Executive Summary

BACKGROUND

USF contracted with Rankin & Associates Consulting (R&A) to conduct a campus-wide study entitled, “University of San Francisco Assessment of Climate for Learning, Living, and Working.” The purpose of the study was to develop a better understanding of the learning, living, and working environment on campus. In the Fall of 2017, data was gathered from reviews of relevant USF literature, campus focus groups, and a campus-wide survey addressing the experiences and perceptions of various constituent groups. The results were then summarized and presented via a final report, as well as at community forums during the Spring of 2018.

PURPOSE OF REPORT

The Office of Institutional Research and Analytics, within the Center for Institutional Planning and Effectiveness, was tasked with taking a deeper dive into the data, at a department level. This report summarizes the results of the raw data given to us by R&A, specific to the College of Arts and Sciences (CAS).

METHODOLOGY

R&A provided us with an Excel spreadsheet of the raw data, along with the data dictionary. That data was then brought into Tableau, analyzed, and used to create the charts and visualizations of the basic descriptive statistics in this report. Because of the small population sizes, the potential lack of significant meaning, and the input from the lead R&A analyst, it was decided that more extensive analysis of the individual departments/colleges would not be done at this time. Throughout the report, the data is shown by the College of Arts and Sciences respondent population versus the rest of the USF respondent population. Data was masked as well as possible for privacy purposes. Decisions were made on a table-by-table basis as to how the data would be displayed, but any total that was less than five, was changed to “<5” to mask the actual number. Due to privacy concerns, the demographics section of the report was treated the most sensitively. However, the remainder of the report left room for more transparency, and therefore totals and percentages were included more frequently. All of the College of Arts and Sciences qualitative comments were also pulled from the raw data, separated out by position, and analyzed. Themes within the qualitative comments emerged very clearly, and were grouped together and presented in a summarized form at the end of this report. Please be aware that all totals and data in this report are as of Fall 2017.

SAMPLE SIZE

In total, 1,982 members of the College of Arts and Sciences completed the survey. 1,297 (65%) were undergraduate students, 278 (14%) were graduate students, 152 (8%) were tenured or tenure-track faculty, 173 (9%) were adjunct or term faculty, and 82 (4%) were staff.

	Sample Total	Population Total	Response Rate
<i>Undergraduate Students</i>	1297	3885	33%
<i>Graduate Students</i>	278	995	28%
<i>Tenured/Tenure-Track Faculty</i>	152	206	74%
<i>Adjunct/Term Faculty</i>	173	416	42%
<i>Staff</i>	82	111	74%
Total	1982	5613	35%

**Population totals were the totals at the time the survey was administered (Fall 2017).*

HIGHLIGHTS

Demographics:

- 80% of respondents were students
- 66% of respondents were women
- 73% of respondents were heterosexual
- 78% of respondents were U.S. citizens
- 82% of respondents had no disability
- 34% of respondents had a Christian affiliation

Employees Only:

- 62% of Faculty respondents had worked at USF for more than five years
- 59% of Staff respondents had worked at USF for five years or less
- 70% of Faculty respondents had a Doctoral degree
- 50% of Staff respondents had a Master's degree or higher

Students Only:

- 58% of Undergraduate Student respondents reported working on or off campus
- 60% of Graduate Student respondents reported working on or off campus
- 57% of Undergraduate Student respondents experienced financial hardship while attending USF
- 52% of Graduate Student respondents experienced financial hardship while attending USF
- 51% of Undergraduate Student respondents reported living in campus housing
- 4% of Graduate Student respondents reported living in campus housing
- 28% of Undergraduate Student respondents and 67% of Graduate Student respondents did not participate in any clubs or organizations at USF

USF Climate Comfort: 77% of College of Arts and Sciences respondents communicated that they were “comfortable” or “very comfortable” with the climate at USF.

College of Arts and Sciences Workplace Climate Comfort: 72% of College of Arts and Sciences Employee respondents communicated that they were “comfortable” or “very comfortable” with the workplace climate.

College of Arts and Sciences Classroom Climate Comfort: 82% of Student and Faculty respondents communicated that they were “comfortable” or “very comfortable” with the classroom climate within the College of Arts and Sciences.

Experienced Exclusionary, Intimidating, Offensive, and/or Hostile Conduct: 19% of College of Arts and Sciences respondents stated that they personally experienced exclusionary, intimidating, offensive, and/or hostile conduct while at USF within the last year.

Reporting of Experienced Conduct: 77% of the College of Arts and Sciences respondents that stated that they personally experienced exclusionary, intimidating, offensive, and/or hostile conduct while at USF within the last year, did not report the conduct.

Observed Exclusionary, Intimidating, Offensive, and/or Hostile Conduct: 22% of College of Arts and Sciences respondents observed conduct directed toward a person or group of people on campus that they believed created an exclusionary (e.g., shunned, ignored), intimidating, offensive, and/or hostile (bullying, harassing) working or learning environment at USF within the past year.

Reporting of Observed Conduct: 91% of the College of Arts and Sciences respondents that observed conduct directed toward a person or group of people on campus that they believed created an exclusionary, intimidating, offensive, and/or hostile working or learning environment at USF within the past year, did not report the conduct.

Experienced Unwanted Sexual Contact/Conduct: Within the College of Arts and Sciences overall population, 12% of respondents experienced unwanted sexual contact/conduct. Of those 12% of College of Arts and Sciences respondents that experienced unwanted sexual contact/conduct, 60% experienced Unwanted Sexual Interaction.

Reporting of Unwanted Sexual Interaction: 88% of the College of Arts and Sciences respondents that experienced unwanted sexual interaction, did not report the conduct.

Students Only

Student Perception of Classroom Experience:

Strength: 72% of Undergraduate and Graduate College of Arts and Sciences student respondents “agreed” or “strongly agreed” with the statement “I have faculty whom I perceive as role models.”

Weakness: 38% of Undergraduate and Graduate College of Arts and Sciences student respondents “agreed” or “strongly agreed” with the statement “I think that faculty prejudice my ability based on their perception of my identity/background.”

Student Feeling of Value:

Strength: 84% of Undergraduate and Graduate College of Arts and Sciences student respondents “agreed” or “strongly agreed” with the statement “I feel valued by Faculty in the classroom.”

Student Academic Experience:

Strength: 88% of Undergraduate and Graduate College of Arts and Sciences student respondents “agreed” or “strongly agreed” with the statement, “I intend to graduate from USF.”

Weakness: 48% of Undergraduate and Graduate College of Arts and Sciences student respondents “agreed” or “strongly agreed” with the statement, “Few of my courses this year have been intellectually stimulating.”

Graduate Student Perception of Advising:

Strength: 82% of Graduate College of Arts and Sciences student respondents “agreed” or “strongly agreed” with the statement “My advisor/chair responds to my emails, calls, or voicemails in a prompt manner.”

Graduate Student Perception of Department/Program:

Strength: 89% of Graduate College of Arts and Sciences student respondents “agreed” or “strongly agreed” with the statement, “Department/program faculty members (other than my advisor) respond to my emails, calls, or voicemails in a prompt manner.”

Weakness: 16% of Graduate College of Arts and Sciences student respondents “disagreed” or “strongly disagreed” with the statement, “There are adequate opportunities for me to interact with other university faculty outside of my department.”

Considered Leaving USF:

- 39% of Undergraduate College of Arts and Sciences student respondents indicated that they had seriously considered leaving in the last year.
- 18% of Graduate College of Arts and Sciences Professions student respondents indicated that they had seriously considered leaving in the last year.

Faculty & Staff Only

Faculty Experience with Unfair Employment Practices:

Weakness: 28% of the College of Arts and Sciences Faculty respondents indicated experiencing unfair procedures or practices related to promotion, tenure, reappointment, or reclassification.

Faculty Perception of the Workplace:

Strength: 75% of College of Arts and Sciences Faculty respondents “agreed” or “strongly agreed” with the statement, “USF provides me with resources to pursue professional development.”

Weakness: 38% of College of Arts and Sciences Faculty respondents “disagreed” or “strongly disagreed” with the statement, “I have job security.”

Staff Perception of the Workplace:

Strength: 78% of College of Arts and Sciences Staff respondents “agreed” or “strongly agreed” with the statement, “I would recommend USF as a good place to work.”

Weaknesses: 60% of College of Arts and Sciences Staff respondents “disagreed” or “strongly disagreed” with the statement, “There are clear procedures on how I can advance at USF.”

Faculty Feeling of Value:

Strength: 86% of College of Arts and Sciences Faculty respondents “agreed” or “strongly agreed” with the statement, “I feel valued by students in the classroom.”

Weakness: 35% of College of Arts and Sciences Faculty respondents “disagreed” or “strongly disagreed” with the statement, “I feel valued by USF senior administrators.”

Staff Feeling of Value:

Strength: 88% of College of Arts and Sciences Staff respondents “agreed” or “strongly agreed” with the statement, “I feel valued by coworkers in my department.”

Weakness: 20% of College of Arts and Sciences Staff respondents “disagreed” or “strongly disagreed” with the statement, “Staff opinions are valued by USF faculty.”

Faculty Perception of the Performance Evaluation Process: 33% of College of Arts and Sciences Faculty respondents “disagreed” or “strongly disagreed” with the statement, “The performance evaluation process is clear.”

Staff Perception of the Performance Evaluation Process: 27% of College of Arts and Sciences Staff respondents “disagreed” or “strongly disagreed” with the statement, “The performance appraisal process is productive.”

Faculty Perception of Work-Life Balance: 37% of College of Arts and Sciences Faculty respondents “disagreed” or “strongly disagreed” with the statement “USF provides adequate resources to help me manage work-life balance (e.g., child care, wellness services, elder care, housing location assistance, transportation).”

Staff Perception of Work-Life Balance:

Strength: 61% of College of Arts and Sciences Staff respondents “agreed” or “strongly agreed” with the statement “My direct supervisor provides adequate support for me to manage work-life balance.”

Weakness: 44% of College of Arts and Sciences Staff respondents “agreed” or “strongly agreed” with the statement “I perform more work than colleagues with similar performance expectations.”

Staff Perception of Workload and Support:

Strength: 78% of College of Arts and Sciences Staff respondents “agreed” or “strongly agreed” with the statement “I am given a reasonable time frame to complete assigned responsibilities.”

Weakness: 55% of College of Arts and Sciences Staff respondents “agreed” or “strongly agreed” with the statement “There is a hierarchy within staff positions that allows some voices to be valued more than others.”

Faculty Perception of Salary and Benefits:

Strength: 58% of College of Arts and Sciences Faculty respondents “agreed” or “strongly agreed” with the statement “Health insurance benefits are competitive.”

Weakness: 26% of College of Arts and Sciences Faculty respondents “disagreed” or “strongly disagreed” with the statement “Salaries for adjunct professors are competitive.”

Staff Perception of Salary and Benefits:

Strength: 77% of College of Arts and Sciences Staff respondents “agreed” or “strongly agreed” with the statement, “Health insurance benefits are competitive.”

Weakness: 41% of College of Arts and Sciences Staff respondents “disagreed” or “strongly disagreed” with the statement, “Staff salaries are competitive.”

Considered Leaving USF:

- 47% of College of Arts and Sciences Professions Faculty respondents stated that they had seriously considered leaving USF in the past year.
- 65% of College of Arts and Sciences Staff respondents stated that they had seriously considered leaving USF in the past year.

Results*Demographics*

The demographic variables explored in the Campus Climate Survey were: position status, gender identity, racial identity, sexual identity, citizenship status, disability identity, religious affiliation, age range, caregiving responsibility, military service, length of employment (employees only), level of education (employees only), parents’ education level (students only), undergraduates’

year in college (students only), student employment (students only), financial hardship (students only), tuition payment type (students only), income dependency status (students only), student residency location (students only), student club participation (students only), and grade point average (students only).

Position Status Comparison:

The College of Arts and Sciences had a higher percentage of Undergraduate student respondents, compared to the USF Undergraduate respondent population. They also had a much lower percentage of Staff respondents compared to the USF Staff respondent population.

The above visual shows the CAS vs USF percentage totals by Student vs Employee Status, separated out by specific position. The bar lengths illustrate the percentage differences.

Gender Identity Comparison:

The College of Arts and Sciences had a lower percentage of women respondents for Students and Faculty and a higher percentage of women respondents for staff, relative to the corresponding USF respondent populations.

USF Demographics College of Arts and Sciences

Gender Identity Students, Faculty & Staff

		CAS	USF
Undergraduate	Woman	899	520
	Man	324	198
	Transpectrum	71	13

	Missing/Unknown		7

Gender Identity Students, Faculty & Staff

The above visual shows the CAS vs USF percentage totals by Gender Identity, separated out by position. The bar lengths illustrate the percentage differences.

Racial Identity Comparison:

The College of Arts and Sciences Undergraduate student respondent population had a lower percentage of Asian/Asian American/South Asian respondents compared to the USF Undergraduate student respondent populations. The College of Arts and Sciences Graduate student respondent population had a slightly lower percentage of Latin@/Chican@/Hispanic respondents when compared to the USF Graduate student respondent populations, but fell very much in line with the rest of the USF Graduate student respondent racial identity groups. The College of Arts and Sciences Faculty had lower percentages of Asian/Asian American/South Asian and Other People of Color respondents, and a higher percentage of White respondents, compared to the USF Faculty respondent populations. The College of Arts and Sciences had a lower percentage of Asian/Asian American/South Asian, Black/African American and Latin@/Chican@/Hispanic Staff respondents and a higher percentage of White and Multiracial respondents compared to the USF Staff respondent populations.

USF Demographics College of Arts and Sciences			
Racial Identity Students, Faculty & Staff			
		CAS	USF
Undergraduate	White	398	149
	Asian/Asian American/South Asian	280	307
	Latin@/Chican@/Hispanic	229	95
	Black/African American	59	28
	Multiracial	266	119
	Other Person of Color	54	29
	Missing/Unknown	11	8
Graduate	White	93	335
	Asian/Asian American/South Asian	77	177

	Other Person of Color	<5	19
	Missing/Unknown	<5	18

The above visual shows the CAS vs USF percentage totals by Racial Identity, separated out by position. The bar lengths illustrate the percentage differences.

Sexual Identity Comparison:

Sexual identity was broken into two major categories. Those who are heterosexual and those who are LGBQ (Lesbian, Gay, Bisexual, and Queer).

The College of Arts and Sciences had an increased percentage of Graduate heterosexual respondents and an increased number of LGBTQ Undergraduate, Faculty, and Staff respondents when compared to their corresponding USF Overall respondent populations.

