manner..."
- "I feel like the administration can talk the talk about social justice, but not walk the walk. They cherry pick the issues that they support."
- "The freedom to discuss hot topics as a campus community is restricted. Administration doesn't want the university to rock the boat, which is funny because you can't claim to be a social justice institution that espouses Ignatian values if you want to play it safe."
- "No one feels safe in reporting."
- "Bias is more apparent on campus than in the community, and more disappointing to witness. Our mission and values should hold us to a higher standard."
- "I believe the concept and intent are present, but not always actualized fully. More genuine support and follow-up are needed for training, policy, and tangible solutions. There is a wide gap between upper administration and the work that happens at the mid and ground level. Not enough cross-communication exists, and there is a huge disconnect in terms of how we translate the mission and values."
- "USF speaks about the vision, mission, and values a lot, but there needs to be more effort put to not only diversity, but also ensuring the safety and emotional well-being of our students and staff of color. As a staff member, I also see the side of the University that pushes to make more and more money, and that I see as often clashes with our stated values and ethical obligations."

- “There needs to be more people of color in leadership positions: provost, president, deans. More faculty of color as well in all schools, especially SONHP. Honor the voices of the marginalized. I tend to see the same people chair the committees, etc. Look where you have not looked before.”
- “...We live in an academic environment where people should be allowed to express their ideas even if they're controversial. People need to learn about other cultures. There's a lot of talk about embracing diversity, but not necessarily steps to actualize it. Perhaps workshops on cultural competence could be a good starting point. People need to learn how to have civil dialogue even with those who have values and viewpoints so diametrically opposed to their own...”
- “Even though I have not witnessed this directly, many students of color have shared with me incidents of (primarily peer-based) bias and racism, from overt racism, to microaggressions, to just plain ignorance. We need to do more to show up for our students, to provide better anti-bias and anti-racism education, and better avenues of support and respect for students of color.”

Undergraduate Students

The overall perception of the campus climate within the qualitative comments from the School of Nursing and Health Professions Undergraduate population, was positive. Undergraduate students offered comments such as “I love everything at USF!” and “...USF really does all it can to foster a good climate. People hold doors for each other more, they accept differences, etc...” However, there were two major negative themes that emerged within the qualitative data. The first being that Undergraduate students are overwhelmed with financial issues, and many feel as though they are not getting their money’s worth. Respondents offered the following:

- “Financially unstable at the moment and worried about how to pay off the incredible amount of loans I have after I graduate. Financial aid helps but it is not enough because I completely support myself.”
- “I feel like for what I am paying and the amount of debt I'll be in, I'm not getting nearly enough in return. We are paying insane amounts of money and receiving ‘state school’ services. The nursing program seems very unorganized. Everything is last minute, including the hiring of teachers, creating a high stress environment and not great teaching services.”
- “I was scared of debt and I didn't like how I was using a large portion of my parents' money to go to school.”
- “Financial services staff unhelpful and unsupportive. No scholarship recommendations, no helpful information on assisting aid, only recommends private loans as the only option. A handful of my peers have experienced the same thing. Extremely discouraging.”

- “Everything is so expensive. We're paying so much but NOT getting the education we should be getting...”
- “For students who have financial difficulty, it'd help to have an FA representative on campus (Sacramento campus) to help us with financial planning with USF tuition.”
- “Affordable child care and more scholarship opportunities.”
- “Focus on the students struggling to pay tuition. The ones working multiple jobs over 40 hours a week to barely pay for tuition on top of loans. Stop giving students diplomas in exchange for years of debt and high interest rates.

The second theme that emerged within the qualitative data, was the School of Nursing and Health Professions Undergraduate student respondents' frustration with branch campus inclusion and access to services. Respondents offered the following comments:

- “As a branch campus student I pay as much tuition (or nearly as much) as students from other campus locations, including the Hilltop. Despite paying the same, I have never felt that the Sacramento location is included, valued, or a part of the USF campus as students from Hilltop nursing program are...”
- “...The Sacramento campus is very excluded from the San Francisco campus and I feel that we do not have as many resources as other students but still pay a fairly equal amount.”
- “...Students at the Sacramento branch are being treated unfairly. Faculty/Staff are making us feel like we do NOT have a VOICE. We DO NOT have anyone REALLY advocating for us and helping us throughout the program.”
- “Sacramento Campus does not have enough mentorship and support faculty academic advising. We also do not have clubs that can help students gain more experiences in their major. For students who have financial difficulty, it'd help to have an FA representative on campus to help us with financial planning with USF tuition.”
- “My campus does not offer any one to one person counseling nor financial aid services. These services will be really helpful because I know most of us have been struggling with those two service. It will improve our campus climate.”
- “I believe that the branch campus does not have all the resources available to them. USF sac needs counseling and a financial aid office. We also need better information when it comes to advising. We are told one thing and then things change. From the beginning students should be told how things will be ran so they can plan accordingly.”
- “Yes, my experiences on the Sacramento campus are different from the experiences on the other campuses. We do not receive the same amount of services they are receiving. We do not have any financial aid services, counseling, campus clubs nor other main events about nursing workshops.”
- “Being at the Sacramento campus, I think that it needs to have more resources available for students that the hilltop campus students have. I feel that there is a major lack of

support from the hilltop campus to the Sacramento campus and that needs to be addressed. Also, I think that the hilltop needs to better monitor the branch campuses to ensure uniformity in instruction.”

Graduate Students

The overall perception of the campus climate within the qualitative comments from the School of Nursing and Health Professions Graduate population, was negatively skewed. There was one major negative theme that emerged within the qualitative data. Graduate students were very disappointed with the quality of education they are receiving. Respondents offered the following:

- “Poor teaching; Poor professors; Too expensive.”
- “I did not feel like the quality of the school was what I was paying for.”
- “Some faculty are unqualified to teach and its sad how expensive the course is for someone so underqualified.”
- “Public Health program is not organized- doesn't seem like money is going anywhere. My UC public school education was better planned than this and at a fraction of the cost.”
- “Lack of resources on campus, incompetency of professors.”
- “...The professors do not value or consider the students time, money and effort we have devoted into our education the past five years nor do they seemingly care of our future and learning goals.”
- “I did not feel that the quality of the professors, course content, and resources reflected the high cost of what I am paying. Graduate school is supposed to be high caliber, and my first semester was far from that.”
- “The professors were not worth what I was paying. They were not receptive to feedback about how they could be better or more helpful. It felt hopeless.”
- “We are aware of how much money we pay for this program and the resources and services provided here are not up to par with the amount of money that we are being charged AND staff is spread WAY TOO THIN here making for a poor learning environment. More money needs to be allocated from the budget to support the Orange County Campus overall for all programs that reside here, AND more money needs to be allocated to nursing from the general fund to support the extreme growth that is expected from this campus. It is visible that there is a major gap and it is not reflecting well on USF.”
- “The OC branch campus lacks many resources and would greatly benefit from having additional support for students.”
- “We need more qualified teachers, in person tutors (for science and writing), computer/writing lab, library, study center with longer hours, teacher's aid.”

Conclusion

The primary purpose of this report was to assess the climate within the School of Nursing and Health Professions at USF, including how members felt about issues related to inclusion and work-life/school-life issues. At the very least, the results add empirical data to the current knowledge base and provide more information on the experiences and perceptions of the School of Nursing and Health Professions. However, a projected plan to develop strategic actions and a subsequent implementation plan are critical to improving the climate within the School of Nursing and Health Professions, and thus the overall campus climate.