USF Demographics College of Arts and Sciences			
Sexual Identity Students, Faculty & Staff			
		CAS	USF
Undergraduate	Heterosexual	911	617
	LGBQ	351	104
	Missing/Unknown	35	14

	U.S. Citizen-Naturalized	<5	89
	Not U.S. Citizen/Multiple Citizenships	<5	25
	Missing/Unknown	<5	<5

Citizenship Status Students, Faculty & Staff

The above visual shows the CAS vs USF percentage totals by Citizenship Status, separated out by position. The bar lengths illustrate the percentage differences.

Disability Identity Comparison:

The College of Arts and Sciences respondent disability percentages were slightly higher than that of the corresponding USF respondent populations with the exception of Graduate students.

USF Demographics College of Arts and Sciences

Disability Status Students, Faculty & Staff

		CAS	USF
Undergraduate	No Disability	1033	647
	Single Disability	186	50
	Multiple Disability	64	28
	Missing/Unknown	14	10
Graduate	No Disability	249	773
	Single Disability	15	87
	Multiple Disability	11	42
	Missing/Unknown	<5	5
Faculty	No Disability	285	247
	Single Disability	23	12
	Multiple Disability	10	<5
	Missing/Unknown	7	9
Staff	No Disability	68	541
	Single Disability	8	31
	Multiple Disability	6	11
	Missing/Unknown		8

Disability Status Students, Faculty & Staff

The above visual shows the CAS vs USF percentage totals by Disability Status, separated out by position. The bar lengths illustrate the percentage differences.

Of the 16% of College of Arts and Sciences respondents who reported having a disability, the most common were mental health/psychological condition (58%), learning difference/disability (26%), and chronic diagnosis or medical condition (14%). These were also the top three disabilities reported for the USF Overall respondent population.

Respondents' Conditions that Affect Learning, Working, Living Activities

College of Arts and Sciences

Disability Status Students, Faculty & Staff

	CAS		USF	
	n	%	n	%
No Disability	1635	82.5%	2208	88.2%
Single Disability	232	11.7%	180	7.2%
Multiple Disability	91	4.6%	84	3.4%
Missing/Unknown	24	1.2%	32	1.3%
Grand Total	1982	100.0%	2504	100.0%

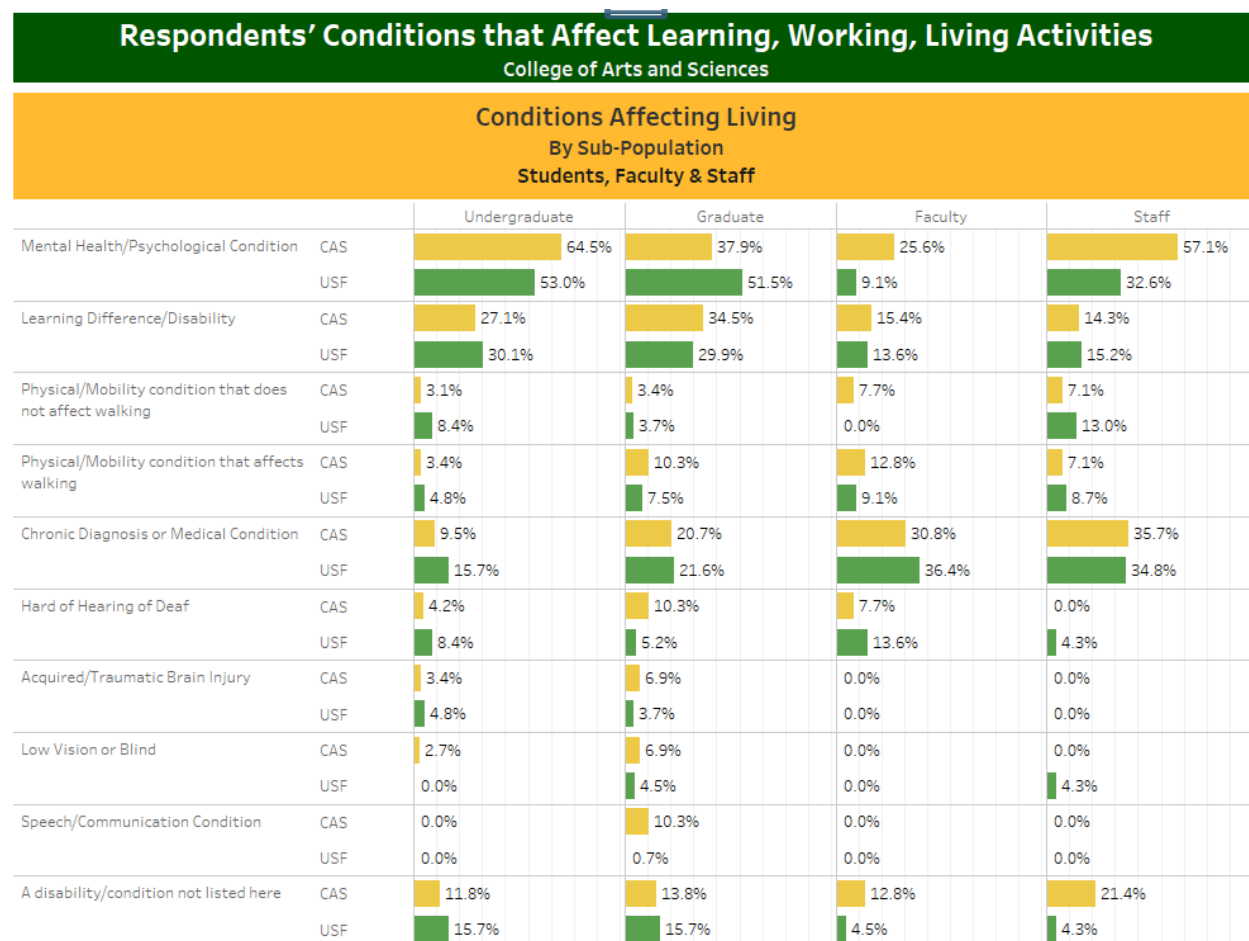

Conditions Affecting Living Students, Faculty & Staff

Condition	CAS	USF
Mental Health/Psychological Condition	57.6%	45.6%
Learning Difference/Disability	25.9%	26.3%
Chronic Diagnosis or Medical Condition	14.0%	23.2%
Physical/Mobility condition that does not affect walking	3.8%	6.3%
Physical/Mobility condition that affects walking	5.2%	7.0%
Hard of Hearing or Deaf	4.9%	6.7%
Acquired/Traumatic Brain Injury	3.2%	3.2%
Low Vision or Blind	2.6%	2.8%
Speech/Communication Condition	0.9%	0.4%
A disability/condition not listed here	12.5%	13.0%

Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

These top three conditions affecting living remained true for both Undergraduate and Graduate student respondents in the College of Arts and Sciences. The main difference when compared to the USF Student respondent population was that College of Arts and Sciences Undergraduate student respondents reported having a higher percentage of students with a mental health/psychological condition (65%) than that of the corresponding USF respondent populations (53%). College of Arts and Sciences Graduate student respondents reported having a higher percentage of students with a learning difference/disability (35%) than that of the corresponding USF respondent populations (30%). The results varied from the overall top conditions for both the Staff and Faculty respondent populations as well. For College of Arts and Sciences Faculty respondents, the top conditions affecting living were chronic diagnosis or medical condition (31%) and mental health/psychological condition (26%). The top conditions within the USF Faculty respondent population were chronic diagnosis or medical condition (36%), and learning difference/disability (14%). For College of Arts and Sciences Staff respondents, the conditions

affecting living were mental health/psychological condition (57%), and chronic diagnosis or medical condition (36%). The top conditions within the USF Staff respondent population were chronic diagnosis or medical condition (35%) and mental health/psychological condition (33%).

The above visual shows the CAS vs USF percentage totals by Conditions Affecting Living, separated out by position. The bar lengths illustrate the percentage differences.
Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

Disabled respondents were asked to identify any general barriers they encountered at USF. In the College of Arts and Sciences, classroom buildings (20%) and classroom/labs (20%) were the key barriers identified by respondents. The top general barrier faced by disabled USF Overall respondents was campus transportation/parking (27%).

Facilities Barriers Experienced by Respondents With Disabilities

Age Range Comparison:

The College of Arts and Sciences Undergraduate student respondent population had higher percentages of respondents in age categories 18-21, and lower percentages of respondents in age categories 22-44, compared to the USF Undergraduate student respondent population. The College of Arts and Sciences Graduate student respondent population had higher percentages of respondents in age categories 22-24, and lower percentages of respondents in age categories 25-

64, compared to the USF Graduate student respondent population. The College of Arts and Sciences Faculty respondents had higher percentages of respondents in age categories 25-54, and lower percentages of respondents in age categories 55-74, compared to the USF Faculty respondent population. The College of Arts and Sciences Staff respondents had lower percentages of respondents in age categories 20-24 and 35-44, and lower percentages of respondents in age categories 25-34 and 45-64, compared to the USF Staff respondent population.

Age Range

Students, Faculty & Staff

The above visual shows the CAS vs USF percentage totals by Age Range, separated out by position. The bar lengths illustrate the percentage differences.

Caregiving Responsibilities Comparison:

Students, Faculty and Staff were asked whether or not they had caregiving responsibilities, and then were asked to indicate what the responsibility was. A lower percentage of the College of Arts and Sciences Undergraduate and Graduate student and Staff respondents indicated having substantial caregiving responsibilities, compared to the USF Undergraduate and Graduate student and Staff respondent populations. A higher percentage of the College of Arts and Sciences Faculty respondents indicated having substantial caregiving responsibilities, compared to the USF Faculty and Staff respondent populations. Of the 11% of the College of Arts and Sciences respondents that indicated having substantial caregiving responsibilities, the top responsibilities were for children 6-18 years (54%), children 5 years or under (31%), and senior or other family member (23%). This was in line with that of the USF Overall respondent population, in which the top responsibilities reported were for children 6-18 years (52%), children 5 years or under (36%), and senior or other family member (25%).

The College of Arts and Sciences Undergraduate student respondent population had a lower percentage that reported having caregiving responsibilities for children 5 years or under, compared to the USF Undergraduate student respondent population. The College of Arts and Sciences Graduate student respondent population had a lower percentage responsible for children 6-18 years, and responsible for senior or other family member, compared to the USF Graduate student respondent population. The College of Arts and Sciences Faculty respondents had a lower percentage responsible for children over 18 years of age (but still legally dependent), and a higher percentage responsible for children under 18 years, compared to the USF Faculty respondent population. The College of Arts and Sciences Staff respondents had a lower percentage responsible for children under 18 years, and higher percentages responsible for senior or other family member and respondents responsible for sick or disabled partners, when compared to the USF Staff respondent population.

Student Population Only

Students were asked to indicate the highest level of education achieved by their parent(s)/guardian(s).

Parent/Guardian #1 Education Level Comparison:

The College of Arts and Sciences Undergraduate student respondents had a higher percentage that reported having a parent/guardian #1 with a Master's degree or higher, and a lower percentage with a Bachelor's degree, compared to the USF Undergraduate student respondents. The College of Arts and Sciences Graduate student respondents had a higher percentage of respondents that had a parent/guardian #1 with a Bachelor's or Master's degree, and a lower percentage with no high school, compared to the USF Graduate student respondents.

Second Parent's/Guardian's Highest Level of Education Undergraduate & Graduate Students

The above visual shows the CAS vs USF percentage totals by Second Parent's/Guardian's Highest Level of Education, separated out by position. The bar lengths illustrate the percentage differences.

Undergraduate Students were asked what year in college they were at the time the survey was administered.

Undergraduate Student Year in College Comparison:

The College of Arts and Sciences had a higher percentage of Undergraduate student respondents in their first, second, and fourth year, and a much lower percentage of respondents in their third year, compared to USF Undergraduate student respondent population.

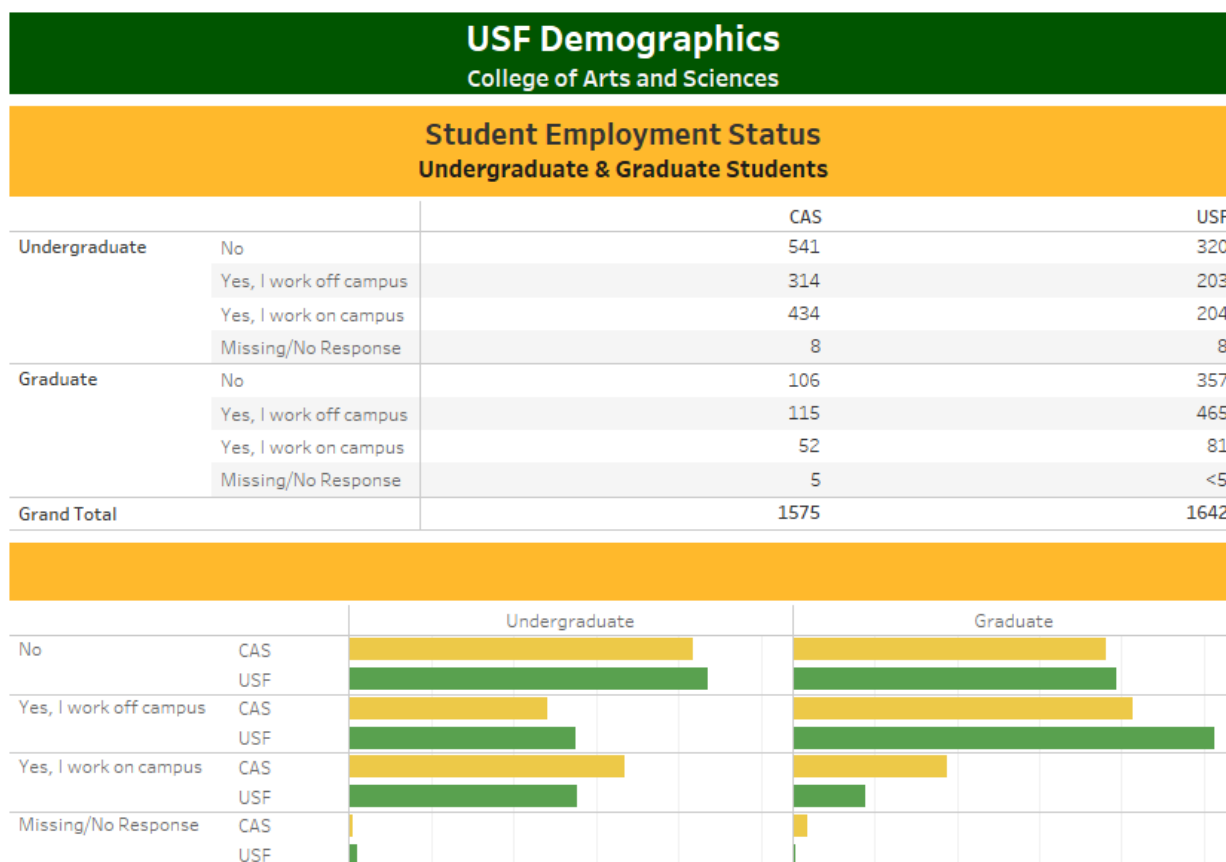

The above visual shows the CAS vs USF percentage totals by Year in College, for Undergraduate Students only. The bar lengths illustrate the percentage differences.

Students were asked whether they were employed either on campus or off campus during the academic year.

Student Employment Comparison:

Within the College of Arts and Sciences Undergraduate student respondent population, 58% indicated that they worked, compared to 55% of the USF Undergraduate student respondent's

population. Within the College of Arts and Sciences Graduate student respondent population, 60% indicated that they worked. Similarly, 60% of the USF Graduate student respondent population indicated that they worked.

The above visual shows the CAS vs USF percentage totals by Employment Status, separated out by position. The bar lengths illustrate the percentage differences.

Students were then asked to indicate the total number of hours they work per week on campus and off campus.

The College of Arts and Sciences Undergraduate student respondents had a lower percentage of respondents that worked on campus for 1-10 hours/week, and a higher percentage that worked 31-40 hours/week, compared to the USF Undergraduate student respondent population. The College of Arts and Sciences Graduate student respondents had a much higher percentage of respondents that worked on campus for 11-20 hours/week, and a much lower percentage that worked 21-30 hours/week, compared to the USF Graduate student respondent population. The College of Arts and Sciences Undergraduate student respondents had a much higher percentage that worked off campus for 11-20 hours/week, compared to the USF Undergraduate student respondent population. The College of Arts and Sciences Graduate student respondents had a higher percentage of students that worked off campus for between 11-40 hours/week and a lower

percentage who worked off campus for 1-10, and more than 40, hours/week, compared to the USF Graduate student respondent population.

USF Demographics College of Arts and Sciences

Of the students who were employed, the following indicates the amount of hours worked in a week.

On Campus Employment Hours Undergraduate & Graduate Students

		CAS	USF
Undergraduate	1-10 hours/week	174	84
	11-20 hours/week	190	87
	21-30 hours/week	49	22
	31-40 hours/week	8	<5
	More than 40 hours/week	<5	
Graduate	1-10 hours/week	23	36
	11-20 hours/week	23	24
	21-30 hours/week	<5	15
	31-40 hours/week	<5	<5
	More than 40 hours/week	<5	<5

The above visual shows the CAS vs USF percentage totals by On Campus Employment Hours, separated out by position. The bar lengths illustrate the percentage differences.

Off Campus Employment Hours Undergraduate & Graduate Students

		CAS	USF
Undergraduate	1-10 hours/week	112	72
	11-20 hours/week	169	85
	21-30 hours/week	70	40
	31-40 hours/week	27	20
	More than 40 hours/week	7	17
Graduate	1-10 hours/week	9	53
	11-20 hours/week	32	79
	21-30 hours/week	21	62
	31-40 hours/week	37	123
	More than 40 hours/week	20	144

The above visual shows the CAS vs USF percentage totals by Off Campus Employment Hours, separated out by position. The bar lengths illustrate the percentage differences.

Students were asked whether they experienced financial hardship while attending USF.

Student Financial Hardship Comparison:

Fifty-seven percent of the College of Arts and Sciences Undergraduate student respondents indicated that they experienced financial hardship, compared to the fifty-four percent of USF Undergraduate student respondents that experienced financial hardship. Fifty-two percent of the College of Arts and Sciences Graduate student respondents indicated that they experienced financial hardship, compared to the fifty-three percent of USF Graduate student respondents that experienced financial hardship.

Students were then asked how they experienced financial hardship. Of the 57% of the College of Arts and Sciences Undergraduate student respondents that indicated they experienced financial hardship, the top types of hardship were difficulty affording tuition (79%), difficulty purchasing books/course materials (62%) and difficulty in affording housing (53%). These were also the top three experienced financial hardships for the USF Undergraduate student respondent population. Of the 52% of the College of Arts and Sciences Graduate student respondents that indicated they experienced financial hardship, the top types of hardship were difficulty affording tuition (72%), difficulty in affording housing (62%) and difficulty in affording unpaid internships/research opportunities (42%). Of the 53% of USF Graduate student respondents that indicated they experienced financial hardship, the top types of hardship were difficulty affording tuition (70%), difficulty in affording housing (54%), and difficulty purchasing books/course materials (51%).

Students were asked how they were paying for their tuition at USF. Students could select multiple payment types. In the College of Arts and Sciences, the top payment type for Undergraduate student respondents was family contribution (66%). The top payment type for USF Undergraduate student respondents was family contribution (58%). The top tuition payment type for the College of Arts and Sciences Graduate student respondents was loans (52%). The top tuition payment type for the USF Graduate student respondent population was also loans (63%).

The above visual shows the CAS vs USF percentage totals by Tuition Payment Types, separated out by position. The bar lengths illustrate the percentage differences.

Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

Students were asked whether they received financial support from a family member or guardian to assist them with living/educational expenses.

Student Financial Support Comparison:

The College of Arts and Sciences Undergraduate student respondents had a higher percentage indicate that they received support for living/educational expenses from family/guardian (84%),

compared to the USF Undergraduate student respondent population (78%). The College of Arts and Sciences Graduate student respondents had a much higher percentage indicate that they received support for living/educational expenses from family/guardian (57%), compared to the USF Graduate student respondent population (38%).

Within the College of Arts and Sciences Undergraduate student respondent population that indicated receiving financial support from their family/guardian, 61% had annual incomes greater than or equal to \$70,000. In contrast, within the College of Arts and Sciences Undergraduate student respondent population that indicated receiving No financial support from their family/guardian, 23% had annual incomes greater than or equal to \$70,000. Within the USF Undergraduate student respondent population that indicated receiving financial support from their family/guardian, 70% had annual incomes greater than or equal to \$70,000. Of the USF Undergraduate student respondents that indicated receiving No financial support from their family/guardian, 33% had annual incomes greater than or equal to \$70,000.

Within the College of Arts and Sciences Graduate student respondent population that indicated receiving financial support from their family/guardian, 45% had annual incomes greater than or equal to \$70,000. Within the College of Arts and Sciences Graduate student respondent population that indicated receiving No financial support from their family/guardian, 29% had annual incomes greater than or equal to \$70,000. Within the USF Graduate student respondent population that indicated receiving financial support from their family/guardian, 51% had annual incomes greater than or equal to \$70,000. Of the USF Graduate student respondents that indicated receiving No financial support from their family/guardian, 40% had annual incomes greater than or equal to \$70,000.

Student Club Experience:

Students were asked if they were a member of, or have participated in, any of the following clubs/organizations since having been at USF. Twenty-eight percent of the College of Arts and Sciences Undergraduate student respondents and sixty-seven percent of the College of Arts and Sciences Graduate student respondents indicated that they did not participate in any clubs or organizations at USF. Thirty percent of USF Undergraduate student respondents and fifty-seven percent of USF Graduate student respondents indicated that they do not participate in any clubs or organizations at USF. Within the population of College of Arts and Sciences Undergraduate student respondents that indicated participating in a club or organization, the top one was cultural/multicultural/international organization (23%). The top selection for USF Undergraduate student respondents was academic/honorary organization (23%). Within the population of College of Arts and Sciences Graduate student respondents that indicated participating in a club or organization, the top one was departmental/cohort/program involvement (13%). The top selection for USF Graduate student respondents was professional organization (13%).

Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

The above visual shows the CAS vs USF percentage totals by Clubs/Organizations, separated out by position. The bar lengths illustrate the percentage differences.

Students were asked what their cumulative grade point average was after their last semester.

Student Self-Reported GPA Comparison:

The College of Arts and Sciences Undergraduate student respondents had a lower percentage of respondents indicating that they had a GPA greater than or equal to 3.25 (47%), when compared to the USF Undergraduate student respondents (60%). The College of Arts and Sciences Graduate student respondents also had a lower percentage of respondents indicate that they had a GPA greater than or equal to 3.25 (50%), when compared to the USF Graduate student respondents (43%).

Climate Results

The following section reviews the climate findings for the College of Arts and Sciences. The analysis explored the climate at USF through an examination of respondents' personal experiences, their general perceptions of campus climate, and their perceptions of institutional actions regarding climate on campus, including administrative policies and academic initiatives.

Comfort with Overall Campus Climate at USF:

Seventy-seven percent of the College of Arts and Sciences respondent population stated that they were either "comfortable" or "very comfortable" with the climate at USF. In comparison, seventy-seven percent of the USF Overall population also said they were either "comfortable" or "very comfortable" with the climate at USF.

Comfort with the Climate in the Department/Program or Work Unit:

Seventy-two percent of the College of Arts and Sciences Faculty and Staff respondent population stated that they were either "comfortable" or "very comfortable" with the climate in their department/program or work unit. In comparison, sixty-nine percent of the USF Faculty and Staff respondent population stated that they were either "comfortable" or "very comfortable" with the climate in their department/program or work unit.

Comfort with Climate in Department/Work Unit Faculty & Staff

The above visual shows the CAS vs USF percentage totals by Comfort with Climate in Department/Work Unit. The bar lengths illustrate the percentage differences.

Analyses was conducted to determine whether respondents' levels of comfort with the overall

climate, and the climate in their workplaces differed based on various demographic characteristics, such as position status, gender identity, racial identity, sexual identity, disability status, income level status (students only), and first-generation status (students only).

Comfort with Climate in Workplace by Position Status:

Sixty-nine percent of Faculty and eighty-two percent of Staff in the College of Arts and Sciences respondent population stated that they were either “comfortable” or “very comfortable” with the climate in their department/program or work unit. In comparison, sixty-six percent of Faculty and seventy percent of Staff in the USF Faculty and Staff respondent populations stated that they were either “comfortable” or “very comfortable” with the climate in their department/program or work unit.

Comfort with Climate in the Classroom by Position Status:

Eighty percent of the College of Arts and Sciences Undergraduate student respondents, eighty-four percent of the College of Arts and Sciences Graduate student respondents, and ninety percent of the College of Arts and Sciences Faculty respondents stated that they were either

“comfortable” or “very comfortable” with the climate in the classroom. In comparison, eighty percent of the USF Undergraduate student respondent population, eighty-four percent of the USF Graduate student respondent population, and eighty-two percent of the USF Faculty respondent population stated that they were either “comfortable” or “very comfortable” with the climate in the classroom.

Exclusionary, Intimidating, Offensive, and/or Hostile Conduct

Experienced Exclusionary, Intimidating, Offensive, and/or Hostile Conduct

Exclusionary (e.g., shunned, ignored), intimidating, offensive, and/or hostile (bullied, harassed) conduct that interfered with one's ability to work, learn, or live at USF within the past year, was examined. Within the College of Arts and Sciences population, 19% of Students, Faculty and Staff respondents stated that they personally experienced exclusionary, intimidating, offensive, and/or hostile conduct while at USF within the last year. Within the USF Overall population, 20% of Student, Faculty and Staff respondents stated that they personally experienced exclusionary, intimidating, offensive, and/or hostile conduct while at USF within the last year.

Conduct as a Result of Position Status

Of the 19% of the College of Arts and Sciences respondent population that experienced exclusionary, intimidating, offensive, and/or hostile conduct while at USF within the last year, 17% believed that this conduct was a result of their position status. Of the 20% of the USF Overall respondent population that experienced exclusionary, intimidating, offensive, and/or hostile conduct while at USF within the last year, 25% believed that this conduct was a result of their position status.

The above visual shows the CAS vs USF percentage totals by Employees' Source of Experienced Conduct. The bar lengths illustrate the percentage differences. Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

Location of Experienced Conduct

The respondents were also asked to identify the location of the experienced exclusionary, intimidating, offensive, and/or hostile conduct. The top location of reported conduct for the

College of Arts and Sciences respondents that experienced this conduct was In a Class/Lab (36%). The top location of reported conduct for the College of Arts and Sciences Undergraduate and Graduate student respondents that experienced this conduct was In a Class/Lab (42%). The top location of reported conduct for the College of Arts and Sciences Faculty respondents that experienced this conduct was In a Meeting with a Group of People (40%). The top location of reported conduct for the College of Arts and Sciences Staff population that experienced this conduct, was In a Meeting with a Group of People (60%). The top locations of reported conduct for the USF Overall respondent population that experienced this conduct, were In a Meeting with a Group of People (28%). The top location of reported conduct for the USF Undergraduate and Graduate student respondent population that experienced this conduct was in a Class/Lab (52%). The top location of reported conduct for the USF Faculty respondent population that experienced this conduct, was In a Meeting with a Group of People (43%). The top locations of reported conduct for the USF Staff respondent population that experienced this conduct, were While Working at a USF Job (46%).

Student Locations of Experienced Exclusionary, Intimidating, Offensive, and/or Hostile Conduct

College of Arts and Sciences

The above visual shows the CAS vs USF percentage totals by Location of Experienced Conduct. The bar lengths illustrate the percentage differences. Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

Faculty Locations of Experienced Exclusionary, Intimidating, Offensive, and/or Hostile Conduct

College of Arts and Sciences

The above visual shows the CAS vs USF percentage totals by Location of Experienced Conduct. The bar lengths illustrate the percentage differences. Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

Staff Locations of Experienced Exclusionary, Intimidating, Offensive, and/or Hostile Conduct

College of Arts and Sciences

The above visual shows the CAS vs USF percentage totals by Location of Experienced Conduct. The bar lengths illustrate the percentage differences.
 Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

Actions in Response to Experienced Conduct

The respondents were also asked what their action was in response to the experienced exclusionary, intimidating, offensive, and/or hostile conduct. Within the College of Arts and Sciences population that experienced this conduct, the top reactions to such conduct were that they Told a Friend (53%), they Avoided the Person/Venue (42%), and/or they Told a Family Member (36%). Similarly, within the USF Overall population that experienced this conduct, the

main reactions to such conduct were that they Told a Friend (45%), they Did Not Do Anything (38%), and/or they Avoided the Person/Venue (35%). In the College of Arts and Sciences, 23% of respondents that experienced this conduct, indicated that they Contacted a USF Resource as a course of action. Of these individuals, 36% indicated that they contacted a Faculty Member. In the USF Overall respondent population that experienced this conduct, 16% of respondents indicated that they Contacted a USF Resource as a course of action. Of these individuals, the top USF Resources contacted were a Faculty Member (41%), and a Senior Administrator (38%).

The above visual shows the CAS vs USF percentage totals by Characteristics for Observed Conduct. The bar lengths illustrate the percentage differences. Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

Form of Observed Conduct

Respondents were asked to identify what they believed to be the forms of the observed exclusionary, intimidating, offensive and/or hostile conduct. For the College of Arts and Sciences respondent population, the top forms of observed conduct were Derogatory Verbal Remarks (54%), the Person Being Ignored/Excluded (35%), and the Person Being Isolated or Left Out (34%). For the USF Overall respondent population, the top forms of observed conduct were the Person Being Ignored/Excluded (41%), Derogatory Verbal Remarks (38%), and the Person Isolated or Left Out (33%).

The above visual shows the CAS vs USF percentage totals by Form of Observed Conduct. The bar lengths illustrate the percentage differences.
Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

Target of Observed Conduct

Respondents were asked to identify who they believed to be the target of the observed exclusionary, intimidating, offensive and/or hostile conduct. For the College of Arts and Sciences respondent population, the top reported target of the observed conduct was a Student (70%). For the USF Overall respondent population, the top reported target of the observed conduct was also a Student (58%).

Targets of Observed Exclusionary, Intimidating, Offensive, and/or Hostile Conduct

College of Arts and Sciences

The above visual shows the CAS vs USF percentage totals by Target of Observed Conduct. The bar lengths illustrate the percentage differences.
Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

Source of Observed Conduct

Respondents were asked to identify the source of the observed exclusionary, intimidating, offensive and/or hostile conduct. For the College of Arts and Sciences respondent population, the top source of observed conduct was a Student (62%), and a Faculty Member/Other Instructional

Staff (21%). For the USF Overall respondent population, the top source of observed conduct was a Student (38%), and a Faculty Member/Other Instructional Staff (24%).

The above visual shows the CAS vs USF percentage totals by Source of Observed Conduct. The bar lengths illustrate the percentage differences.
Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

Location of Observed Conduct

Respondents were asked to identify the location of the observed exclusionary, intimidating, offensive and/or hostile conduct. The top location of observed conduct for the College of Arts and Sciences respondent population was in a Class/Lab (34%). The top location of observed conduct for the USF Overall respondent population was also in a Class/Lab (31%).

The above visual shows the CAS vs USF percentage totals by Location of Observed Conduct. The bar lengths illustrate the percentage differences.
Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

Action in Response to Observed Conduct

Respondents were asked to identify what their action was in response to the observed exclusionary, intimidating, offensive and/or hostile conduct. Within the College of Arts and Sciences respondent population, the top actions in response to the observed conduct were that they Told a Friend (38%), and that they Did Not Do Anything (34%). Twelve percent of the College of Arts and Sciences respondent population that took an action in response to the observed conduct, Contacted a USF Resource. Of those 12%, the top actions in response to the observed conduct were to contact a Faculty Member (43%) and Senior Administrator (36%). Within the USF Overall respondent population, the top actions in response to the observed

conduct were that they Did Not Do Anything (33%), or that they Told a Friend (31%). Of the USF Overall respondent population that took an action in response to the observed conduct, 14% Contacted a USF Resource. Of these 14%, the top USF resources contacted were a Senior Administrator (44%) and a Faculty Member (30%).

The most prevalent type of Unwanted Sexual Conduct, Unwanted Sexual Interaction, will be shown in further detail.

Unwanted Sexual Interaction by Undergraduate Year

Of the 12% of College of Arts and Sciences respondents that reported experiencing unwanted sexual contact/conduct, 71% reported experiencing Unwanted Sexual Interaction (e.g., cat-calling, repeated sexual advances, sexual harassment). Of those 71%, 87% were Undergraduate students. The charts below show the breakdown of when those College of Arts and Sciences Undergraduate student respondents experienced such conduct, compared to the USF Undergraduate student respondent population. The Fall Semester of the First Year had the highest number of experiences of Unwanted Sexual Interaction, for both the College of Arts and Sciences Undergraduate respondents, as well as for the USF Undergraduate respondents.

Emotional Reaction to Unwanted Sexual Interaction

Of the College of Arts and Sciences respondents that experienced Unwanted Sexual Interaction, the most common reaction was that they Felt Angry (57%). Of the USF Overall respondents that experienced Unwanted Sexual Interaction, the most common reaction was that they Felt Angry (59%).

The above visual shows the CAS vs USF percentage totals by Reaction to Unwanted Sexual Interaction. The bar lengths illustrate the percentage differences.
Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

Actions in Response to Unwanted Sexual Interaction

Of the College of Arts and Sciences respondents that experienced Unwanted Sexual Interaction, the top actions in response to such conduct were that they Told a Friend (58%) and Avoided the Person/Venue (49%). Nine percent of College of Arts and Sciences respondents that experienced such conduct, indicated that they Contacted a USF Resource. The top two USF resources contacted were Title IX Office/Coordinator (57%) and USF Counseling and Psychological Services (50%). Of the USF Overall respondents that experienced Unwanted Sexual Interaction, the top actions in response to such conduct were that they Avoided the Person/Venue (49%) and Told a Friend (48%). Thirteen percent of USF Overall respondents that experienced such conduct, indicated that they Contacted a USF Resource. The top two USF resources contacted were USF Public Safety (30%) and Senior Administrator (30%).

Knowledge of Sexual Misconduct:

In respect to sexual misconduct, respondents were asked their knowledge of unwanted sexual contact/conduct definitions, policies, and resources. The majority of College of Arts and Sciences respondents agreed to having a broad knowledge of definitions, policies, and resources

surrounding unwanted sexual conduct. However, twenty-one percent of respondents “disagreed” or “strongly disagreed” with the statement, “I know that information about the prevalence of sex offenses are available in the USF Annual Security and Fire Safety Report.” The majority of USF Overall respondents also agreed to having a broad knowledge of definitions, policies, and resources surrounding unwanted sexual conduct. However, similarly, twenty-one percent of USF Overall respondents “disagreed” or “strongly disagreed” with the statement, “I know that information about the prevalence of sex offenses are available in the USF Annual Security and Fire Safety Report”.

Perceived Environment

The final section of the report describes responses to survey items focused on the subgroup's perceptions of the USF environment. This section will be divided out by Students, Faculty and Staff.

Students Perceived Environment

Considered Leaving USF

The survey asked student respondents if they had ever seriously considered leaving USF, and if they had, they were then asked why. Thirty-nine percent of College of Arts and Sciences Undergraduate respondents, and eighteen percent of College of Arts and Sciences Graduate student respondents indicated that they had seriously considered leaving. In comparison, thirty-two percent of USF Overall Undergraduate student respondents, and twenty-three percent of USF Graduate student respondents indicated that they had seriously considered leaving.

The above visual shows the CAS vs USF percentage totals by Considered Leaving USF, separated out by position. The bar lengths illustrate the percentage differences.

Of the 39% of College of Arts and Sciences Undergraduate students that indicated they had seriously considered leaving USF, the top three reasons provided were Lack of Sense of Belonging (62%), Financial Reasons (44%), and Lack of Social Life at USF (52%). Of the 18% of College of Arts and Sciences Graduate student respondents that indicated they had seriously considered leaving USF, the top reason provided was Financial Reasons (45%). Of the 32% of USF Undergraduate student respondents that indicated they had seriously considered leaving

USF, the top reasons provided were a Lack of Social Life at USF (53%), and a Lack of Sense of Belonging (53%). Of the 23% of USF Graduate student respondents that indicated they had seriously considered leaving USF, the top reasons provided were A Reason Not Listed Above (45%), Financial Reasons (35%) and a Lack of Sense of Belonging (31%).

The above visual shows the CAS vs USF percentage totals by Gender Identity, separated out by position. The bar lengths illustrate the percentage differences.
Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

Perception of Campus Climate

The survey queried student respondents about their perception of the climate in the classroom. The perception of climate in the classroom of Undergraduate and Graduate student respondents within the College of Arts and Sciences, was generally positive. However, one area did leave room for improvement. Thirty-six percent of Undergraduate and Graduate student respondents in the College of Arts and Sciences “agreed” or “strongly agreed” with the statement “I think that faculty prejudice my ability based on their perception of my identity/background.” Within the USF Undergraduate and Graduate student respondent population, 38% of student respondents also “agreed” or “strongly agreed” with this statement.

Graduate Student Perceptions

Graduate students, specifically, were asked how they felt about their experience at USF. Regarding advising, there were no major areas of concern. College of Arts and Sciences Graduate students responded positively to questions regarding their advising at a higher rate than USF Graduate student respondents. Regarding how graduate students feel about their department/program, there were also no major areas of concern. College of Arts and Sciences Graduate students responded positively to questions related to their department/program at a higher rate than USF Graduate student respondents.

Academic Experience

Students were asked to indicate the extent to which they “agreed” with a number of statements regarding their academic experience at USF. Overall, Undergraduate and Graduate student respondents within the College of Arts and Sciences reported having a positive academic experience. However, there was one area with a high percentage of negativity. Forty-eight percent of College of Arts and Sciences student respondents “agreed” or “strongly agreed” with the statement, “Few of my courses this year have been intellectually stimulating.” Similarly, Forty-eight percent of USF Undergraduate and Graduate student respondents “agreed” or “strongly agreed” with this statement.

Institutional Initiatives

Students were also asked about their perception of a number of institutional initiatives. Within the College of Arts and Sciences population, of the Undergraduate and Graduate students that answered the question believing the initiative was currently available, the majority reported that the initiative positively influences climate. Similarly, of the Undergraduate and Graduate students that answered the question believing that the initiative was not currently available, the majority reported that the initiative would positively influence climate. This was in line with the results from the USF Student respondent population.

Student Respondents' Perceptions of Institutional Initiatives

Based on your knowledge of the availability of the following institutional initiatives, please indicate how each influences or would influence the climate at USF.

College of Arts and Sciences

The left column shows the respondents thoughts on how various initiatives influenced the climate at USF, if they were believed to be currently available. The right column shows the respondents thoughts on how initiatives would influence the climate if they were not currently available, and made available in the future.

Faculty and Staff Perceived Environment

Considered Leaving USF

The survey asked respondents if they had ever seriously considered leaving USF, and if they had, they were then asked why. Within the College of Arts and Sciences, 47% of Faculty respondents, and 65% of Staff respondents stated that they had seriously considered leaving USF in the past year. Within the USF Overall population, 47% of Faculty respondents, and 58% of Staff respondents stated that they had seriously considered leaving USF in the past year.

The above visual shows the CAS vs USF percentage totals by Considered Leaving USF, separated out by position. The bar lengths illustrate the percentage differences.

Of the 47% of the College of Arts and Sciences Faculty respondents that indicated they had seriously considered leaving USF, the top three reasons provided were Cost of Living in the Bay Area (49%), Limited Opportunities for Advancement (40%), Low Salary/Pay Rate (36%). The top reasons provided by USF Faculty respondents were A Reason Not Listed Above (39%), Increased Workload (35%), and Campus Climate was Unwelcoming (31%). Of the 65% of the College of Arts and Sciences Staff respondents that indicated they had seriously considered leaving USF, the top three reasons provided were Cost of Living in the Bay Area (60%), Limited Opportunities for Advancement (51%), Low Salary/Pay Rate (38%). The top reasons provided by USF Staff respondents were also Limited Opportunities for Advancement (54%), Low Salary/Pay Rate (42%), and Cost of Living in the Bay Area (40%).

Considerations for Leaving Faculty & Staff

The above visual shows the CAS vs USF percentage totals by Considerations for Leaving, separated out by position. The bar lengths illustrate the percentage differences. Note: Survey respondents were able to mark more than one field, therefore the total is greater than 100%.

Unfair Employment Practices

Employee (Faculty and Staff) respondents were asked a series of questions on their experiences with unfair employment practices at USF. There were two areas with room for improvement.

- 28% of the College of Arts and Sciences Faculty respondents, and 18% of the College of Arts and Sciences Staff respondents indicated experiencing unfair procedures or practices related to promotion, tenure, reappointment, or reclassification. Within the USF Overall populations, 19% of USF Faculty respondents, and 2% of USF Staff respondents indicated experiencing unfair procedures or practices related to promotion, tenure, reappointment, or reclassification.

- 22% of the College of Arts and Sciences Faculty respondents, and 16% of the College of Arts and Sciences Staff respondents indicated experiencing unfair hiring practices. Within the USF Overall populations, 27% of USF Faculty respondents, and 26% of USF Staff respondents indicated experiencing unfair hiring practices.

Faculty Perceived Environment

Overall Workplace

The survey queried respondents about their perception of the workplace climate. The College of Arts and Sciences Faculty respondents' perceptions about the workplace climate were generally positive. However, there were a couple areas that leave room for improvement.

- 37% of the College of Arts and Sciences Faculty respondents “disagreed” or “strongly disagreed” with the statement, “I have job security.” Twenty-nine percent of the USF Faculty respondents “disagreed” or “strongly disagreed” with the statement.

- 33% of the College of Arts and Sciences Faculty respondents “disagreed” or “strongly disagreed” with the statement, “The performance evaluation process is clear.” Thirty-two percent of the USF Faculty respondents “disagreed” or “strongly disagreed” with the statement.
- 21% of the College of Arts and Sciences Faculty respondents “disagreed” or “strongly disagreed” with the statement, “I Feel Positive about my Career Opportunities at USF.” Seventeen percent of the USF Faculty respondents “disagreed” or “strongly disagreed” with the statement.
- 20% of the College of Arts and Sciences Faculty respondents “disagreed” or “strongly disagreed” with the statement, “I believe that USF encourages free and open discussion of difficult topics.” Twenty-three percent of the College of Arts and Sciences Faculty respondents “disagreed” or “strongly disagreed” with the statement.

Perception of Institutional Initiatives

Faculty were also asked about their perception of a number of institutional initiatives. Within the College of Arts and Sciences respondent population, of the faculty that answered the question believing the initiative was currently available, the majority reported that the initiative positively influences climate. Similarly, of the faculty that answered the question believing that the initiative was not currently available, the majority reported that the initiative would positively influence climate.

Faculty Respondents' Perceptions of Institutional Initiatives

Based on your knowledge of the availability of the following institutional initiatives, please indicate how each influences or would influence the climate at USF.
College of Arts and Sciences

The left column shows the respondents thoughts on how various initiatives influenced the climate at USF, if they were believed to be currently available. The right column shows the respondents thoughts on how initiatives would influence the climate if they were not currently available, and made available in the future.

Tenured, Tenure-Track, and Non-Tenure-Track Faculty were also asked a subset of questions regarding the workplace and their feelings of value.

Tenured and Tenure-Track Perceived Environment

Within the College of Arts and Sciences Tenured and Tenure-Track Faculty population, there were a number of areas with room for improvement.

- 57% of Tenured and Tenure-Track Faculty respondents in the College of Arts and Sciences “agreed” or “strongly agreed” with the statement, “As a faculty member at USF, I feel (or felt) burdened by service responsibilities beyond those of my colleagues with

similar performance expectations.” Within the USF Tenured and Tenure-Track Faculty respondents, 51% “agreed” or “strongly agreed” with the statement.

- 55% of Tenured and Tenure-Track Faculty respondents in the College of Arts and Sciences “disagreed” or “strongly disagreed” with the statement, “As a faculty member at USF, I feel (or felt) faculty opinions are taken seriously by senior administration.” Within the USF Tenured and Tenure-Track Faculty respondents, 42% “disagreed” or “strongly disagreed” with the statement.
- 53% of Tenured and Tenure-Track Faculty respondents in the College of Arts and Sciences “agreed” or “strongly agreed” with the statement, “As a faculty member at USF, I feel (or felt) I perform more work to help students than do my colleagues.” Within the USF Tenured and Tenure-Track Faculty respondents, 53% “agreed” or “strongly agreed” with the statement.
- 30% of Tenured and Tenure-Track Faculty respondents in the College of Arts and Sciences “disagreed” or “strongly disagreed” with the statement, “As a faculty member at USF, I feel (or felt) faculty opinions are valued within USF committees.” Within the USF Tenured and Tenure-Track Faculty respondents, 26% “disagreed” or “strongly disagreed” with the statement.
- 24% of Tenured and Tenure-Track Faculty respondents in the College of Arts and Sciences “disagreed” or “strongly disagreed” with the statement, “As a faculty member at USF, I feel (or felt) USF policies for delay of the tenure-clock are used by all faculty.” Within the USF Tenured and Tenure-Track Faculty respondents, 24% “disagreed” or “strongly disagreed” with the statement.
- 26% of Tenured and Tenure-Track Faculty respondents in the College of Arts and Sciences “agreed” or “strongly agreed” with the statement, “I would like more opportunities to participate in substantive committee assignments.” Only 14% of the USF Tenured and Tenure-Track Faculty respondents “agreed” or “strongly agreed” with the statement.

Staff Perceived Environment

Workplace Perceptions & Feelings of Value

The survey queried respondents about their perception of the workplace and feelings of value. The College of Arts and Sciences Staff respondents' perceptions about both, were slightly negative, indicating quite a few areas with room for improvement.

Workplace areas for improvement:

- 60% of Staff respondents in the College of Arts and Sciences “disagreed” or “strongly disagreed” with the statement, “As a staff member at USF, I feel there are clear procedures on how I can advance at USF.” Within the USF Staff respondents, 46% “disagreed” or “strongly disagreed” with the statement.
- 32% of Staff respondents in the College of Arts and Sciences “disagreed” or “strongly disagreed” with the statement, “As a staff member at USF, I feel staff opinions are valued by USF administration.” Within the USF Staff respondents, 28% “disagreed” or “strongly disagreed” with the statement.
- 32% of Staff respondents in the College of Arts and Sciences “disagreed” or “strongly disagreed” with the statement, “As a staff member at USF, I feel positive about my career opportunities at USF.” Within the USF Staff respondents, 27% “disagreed” or “strongly disagreed” with the statement.
- 30% of Staff respondents in the College of Arts and Sciences “disagreed” or “strongly disagreed” with the statement, “As a staff member at USF, I feel staff opinions are valued by USF Faculty.” Within the USF Staff respondents, 35% “disagreed” or “strongly disagreed” with the statement.
- 27% of Staff respondents in the College of Arts and Sciences “disagreed” or “strongly disagreed” with the statement, “As a staff member at USF, I feel the performance appraisal process is productive.” Within the USF Staff respondents, 37% “disagreed” or “strongly disagreed” with the statement.
- 26% of Staff respondents in the College of Arts and Sciences “disagreed” or “strongly disagreed” with the statement, “As a staff member at USF, I feel Staff opinions are valued on USF committees.” Within the USF Staff respondents, 21% “disagreed” or “strongly disagreed” with the statement.
- 21% of Staff respondents in the College of Arts and Sciences “agreed” or “strongly agreed” with the statement, “As a staff member at USF, I feel that faculty prejudice my abilities based on their perception of my identity/background.” Within the USF Staff respondents, 21% “agreed” or “strongly agreed” with the statement.
- 21% of Staff respondents in the College of Arts and Sciences “disagreed” or “strongly disagreed” with the statement, “As a staff member at USF, I feel my direct supervisor provides me with job/career advice or guidance when I need it.” Within the USF Staff respondent population, 18% “disagreed” or “strongly disagreed” with the statement.

Perception of Institutional Initiatives

Staff were also asked about their perception of a number of institutional initiatives. Within the College of Arts and Sciences population, of the staff that answered the question believing the initiative was currently available, the majority reported that the initiative positively influences climate. Similarly, of the staff that answered the question believing that the initiative was not currently available, the majority reported that the initiative would positively influence climate.

Staff Respondents' Perception of Institutional Initiatives

Based on your knowledge of the availability of the following institutional initiatives, please indicate how each influences or would influence the climate at USF.

College of Arts and Sciences

The left column shows the respondents thoughts on how various initiatives influenced the climate at USF, if they were believed to be currently available. The right column shows the respondents thoughts on how initiatives would influence the climate if they were not currently available, and made available in the future.

Qualitative Response Analysis

Undergraduate

The overall perception of the campus climate within the qualitative comments from the College of Arts and Sciences Undergraduate population, was negatively skewed. However, there were a number of positive comments, such as the following:

- “I was in an abusive and unhealthy relationship and I thought the only way to keep the relationship was for me to leave and go back home. I got very close with my casa advisor and she helped me get more involved to feel at home. I just didn't feel present at USF and I wanted to get more involved, but I didn't know how to. My Casa person helped me feel welcomed here.”
- “The intercultural center host to activities and clubs that make USF a great place to live and learn in, including: The Lyricist Lounge, The Queer Alliance, The Black Student union, and many more!!! I appreciate these services.”
- “Overall, The University OF San Francisco provides a comfortable atmosphere in providing a safe, attentive environment for the students' college experiences and academic learning.”
- “USF SDS has a really wonderful team that works hard to accommodate all of the requests from students with disabilities.”
- “USF climate effectively cultivates a culture rooted in the Jesuit values by trying to include everyone in every activity that is offered here at USF.”
- “USF is highly inclusive and understanding of all its citizens in spreading knowledge and emphasizing social justice which is the pure Jesuit values that are held here. Our school is a perfect example of this and the community is amazing.”
- “The Cultural Centers on the fourth floor of the University Center is everything the school claims to be. The Cultural Centers are diverse, welcoming, sensitive, and hardworking. That is the place where I found my community. The fourth floor in general is so amazing and is where so many students come to participate and feel welcomed. People become involved and build community and create relationships. Everything good about this university I have found on the fourth floor...”
- “USF has provided me with the ideal college environment for myself. I feel connected to my professors, able to consistently better myself, and be in a safe/inclusive environment.”

There were three major themes that emerged from the data. The first, and most prominent theme, was the College of Arts and Sciences Undergraduate Student respondents' issues with diversity, inclusion, and representation at USF. Respondents offered the following:

- “not enough support for an English learner and transfer student.”
- “Racist, sexist comments in classes. Your creed is absolute nonsense.”
- “As a DACA/ Dreamer it is very important right now for me to feel welcomed by the university I attend, especially if I live on campus at 400 miles away from my home. The

fact that USF lacks financial support for undocumented students is very depressing and gives undocumented students the sense that the university does not worry about us. I believe in USF's Jesuit mission, but I don't see it being applied to help the minority (undocumented students). This really caused me to have financial strains I still currently face, the possibility that due to lack of financial support, I may not be able to continue attending USF breaks my heart.”

- “I never in my life have felt so isolated! I saw two black people a day and was the only black student in multiple of my classes. Before coming to USF make it seem like it was the most diverse place on Earth but that was far from the truth...”
- “I really didn't feel like I was represented in every aspect of the university. Whether that was the professors, students, or even jut the availability of communities that made me feel welcomed as a minority.”
- “This campus has a strong clique based culture, leading to an "outcast" class of students. Since beginning my second year I've found my way out of this situation; however, in my first year I often found myself around people who would discriminate against me without reason.”
- “While USF sounded like it would be a dream school in terms of diversity and inclusion, the institution itself was severely disappointing in terms of fair accommodation, campus climate, and other fields previously mentioned. I'm black, trans, queer, and mentally ill. Those identities isolate me from the “average” student that makes up the USF population.”
- “...My roommates were generally transphobic (misgendering me, not open to the idea of nonbinary genders in a very toxic way) and then my next roommate was racist (used the N word frequently as a non-black person, said fairly Islamophobic things) ...”
- “The school does not represent me the way I would want it to. We speak a lot about diversity but lack action. When we demand change from the administration we get denied or silenced.”
- “My first year at USF I was not aware of the programs that were offered for first generation students. I made my decision late to come to USF and I was not aware of MSP. I honestly feel that MSP is the only program that is offered to first generation students...” (3198)
- As a First Generation College student from a Latino background I didn't feel like USF was where I should be and where I would greatly benefit to impact my community in a positive way.”
- “As a queer woman, I didn't see people like myself heavily represented on campus. When I did find the cultural centers (the reason I ultimately ended up staying), their budget was seemingly small which made me feel that the administration did not value me as more than a statistic they could put on an admissions catalogue.”
- “Coming in as a freshman I did not see many people of color in my classes and at times I found that I was the only Latin@ in particular classes. Not only was there few people of color, but there was even less faculty of color. The few times I have encountered faculty of color was if I took a culturally-related class, or if they were the custodians/maintenance staff. This was a complete culture shock, and it wasn't until I joined a culturally focused club that I began to find a sense community on campus.”
- “USF isn't always a welcoming space for Black students. I was always the only Black person in my class, despite the myth that we are super diverse. I faced microaggressions

on the daily from teammates, classmates, and professors. It was hard to balance being a student while having to educate others on my Blackness.”

- “As a Latina, I do not feel as if this campus is diverse enough. When walking into my classes, I hardly notice any Hispanics or people of color in these classes and I personally am not happy with this.”
- “...Currently I'm dealing with a teacher who called an African American comedian nappy in class. After working with different advisors the only solution they have finally is for me to just go teach him myself why this is inappropriate. I barely have time dealing with incompetent teachers already- now I'm expected to teach them what is ok and what is not ok to say about black people...”
- “a classmate expressed racist views and biases in class.”
- “A student union discussed how my "blackness" was not black enough and that I should not identify.”
- “Especially in an all-girls dorm last year, being transgender was just a big struggle for me. People treat you weird/ignore you/don't know how to deal with you, or stare at you, are passive aggressive/mean in subtle ways. Definitely felt singled out and wish I had known that gender-inclusive living was an option for me. I had no sense of community or friendship at USF last year.”
- “While at a BSU meeting, Father Fitz came to talk with us about our demands and although he is a sweet man when one of my friends were done explaining her outrage about the Phelan name he called her "articulate" and said, "he was so proud of her." Which left many of us confused because why wouldn't she be. Also at lyricist lounge, another student had a poem attacking the BLM movement and targeting black people for our actions against police brutality.”
- “A lot of microaggressions in classrooms. insensitive language (stereotypes and assumptions)”
- “A teacher taught a class assuming a white male perspective and made the course answers to exams and papers based upon their assumptions and values of society without regard to the population of the class, (men and women of color specifically).”
- “It was not so much of a confrontational or violent occurrence, it was one of those sad typical college experiences of a black student at a PWI [predominantly white institution], where there are assumptions, stereotypes, looks, and comments from peers and even faculty and staff sometimes. I think it got worse after the conflict with Public Safety where they said there was the two black suspects in jackets, that seemed to increase looks and discomfort on campus.”
- “There have been some racial comments made about me to friends of mine.”
- “No, this always happens because I am the token black child of every class since there are barely any black people that go to school here. I am guaranteed you will get similar responses just like mine from black people who, once again, either feel like the token black child or is being discredited of oppression because a majority of their classes are filled with whites who believe as though racism is over.”
- “The first was in my room with roommate during my first year. My roommate was trying to imply to me (I am black) that I should try and understand why the KKK do what they do. It infuriated me so much, that I went off on him. I was uncomfortable rooming with him for the rest of year thereafter...”

- “I was misgendered repeatedly by a professor. After the first time, I approached the professor after class and I thought he had listened. He misgendered me again, and I corrected him privately a second time, and he did not seem to listen to me at all. The third time he did it, I corrected him in front of the class, and he did not acknowledge what I had just said at all. After this, I stopped speaking in class to avoid being misgendered, even if that meant negatively affecting my grade.”
- “I’ve had many negative comments and microaggressions said against me. For example, one student had alluded that I was a janitor because of my Mexican heritage. Another time, I was wearing a jersey that had the name "Cespedes" on it and somebody came up to me and yelled "aye si se puede." Another time, a student really tried to tell me that my experiences in my life were invalid and that racism and discrimination did not exist.”
- “I can’t even begin to write a list of the microaggressions I’ve experienced but I’ll list a few. I was in class one day where a White/Asian male student gave a speech on "how to be gangster" and joked about police brutality against Black men. He made a comedy of people's lived experiences and everybody in the class laughed except me, including the professor. My White teammates always ask to touch my hair, ask me if I shower since I don't wash my hair everyday, ask me to teach them how to dance, etc.”
- “Basically made fun of who I assume was an international student because they were having difficulty understanding the amount of change given to them, once they left the person next said ‘Man we need those types of people out of here’...”
- “Person was pressured to change their name to a "less ethnic" name.”
- “At Lyricist Lounge, someone had invalidated the experiences and struggles of people of color by saying things such as "Slavery is over, get over it. My family never owned slaves. You shouldn't be whining about things now." Or something along those lines.”
- “As student of color we get treated as a token person on campus but little effort is done high up in the administrative level to support us on campus.”
- “Immigrants not being let into a party, build the wall chanting.”
- “Racist images in the restrooms including hanging a Black man.”
- “For one of my philosophy classes, the question was "what do people associate China with"? And one of the bullet points was "Beautiful Asian Women" with a picture of an Asian woman holding a Chinese umbrella.”
- “A professor singled out a student in class based on his religion, outed him as Muslim, and expected him to be the spokesperson for Islam. This professor also creates a sexist classroom environment, frequently prioritizing the views of males and ignoring sexist themes in text we are to analyze.”
- “professor in the math department made more than one disparaging ethnicity based jokes at the expense of students of non-white ethnicities”
- “I found a great deal of racist, misogynistic, and homophobic graffiti/doodling on campus. These messages appeared on buildings and sidewalks. In particular, I found a lot scribbled on the walls of the carrels in Gleeson library...”
- “I feel like overall I’ve witnessed Asians, people of color, certain majors, women, specifically people of certain religions, and people with different sexual orientations targeted.”
- “I notice that caf workers are often mistreated for their English proficiency. I also notice mistreatment towards elderly members of Fromm Institute.”

- “A friend of mine is disabled and uses a wheelchair as he has cerebral palsy, and he was faced with really awful treatment by USF staff when he tried to get on campus housing. The administration attempted to place him in Lone Mountain, which was really unreasonable and inconsiderate of his needs.”
- “I have seen Public Safety essentially stalk various people of color who look of "low socioeconomic status" despite them doing nothing wrong. I also had friends of color who frequently had run-ins and got pulled over by Public Safety because essentially they were racially profiled. It seems as though Public Safety are more concerned with black students and community members than those of any race who are engaging in illegal activity.”
- “A white male student repeatedly interrupted, talked over, and challenged a professor over the course of a semester-long class. The professor was young, first-year professor, woman of color and a religious minority. After discussing the incident with other USF faculty (an older white male professor), he said he knew the student well and that this type of verbal aggression was not his experience with the student.”
- “Because I am black and I still feel that the fact of that makes a difference. I am also gay and from a low-income family. I would love to see more faces on campus that look like me!”
- “...USF loves to pat itself on the back for being diverse and inclusive but talk to any student of the ethnicities: Pacific Islander, African and African-American, Indigenous, Arab, mixed-race. You'll find that their voices are not being heard.”
- “There is no support for students of color within the STEM field. The lack of diversity in professors and advisors even makes it even harder to pursue this field and feel able to do so when you have no one to look up to and represent you.”

Ideas offered by respondents for improving in this area:

- “All staff, faculty members, and students should be required to go through sensitivity and inclusiveness training, as well as training for how not to be a bystander (upstander/advocacy training).”
- “There needs to be more requirements for students beyond a Critical Diversity core class and basic training on sexual assault resources the first year of school. Students we are not in specific critical studies and humanities departments do not get enough exposure about the discrimination apparent in US society or ready to enter a diverse workforce. They simply learn their subject matter.”
- “USF does a fair enough job. As a white, female student, I feel safe and welcome on campus. I have no hesitation on campus as to if I am represented and my opinion is heard. However, other students of minority do not feel the same. I have several friends that identify as being part of a minority group. These friends have often told me how they do not feel welcome, included, represented, or respected on campus. They often feel like their voices are not heard. USF could be more inclusive, and respect the multiple voices of students. Also, listen to what students and student organizations are asking and telling to the university. They have ideas on how to better the university for most if not all students. These ideas are by students, for students, so actually take them into consideration.”

- “You can't actually force people to want to be genuinely inclusive and open-minded. Just make sure counseling and psychological services is well-paid because I'm gonna be coming a lot.”
- “Give The Cultural Centers a bigger budget. They have so much potential to reach a larger amount of students. Students come in every day looking to build community and we cannot reach as many people as we can due to lack of money. Our marketing could be so much better and if we could reach larger amounts of people then our climate could be more empathetic and healthy.”
- “As mentioned, I encourage staff, faculty, and higher administrators to attend student-run events. I also encourage them to invite students into appropriate spaces to hear more on how they can improve the experiences on all levels. Dialogue is the best way to start, and getting to know each other is the easiest way to improve our climate.”
- “Conduct focus groups, don't tokenize students of color but instead listen to them and the stories they have to share.”
- “Cultural competency for everyone (students, faculty, staff, administration)”
- “PLEASE require admin and all students (in addition to faculty) to take diversity training classes.”
- “Give support to clubs and organizations that foster cultural development the same way that sports are supported.”
- “Improve on access for individuals with disabilities. Continue to provide students, faculty, and staff with information on race and ethnicity and how that can affect the classroom. Provide more transgender bathrooms on campus for those that need them. Continue to support students of color at USF and those wishing to attend the university. Provide tours to underprivileged schools in areas of color.”
- “More faculty, staff, and students of color. Provide more funding for culturally-focused centers/clubs.”
- “USF does a good job with this already, but it might be beneficial to see even more opportunities for students of various races and cultures to connect with one another. This might be by creating more clubs or other opportunities for students to learn from one another, both inside and outside the classroom.”
- “Make it easier for student organizations to be created, it has been so difficult to create a cultural/ethnic organization when it should not be.”
- “For international students and domestic students to be more interactive with each other. More events like that??”
- “I think that Title 9 needs more staff, more training for staff, new investigators who aren't white men who victim blame, and more resolutions.”
- “I think I already wrote them in the other boxes in the previous pages. 1) Pushing and expanding Arrupe Immersions 2) More proactive training and discussions regarding Title IX 3) Diversity and inclusion training for ALL faculty and staff members 4) Improving orientation for incoming students, particularly through restructuring the meetings and focus of community meetings with first-year students during orientation weekend. I think this can be done by allowing RAs to have a more prominent role in deciding what goes in agendas and also in leading the meetings because residents interact with them for the duration of the school year and not just during orientation weekend. Orientation leaders need to be picked because they are committed and have shown true care for social justice,

diversity, inclusion, and care for students and not just because they are friends with people in it.”

- “Hiring more CAPS counselors. Hiring diversity training and bias documentation staff for specifically and only dealing with ethnic and racial climate at USF.”
- “Work on diversity training and actually have a diverse campus rather than just saying that you do. representation matters. also have people of color teach the classes that are teaching about history pertaining to people of color.”
- “Recruit more Black students and stop using us as the cover for advertising when there's one of me in my classroom. Hire more faculty of color.”
- “Anti-ableist training for all staff, faculty, and students. How to be actively inclusive for disabled students, as well as other minority groups.” (132)

The second theme was experiencing a lack of community and connection at USF. Respondents offered the following:

- “There is no School spirit it's ridiculous.”
- “No one really lives on campus, which causes a really bad sense of community.”
- “Didn't feel school spirit. I would always see other universities showering its students with free university gear. Other campuses looked more spirited. The university can have a quiet feel, but the friends made and the location of USF made up for it.”
- “Lacking the qualities and facilities of a Division 1 and elite college, including teams, clubs, and campus buildings. Lacking people of thought that I connect with.”
- “I completely withdrew from USF after my freshman year because it was not the environment I want to be surrounded by, it wasn't what I was familiar with. Everyone seemed to come off as beyond privileged and superior that it made me want to leave, which I did.”
- “While there are groups of students on campus who are passionate about the school, overall I feel as though the school lacks the spirited campus culture that I was hoping to get out of my college experience...”
- “It was just a bad environment at the time. Every person I had met at USF was really involved in partying and drugs and alcohol, so I was trying to avoid those situations. My school environment has gotten really lonely.”
- “lack of connection to the school and student body lack of direction in what major to choose unhappiness with classes unhappy with slim selection of social organizations financial stress of being at school and living in SF not enough on campus engagement.”
- “I thought the campus wasn't social enough and didn't have enough party life”
- “There was no one for me. The people were exclusive and had a lot of money. I felt out of place and wanted to just leave. My parents hated how much money I was spending- just wanted to fit in.”
- “Didn't feel like the social life was great. There is no school spirit. Greek Life isn't big, there is no football team, there is no Greek Row, no parties on-campus.”
- “USF still feels very cliquy. It is really hard to find friends here if you do not fit into the social norms each clique has.”

- “During my freshman year, there came a point where I felt like I was alone no matter how hard I tried to 'find people'. It would be difficult to find a sense of belonging at USF, but not in other universities when I visited friends. “
- “I'm just shy and I felt like I didn't fit in with anyone in my dorm floor and the first few months, that's who everyone hangs out with.”
- “Did not feel like there was a sense of community on campus.”
- “Because of a small school there was not a lot of people to meet and my dorm was very quiet. Extracurriculars are very limited here in USF...”
- “I wanted a more traditional college experience. A school that would have a more active community, more school spirit, and more social life.”
- “As an out of state student, living in the dorms my first two years, most of my friends would go home for the weekend. There weren't many people during the weekends or breaks, so it felt very lonely especially my freshmen year. Also, the lecture classes were very intimidating and didn't really have the confidence to join organizations on campus so I didn't feel connected to anybody or anything my freshmen year except for my roommates.”
- “My best friend at USF left my freshman year, so I felt as though I didn't have anybody left. It was also because it is hard to have a social life here. You really have to find a good group of people that you get along with, and I was having a hard time finding that group.”
- “I don't feel a sense of belonging at USF.”
- “Not enough of a social life on campus. Overall vibe of the student body is not very enthusiastic about education or school related events. Student body is cliquey and people are often not willing to meet others... not many opportunities for students to meet others through social events on campus.”
- “I don't know. It was just kind of boring. Not really a social life. Very different people on campus.”
- “The social scene is dead in my opinion. Many students just come and go and there is no sense of community. I don't feel like I belong. I am a first generation student and I am a minority. There are no resources for us and the advisors I have talked to are no help at all. My lack of motivation has caused me to fall behind each semester but I have never felt like I could get help here. I've only stayed because transferring would cost me an extra year and I can't afford to pay another year.”
- “I never got a sense of community when on campus. There were limited events to do on campus and where there were ones they were when I was in class.”
- “..I also considered leaving more so when I transitioned from freshman to sophomore year because I was lonely staying here for summer.”
- “Lack of community”
- “The climate at USF is different than what I expected. There is no real sense of community here for whatever reason.”
- “...Another thing that is upsetting is the lack of school spirit and connect within the student body. USF is marketed as one of the most diverse universities in America, and we pride ourselves with that. However, there still seems to be a disconnect amongst the students. No one cares to learn about cultural differences. In my short time here, I have not seen USF come together as a community.”

Ideas offered by respondents for improving in this area:

- “Making the first meeting with CASA mandatory as a new student so that those new freshman can bridge that connection with someone in the USF community who they know they can turn to for academic help whenever necessary.”
- “Having faculty interact more with students would benefit both the faculty and the students. The same goes for inter-departmental events, as it would allow students to meet other people in the same major as well as the faculty (more events like the CS Picnic, consistently thrown on campus so that everybody would be easily available).”
- “Bring students together more. Lack of school spirit. Also, more inclusive towards black people, since there really aren't many and that can give people a sense of not belonging right from the start.”
- “I feel like we NEED more on campus activities especially on the weekends where people can mingle because it will add to the experience.”
- “There should be a bulletin board somewhere communal, whether it be in the caf, dorm room lounge's, etc. do that other students can get involved without having to do so much research about the hundreds of clubs. I had class during the involvement fair, so I feel like I missed some opportunities that I may have taken if I were there.”
- “Try to form a sense of community. Have Dorm wars or something, like a fun night where everyone can dress up and come together for on campus events and have a competition. The winning dorm gets an ice cream party or a pizza night, or whatever. I feel like if you include all the different dorms, it would make it a lot better. Also have mandatory floor meetings with RA's and actually have people show up and have games or something to build community, rather than just talking to us about boring stuff, and having no energy while doing so...”
- “Mental health programs, outreach and advocacy could be improved upon. More campus wide events that are fun and bring everyone together would be great.”
- “Instill some sense of prestige and pride among USF students. USF is a private university. We pay a lot of money expecting something more than what we would experience at a UC or CSU. As of right now, there is nothing that sets USF apart from a community college besides the cost of tuition.”
- “I think there could be more events to make students who live off campus feel more included/comfortable when they are on campus.”

The third theme was difficulty affording tuition, and living in San Francisco. Respondents offered the following:

- “Commute was too long.”
- “Financial Aid slowly started to decrease and loans started to increase during each year I have been here.”
- “The administration was the most frustrating thing to deal with as a transfer student. Things have since gotten better, but my first semester I was miserable. It is also difficult for me to justify the cost of tuition.”

- “Due to my financial situation, the amount of on campus housing for students after freshman year has made me anxious that I might have to leave the school because I can not afford off campus housing.”
- “it's expensive and I've wondered what it'd be like to go to a different university”
- “Expensive place to live in.”
- “The reason I considered leaving was that I am an independent student and I have difficulty paying for tuition, I also find it difficult to fit in with a lot of upper-class students that populate this school.”
- “I like the environment here at USF, the only reason I've seriously considered transferring is the tuition and lack of financial aid.”
- “There were points in the year that I became so filled with anxiety around paying for school, that I considered leaving.”
- “I have tried getting an affordable way to afford this school, however was unable to do so. Also, I had a hard time connecting with the students here because I am a commuter student and there are no organizations or support groups for these types of students. I believe that this was honestly one of the primary reasons why I decided to leave USF.”
- “It costs an arm and a leg to go here, and rich kids get scholarships. Why? Doesn't make any sense to me. I come from poor retired immigrant parents. Working 35 hours a week to pay my own bills, rent, food, etc.”
- “School is too expensive. FAFSA doesn't give me enough financial aid despite me only having one parent who works and then other parent who has health issues that can no longer work.”
- “I was homeless and there were no services my sophomore year that were willing to assist me. In my freshman year, I felt that there were many people on campus, students and faculty, who demeaned my midwestern upbringing.”
- “The quality of many of my classes didn't match up with the high tuition that I was paying for them. Administration and CASA were often unhelpful with advising me on which classes to take and switching out of classes that didn't work.”
- “It is becoming too expensive to live here. Right now that I am living in a dorm everything is fine, but next year will be a struggle for me to find housing off-campus.”
- “The main problems concerns are about financial stability, working, and housing. It can be overwhelming and very distracting to think about making sure as a student you have housing for further years through my undergraduate. A lot of seniors and juniors live off campus because they felt the lottery system was not dependable since housing is only guaranteed as a freshman. It's a scary thought to worry about that; so I've done research and learned from others about off-campus housing so I'm prepared. I've been told freshman and sophomore years should be fine: my junior and senior years is where I can have trouble; that is unnerving but it's better to know this beforehand. I've gone to workshops with guest speakers from various school services to help us understand the housing lottery here better. I also have to save up money for this and paying for college...”
- “I felt that I wasn't meeting the academic standards of USF and fell into a deep depression, started to doubt myself and missed many classes. I ended up passing through and am still here. But every semester I get this feeling of unworthiness or that I have wasted money here. Furthermore, the CAPS is a good resource but the sessions are very limited and kind of like pulling teeth in there.”

- “I am a first year student and I have considered leaving USF because of the financial burden. As a first generation college student, I was unaware that I had to pay all of my funds before the start of school in order to register for my classes, as a result all of my classes were dropped and I had to go to every single one of my professors and explain my situation. The financial aid office was not supportive and I felt as if I had no one to look to for help. I am currently struggling to pay the rest of my bill through the semester payment plan. I recently got a job at Target and I am having balance school and work at the same time, which is extremely difficult. If the financial burden becomes overwhelming I might have to leave USF because of my inability to pay.”
- “I am unable to afford living in San Francisco and commute to school. I would greatly appreciate USF to contact BART to negotiate a student discount for lessen the expenses of commuting to USF.”

Ideas offered by respondents for improving in this area:

- “Improve the library, we spend 40k+ on tuition and have Mac computers with Dell monitors. Also, the toilet paper is 1 ply and there are no sanitary seat covers, these things make students feel like they're wasting their money. If I'm paying this much I would like to see these things. At SFSU, they have all of the above, and a much lower tuition.”
- “Adding more resources for international students, and for immigrants. Providing more financial aid resources for immigrants.”
- “- get rid of Bon Appetit: students are not happy with the food on campus, nor are we pleased with the prices and service. - There should be more efforts to make lower-income students able to participate in opportunities such as study abroad or immersions. - Off-campus students need more resources to commute safely and in a cost-efficient way, because bart and uber/lyft costs are high. There should be a way to let off-campus students know that they are just as valued and their safety is just as important as on-campus students.”

General ideas offered by respondents for improving:

- “You should provide childcare for USF students, faculty, and staff. It would be innovative on USF campuses because other IVY LEAGUE universities already do. USF is so behind the curve – it’s ridiculous. Why doesn't USF create an on-campus childcare center where students with minors in psychology, sociology, child and youth studies, can have student employment so they can gain work experience? Why not have an on-campus childcare center so that staff and faculty can spend time with their kids in between campus? Why not change USF culture around bringing children on campus? Why not change the culture so kids are welcomed?”
- “I think effective faculty and/or peer advising would be very helpful. When students first arrive at USF, they are given at least 2 different advisers (sometimes 3 or 4, depending on the program). They have no idea who to go to for what questions, or what to do when presented with conflicting information from different advisers. Streamlining the advising process certainly would have helped me in my first year at USF.”

- “I believe USF should make a child care for faculty and students. It would be easier as I know a lot of my professors and peers have family obligations yet are obtaining an education. The child care can give volunteer hours or paid positions to Child & Youth Studies major or minor and students who are on the track of education.”
- “I would love to see more support for mothers and older students in general at USF. Childcare would help enormously for students with children. College is so expensive, to be able to afford that and childcare is virtually impossible.”
- “We need better response resources for students who have been sexually assaulted/harassed, because I know too many people who say the experience of reporting assault at USF is ineffective and not taken seriously.”
- “Encourage women to come forward about sexual assault/harassment of any kind! By faculty members as well, as this is an issue. Also, the critical diversity forum on opening dialogue was extremely helpful. If something like this was integrated into freshman orientation, I think it would have a very positive effect on the climate.”
- “child care!! support for working mothers who go to school!”
- “Eliminating the lottery system for gender inclusive and making it more need-based. The lottery system gives gender-inclusive spots to cisgender, heterosexual people who are there because they didn't get housing elsewhere on campus, while trans people are being denied gender inclusive housing and are forced to live in gender-segregated housing.”
- “Have all faculty and staff be more supportive and accommodate their lessons plans around any student with a learning disability.”
- “The monopoly held by Bon Appetit reduces the welfare of the students. There should be more options for different diets.”
- “The cafeteria needs a better understanding of allergies and more Gluten-Free options.”
- “I wish that it was more regular for classes to share pronouns, and maybe for pronouns to be on the class list with names for teachers.”
- “more gender neutral bathrooms, more accessible campus for people with physical disabilities, more well-informed staff members who can help transgender people actually transition.”
- “Maybe adding personal pronouns to USF id card.”
- “Be more child friendly. Be more disability friendly. Be more mental health friendly.”
- “Provide students with more information on how CAPS or other services can apply to them. Make it easier for students with mental disabilities to find a mental health professional on campus they can go to when struggling with side effects of medication, symptoms of illnesses, etc.”

Graduate Students

The overall perception of the campus climate within the qualitative comments from the College of Arts and Sciences Graduate population, was negatively skewed. However, there were a number of positive comments, such as the following:

- “The professors and staff from the MAIS program have always been very welcoming, helping, and attentive to their students. I feel as if I have been supported through my USF academic career.”
- “I have had positive experiences in my department so far. I can not really complain about this.”
- “I’m very happy with my program and receive significant support.”
- “The department and professors I have worked with have all done a fantastic job helping me one on one. They have definitely helped me grow as a person.”
- “The MFA in Writing program here at USF has been nothing but good experiences for me. The entire community - from the faculty, the professors, the students, the advisors, etc. - have been incredibly encouraging and supportive to the goals I have set for myself, as also I intend to be for them.”
- “I appreciate the 1-on-1 attention that I am receiving from my advisor. I began my program in August and have already created a strong relationship with my research advisor in the migration studies program.”
- “The Program Manager and all the Professors are great and helping us to achieve our goals and built a strong future in our major.”
- “The faculty and staff of the International studies department are very available to students, both through office hours, and by email. I like the openness of communication with all, and the ability to get questions answered quickly and effectively. I've spoken to a variety of department staff and faculty regarding academic and personal issues and they are always willing to help to the best of their ability, and also just listen and provide support.”
- “I am a student in the Master's in Migration Studies program and I couldn't be more thrilled with the work of Lois Lorentzen. Through all of the hurdles of this pilot year, she has worked with compassion, understanding and a deep commitment to our students. I have received nothing but encouragement, realistic but exciting goals and challenging material from the USF professors involved with the program.”
- “I have been very pleased with the cultural/identity training I received for my on campus job. It was thoughtful, thorough and addressed a range of variables within identity that I was surprised and proud to see USF address. All professors and staff I have met this year easily include pronouns into introductions on campus and I think it's great that we are normalizing that.”
- “USF is deeply rooted in the values of the Jesuit, Catholic mission. Everyone in my dpt has shown kindness, honesty, and always willing to help.”

There were three major themes that emerged from the data. The first, and most prominent theme, was the College of Arts and Sciences Graduate Student respondents’ issues with diversity, inclusion, and representation at USF. Respondents offered the following:

- “I felt discriminated against in the academic system of the MAPS program and it hurts even more when people think I'm stupid not to notice them exercising discrimination with their academic authority.”
- “A friend of mine was unfairly dismissed from USF without due process. At that point, I considered leaving due to the lack of considerations for POC.”

- “I felt discriminated against and it is sad that I had to petition, protest, use the academic system to call out an institutionalized racist system that support systemic discrimination for a lack of a better term...”
- “Professor made stereotypical comments based on race/ethnicity to my family members of that race/ethnicity.”
- “I was asked to leave the country and go to my home country.”
- “A group of students made racist comments about Mexicans, I am Mexican.”
- “This MBA professor was an indirect racist. This is something that even my seniors (Indian international students) felt.”
- “I was singled out, persecuted, hounded, harassed, insulted, called out, and berated, told I do not belong here or that my education was not for me.”
- “First experience: A student made a remark within my hearing range about there being 'too many Africans' at an econ seminar. I am an African Second: A CASA Advisor who I went to see in her office spoke over me several times and held her hand out towards my face to indicate that I need to stop talking. It was infuriating and rude. Third: A visiting professor basically said that she did not think that I was capable of writing the essay that I submitted. When I asked her why she kept on deflecting. She eventually gave me a less than deserved grade in that class.”
- One MBA professor comes across as a racist.
- “USF is not inclusive, if you don't have the financial means no one is willing to help you. People are not friendly, nor humble at any time. There is a lot of gender discrimination within staff.”
- “Yes. There is so much wealth at USF. I have experienced discrimination based on my socioeconomic status at USF by both students and faculty. I have had students make fun of me for being "poor" and other students say that people who work professions like those of my parents (maid/fast food/etc) do not deserve living wages because people shouldn't aspire to those jobs. I have had the head of a department who was hiring me for work study refuse to let me work all of it and told me if I want more money to "take a second job" even though he knew I was a low-income student. I have had to fight for every single hour I log on my USF payroll. I do not feel valued as a low-income student. I do not feel like USF cares about me as a low-income student.”
- “Lack of racial diversity within programs and campuses. Lack of equitable services for POC.”
- “Yes. On campus, I can feel free to be alone when I don't want to deal with discrimination and open ended bias bordered around ridicule. I just feel that being stuck in a space where they actively discriminate is draining on one's worth and dignity and leads to further depression and anxiety.”
- “My program seems unwilling to directly challenge and refute students who promote, engage, and view the world through ethnocentrism and sexism.”
- “Most of my faculty and cohort are WHITE/CIS/HETERO. Not diverse. Not inclusive. Not reflecting the Bay Area communities”

Ideas offered by respondents for improving in this area:

- “I think that diversity training should be required the same way sexual harassment training is required. At my undergrad university, all students entering Greek life also had to do alcohol training. These have all been valuable to me personally.”
- “I would recommend more events/ activities/ info sessions from ISSS for international students but also event that not just included them, not just at the beginning at the semester but throughout the year. That would help the integration of international students.”
- “Hire more Black and person of color professors in all departments.”
- “Bring more LGBT+ voices into the curriculum while making sure that faculty are trained to deal with such topics.”
- “Yes, as an International Student I would have loved that the Staff of my program would have to be more knowledgeable of what an international student can achieve on the professional side of the US. Indeed, it is different for a US citizen than for a Mexican.”
- “Better support undocumented students where they need it the most - financially and with housing. If athletes can receive housing covered by the university, then surely our most vulnerable population of students can as well.”
- “Implement diversity classes/ethnic studies courses as a general requirement. ETHNIC STUDIES.”
- “There should be a support network for students who experience prejudice, bias, being singled out, harassed, insulted, berated, and put down BESIDES the rigid blanket-structure that does nothing to help the student, only face MORE retaliation for speaking out.”
- “I’m still new so maybe I’m just not tapped into this yet, but I would love to see resources/events for queer students, art and music.”
- “It is odd that there is not a single african american in the MSAN graduate program. This needs to change.”
- “More socioeconomic diversity.”
- “Push for male students to have more respect for their female colleagues.”

The second theme was Graduate Student respondents’ disappointment with their program/department. Respondents offered the following:

- “Certain instructors and students have been unwelcoming. This is upsetting and disappointing.”
- “Coursework is dated.”
- “Program not as high standard as expected”
- “Program lacked organization, and it seemed like our class was an experiment. Didn't like the way different situations were handled as well.”
- “I feel that school is just a corporation and cares little of the students. Academic curriculum is poor, faculty is more concerned with furthering their career than teaching, many staff and faculty not professional.”
- “At times throughout my program I did not believe the work load was challenging enough and I thought about dropping out and heading home to pursue a full time job with my undergraduate degree. I also thought about dropping about because I felt like I was

falling behind peers who already had good jobs with their undergraduate degrees. I was comparing myself against my peers.”

- “In general, the class was underwhelming, ill-prepared, micro-managed and not communicated effectively. The professor's lectures, readings, and coursework felt out of touch and lacked many aspects of leadership or critical thinking. The class was not inclusive for the student, and honestly, I felt like I was in high school based on the way we were treated and "lectured" throughout the class.”
- “Have not seen the maturity expected within my cohort. Also have found a lack of academic professionalism and organization within some professors.”
- “I feel that school is just a corporation and cares little of the students. Academic curriculum is poor, faculty is more concerned with furthering their career than teaching, many staff and faculty not professional.”
- “I have not had a good experience with my academic advisor, who happens to be one of the professors that created an extremely hostile classroom environment. I have had mixed experiences with other professors -- some are great, others not.”
- “The analytics program has grown too large. The cohort should be reduced to ensure adequate personal attention.”
- “IDEC NEEDS TO HIRE A PROGRAM MANAGER. The students are paying the cost and have no representation and it is highly unfair. The department doesn't provide adequate support.”
- “My department (IDEC) has done a horrible job in terms of advising. They are hardly ever reachable. We have not had a program assistant for almost 1 year now. Gross incompetence.”

Ideas offered by respondents for improving in this area:

- “In general, I'm satisfied with departmental support and counselation [sic] yet I feel it would be better if we have more departmental meetings/receptions/info sessions regarding career opportunities and tips on our field besides the general career events on campus.”
- “Providing a person to address student complaints of bias by faculty/staff in learning environments (e.g., classrooms, labs). This would be very important because you usually can't go to the people in charge to complain about actions of the people in charge.”
- “As International student it will be worthy to have an advisor to support at the first year due to the culture it is different the methodology, etc. In special to student who do not have family in USA. That could be make the process easier.”
- “I feel like campus should listen to all students, even graduate students. I know that we have experiences at our previous institutions, however, with that being said, I would like to see more done to get our perspective.”
- “I have felt at times that some faculty make jokes out of how difficult the work is for some students. I believe they are trying to make light of a rough situation, but I think it can be harmful to people's self esteem and make them less confident. For some of us the program we are in is quite an important undertaking, and I think the faculty should take that seriously. Some jokes aren't funny to everyone.”

The third theme was Graduate Student respondents' experiences with harassment and sexual assault at USF. Respondents offered the following:

- “harassment from other students”
- “Hostile environment”
- “During my first year, I experienced verbal harassment from other students within my graduate program. It was prolonged and throughout the fall and spring semesters, but subsided--although not entirely--after I raised the issue with a couple of professors. Even so, the atmosphere when I'm around those students was and remains tense. The whole thing to me was very juvenile; I seemed to be targeted based on being very introverted. It reminded me of middle school and that's a shame for what is supposed to be a graduate program.”
- “I reached out to the director of my program after I was assaulted by someone on campus; she had guaranteed that nothing I said would leave her office. Without my permission, she told the board of ethics who the person was, who then brought him in for a conversation. Due to the small size of my program and the lack of people this person interacted with, he didn't need to do a lot of mental gymnastics in order to figure out who had reported him. I had never wanted to report the incident, I was looking for resources, and because of this ordeal I do not trust the director of my program and I do not feel like I am supported.”
- “Sexual harassment was not handled well through the university. The student who committed the harassment still makes comments about the situation”
- “an undergrad student for who's class I TA for confided in me that she was sexually assaulted by another student, and despite reporting it, the perpetrator is still enrolled AND only got academic probation. Said perpetrator not only is still a student, but is employed by the school, AND, he has three ADDITIONAL "do not contact" rules brought forward by other women he has targeted. This is unacceptable, and frankly, bewildering. I'm disgusted by the school's lack of action toward this obviously dangerous person. This student is working with the school, and has already reported it. I'm just adding my voice in support.”
- “Honestly, I didn't live in campus so I don't know a lot about what goes on in them. But I know way too many women who have been attacked in their dorms and felt that the school's response was to pretend it didn't exist. For instance where I worked, my friend's attacker also worked. She reported the school's finding to the professional staff but they did not do anything. All that was enforceable was a no contact order, but he could still be in the same room as her and stare at her and no one seemed to care.”
- “I have friends, more female than male (but some male), who have been victims of harassment and the school basically does nothing. A friend of mine had an on campus roommate who was openly hostile and abusive towards him, but when my friend complained--nothing happened. They basically sat in a room with an "arbitrator" who made them sign something but when an incident repeated, no further action was taken. That is not okay.”
- “Not at all. I once reported a harassment in the locker room to Koret Gym staff. They did nothing because they knew who it was. They responded, "We will talk to him." Didn't even ask what happened.”

Ideas offered by respondents for improving in this area:

- “Expel rapists. Protect victims.”
- “Not at the moment. But maybe we can have more emails with instructions on how to report sexual misconduct, racist action, hate speech, discrimination, etc.”

General ideas offered by respondents for improving:

- “work opportunities for students esp. graduate students would be helpful.”
- “USF could do more to support low- or middle-income students who struggle to pay expensive housing costs on top of pricey private school tuition. More (and cheaper) on campus housing, especially for graduate students, would expand the population of potential students.”
- “IMPROVE THE PARKING SITUATION. AND PLEASE DO NOT RESERVE PARKING SPOTS FOR NON STUDENTS, FOR WHATEVER EVENT, WHILE STUDENTS ARE ALREADY STRUGGLING TO FIND A SPOT. THAT IS MY SINGLE NEGATIVE ISSUE REGARDING USF. THE DIFFICULTY TO FIND A PARKING SPOT IS PUTTING ME THROUGH SOME SORT OF DURESS WHENEVER I AM DRIVING TO SCHOOL.”

Faculty

The overall perception of the campus climate within the qualitative comments from the College of Arts and Sciences Faculty population, was negatively skewed. There were, however, a few positive comments such as the following:

- “The campus is a morally and spiritually uplifting environment that has a consistently positive effect on my moods and attitudes as I approach and enter into it. I feel a true sense of belonging and care here that is distinct from even a few blocks outside of its protective bubble.”
- “The campus is excellent. The environment is wonderful.
- “As an atheist I felt some concern when I was hired about the focus on the mission, but I have found that my values align closely with those articulated in the mission. I also appreciate the fact that there is a shared sense of values here, which I thought was missing at my former institutions (more research-focused universities).
- “I am proud to work for an institution that supports students of many different status' of documentation, including undocumented. I enjoy teaching students who may be the first in their family to attend college or have to work and attend college bc of family/financial circumstances.”
- “I find the campus to be a very warm, inviting, and comfortable place to be. Most everyone offers a smile and some kind of generous gesture; e.g., holding doors for one another, greeting one another, or even just sharing a brief humorous or lighthearted remark to elicit laughter from one another. These are typical experiences walking to and from classes. The library is a wonderful space, too.”

There were four major negative themes that emerged within the qualitative data for Faculty respondents, that were supported by the quantitative analysis as well. The first theme was Faculty respondents' issues of diversity and discrimination. Respondents offered the following:

- “I am usually assumed to not have much experience as a Professor because I look ‘young’. This has been remarked by other faculty members not in my program, but those who I have invited to my class events and/or are professors who teach in the classroom before/after mine.”
- “The experience was an agist value judgment on my ability to teach a particular class for which I am qualified and have been excluded from, despite being a FT faculty member hired to teach this kind of class, for the past 8 years.”
- “As a female faculty member of color, I have experienced aggressive, frightening treatment from mentally unstable male students on multiple occasions. Because I have not been able to ‘prove’ that the student is going to actually physically hurt me, campus offices have treated it as an issue of ‘perception’ or just ignored me (not followed-up or returned my communications). During two separate semesters involving two separate students, my spouse had to accompany me at work because no resource office on campus took my safety seriously. This signals to me that the student retains more rights than the faculty member unless the faculty member is actually attacked, and it is okay for me to work in a hostile environment.”
- “I still suffer the feeling that I can be taken for granted, neglected, and lied to because of the color of my skin in an institution with a mission of social justice. Some full-time faculty members in the department imagine that adjunct professors are less intelligent or poor teachers or they are unprofessional. You wonder where such assumptions derive. Adjuncts who are majority race feel treated differently. It is worse for a triple minority-- an adjunct of color and immigrant. I do not only teach but practice social justice. I would like to see professors practicing what they teach. I do not want to be discriminated against and I will not discriminate against anyone.”
- “On multiple occasions issues have been brought to the Deans office about gender discrimination, bullying and hostile work environments. I've continually been told that things will be done. Nothing ever changes. I've been discouraged from going to HR.”
- “We were able to resolve the issue itself, though the larger issue remains unspoken. This larger issue has to do with diversity, a word that is often invoked but rarely put into practice or action, especially in a work group of colleagues who are almost all white. All of us colleagues manage to be cordial and friendly and to work together, largely due to the labor I put forth to smooth things over so that the non-POC faculty can feel comfortable again.”
- “People of color are disproportionately impacted by service to the university. This can be mentoring students of color because their CASA or academic advisor cannot support them as a student of color at USF or it can be faculty of color being pulled to serve on any and every committee because they need to "diversify" the committee. This is problematic because people of color carry a much heavier service load, but are not compensated fairly for the extra work nor is the work even acknowledged.”
- “Faculty contract is very vague about service standards, which I've observed to leave many female colleagues and colleagues of color doing excessive service, relative to other

colleagues. the push to complete bureaucratic tasks (reviews, assessments) has taken away from teaching, and makes research impossible to complete during the teaching term. since 2015, faculty input seems to be tokenized, and not taken into serious consideration when making decisions for the university (eg, declaring usf a sanctuary campus).”

- “Some faculty do very little service and advising. Others do too much. There is no way to address this. The gender dynamics along these lines are absolutely crazy. There are men in my department who have not been to a department meeting or done service for five years and they claim to be victims of everyone that does the work.”
- “It is widely known here that there's a gender disparity here when it comes to salaries. I feel strongly that this needs to be investigated and that those who have been underpaid should be compensated with back pay and have their salaries lifted to the same rate as those colleagues at their same level of accomplishment. The CBA makes it seem like salaries are clear, but they are not due to unclear negotiation processes.”
- “General racist comment by faculty member.”
- “I knew the conversation was making my friend uncomfortable, and it was racist, so I interjected, told her we had to be somewhere, and walked away from the white faculty member making the remarks.”
- “Professors giving a poor evaluation during promotion exercise based on race. Someone who has never been in a person's classroom made comments that people of a certain race cannot be good teachers. I did not expect this from Ph.D. holders.”
- “International student from China (although Ueghar ethnically) reported that instructor asked her on the first day of class whether she was a terrorist! The professor was Chinese and recognized her ethnicity through her name. I did report this to my Associate Dean who said it would be given to the appropriate Associate Dean to deal with. I have no idea what happened. In another incident a student told me her professor had said that Chinese students cheat. In another incident an adjunct told me he heard a full-time professor say out loud on the 4th floor of the library: "send them all home; they all cheat" I have received numerous emails in which faculty have made outrageous and shocking derogatory comments about some international student groups. I didn't expect to hear such things at USF.”
- “I spoke to the person who I thought was mistreated and suggested she speak to the dean and HR. The person who did the mistreated was also rude to me (in a way he is never rude to men) and I confronted him personally.”
- “Two incidents: 1. Aggressive treatment of current chair who is female. Reported but mild response for reasons of maintaining calm. This does not feel like an appropriate response and will likely only encourage the behavior. 2. Two antisemitic comment for a single faculty member. First incident was reported to Dean, who display open concern but followed with no apparent action. Second incident confirmed the first as not an accident, but chose to ignore the individual and not report. I did discuss the incident with a colleague in another department to confirm my interpretation of the comment. It was confirmed.”
- “I reported the incident, which involved a white student being hostile in person and over email to a Black student in another professor's class. I was very dissatisfied with the result of reporting this, because the person who dealt with this case seemed to give much more attention and support to the white student.”

- “Gender bias can be subtle, sometimes is masked in communication style and managerial style. Require faculty to have further training on their role as Dept. Chairs e.g., NOT the role of Chair to micro-manage or constantly put down a colleague's way of working just because it is different from their own, or because it reflects a different gender or different sensibility. Also, require faculty to have training about gender discrimination, e.g. to create a classroom where different styles of communication are accepted, NOT blame female students for being quiet / tell them they should be more aggressive (just as important to reign in the loudest/fastest students/faculty so that everyone has an opportunity to speak.”
- “The offending person was a faculty member who is widely known to be a creep and a manipulator and someone who abuses his position/bends rules. A dean has been working on reeling him in, and he did not like it. He made derogatory comments that were sexist in nature (but I don't doubt there was some racism there, too; he is white, she is black).”
- “I have seen domestic students shun and roll their eyes at international students. I have also had international students from several different countries write racist things about African-Americans. With my own students, I have talked individually and tried to construct class activities to combat these things. When I have observed colleagues berating international students for lack of cultural knowledge and/or inability to express their knowledge in the way the professor wanted, I have talked to them later. What frustrates me the most is the widespread complaining about international students' perceived "lack of intelligence". I'm not sure what to do about that.”
- “I was on a search committee and the male members on the committee described the female candidate as emotional and the male candidates as passionate. Even though the female finalist had higher evaluations than the men, my male colleagues insisted she was not a good fit.”
- “This concerns two search committees: Neither selection was wrong as both people who were hired were excellent candidates. In each case, they did recruit and consider a diversity of candidates. However, in both cases, I think that the search committee did not consider other candidates who were outside their ethnic/regional terms of reference. There is a need for search committees to very carefully consider their biases and narrow remits.”
- “Look at our upper administration. There are a lot of old white males up there. And the women and people of color either aren't there or don't last. It's frustrating and quite depressing actually. I think at some of the lower levels, where people are working their butts off, you see women of color, but then how long can they keep doing that kind of work? I don't know how they don't burn out.”
- “I served on a faculty search committee. A senior white male faculty member disqualified a strong Asian applicant from the finalist pool. Originally, he did not articulate a reason for disqualifying the applicant. When pressed for a justification, the faculty member stated that he felt the applicant would not connect well with our students. It seemed clear to me that this perceived inability to connect with students was because of the applicant's notable accent.”
- “Committees are frequently comprised of all white men, without due process or time for nomination, rallying, or consideration for implications of committee makeup.”

- “Once again, I feel there is a tendency to hire men over women, young over old, and PhD over multiple masters degrees, when rarely is a PhD needed. It's just a status symbol of a bygone age.”
- “It would be great if diversity/inclusion were everyone's work instead of the work of some and sort of blah/optional for others.”
- “I would appreciate more faculty workshops on helping students to understand privilege on the basis of race, class, gender, sexual orientation, religion, age, ability status, nation of origin, etc.”
- “Traditionally, I would say that USF has done a good job cultivating a campus culture that is based on Jesuit values. However, I was disappointed and disheartened that the university's administration quietly shut down the Office of Multicultural Recruitment and Retention in 2014, shortly after the new president began his tenure at USF. I used to play a role in the MMR call-outs each year to help recruit students of Color. This office provided a vital service to promoting diversity and inclusion at USF. It is no surprise that a leader in the Office of MMR, chose to leave USF after 17 years of service. To me, this is evidence that the current administration does not seem to prioritize diversity and inclusion, despite the presence of the Office of Diversity Engagement and Community Outreach. Stronger leadership is needed in this area. I also believe that the way the administration treated faculty and staff during contract negotiations last year failed to reflect the values of our Jesuit, Catholic mission.” (3446)
- “I am concerned that my colleagues and students of color do not feel safe on this campus. I hear this from them on a regular basis. African American colleagues seem to feel isolated all too often, and although there is some new programming (Black scholar program -- great!!), there remains much work to do.”
- “The one big issue that I don't see talked about much is xenophobia, and I am getting alarmed especially anti-Chinese sentiment that appears to be on the rise. I worry that some colleagues are tending to too quickly dismiss the contributions of USF students who were raised outside the US, and seem to blame any less-than-optimal classroom experience on students being foreign-born or "lacking English language skills" where it may not be the case.”

Ideas offered by respondents for improving in this area:

- “I believe this campus culture is well established in some departments/segments of the community and less in others. I believe there should be better general guidelines that all departments are expected to observe, along the lines of respect for diverse opinions, encouraging open communication and eliminating bullying of staff or faculty with unpopular ideas. All new dept chairs for example should be required to have some basic training for their role in mitigating conflicts and general diplomacy.”
- “I am concerned that faculty and students of color do not feel supported. I think diversity training for faculty should be a requirement.”
- “Be more mindful of people of color - they feel oppressed. When people file complaints about colleagues in the Dean's office - they should be looked into and dealt with rather than brushed off because it would be too difficult.”
- “Require various sensitivity training to faculty and staff - racial discrimination, economic discrimination, gender discrimination. Orient students and staff every semester on various

social issues that affect the community and campus. Have more inclusive campus events.”

- “Continuing to push for more tenure-track hires with diverse backgrounds. Diversity is disproportionately heavy in the adjunct pool rather than full-time TT.”
- “More public forums and town house community gatherings around topics Timely in-person discussions on particular topics by administration and deans--not just on email More transparency on decisions and changes that affect the climate and the many ways in which the various colleges interact and relate.”
- “Recruit more African American students. This is a notable gap on campus.”
- “1. The administration needs to connect with faculty--see what happens in our classrooms, service learning placements, and research conferences--and understand the student-faculty interactions that make USF unique. 2. The university needs to support faculty of color, women, and LGBT faculty who are often overworked, and carry a disproportionate burden to deliver programs that address the issues of diversity that are central to the university's mission. It would be helpful to have stronger leadership, ideally someone who comes from the faculty and can build on faculty efforts in the position of Diversity Engagement and Community Outreach. 3. There needs to be vision--and we have faculty who can bring it--and then serious action on housing and transportation. Without these, it is becoming increasingly difficult to maintain a campus environment that includes students and faculty who are not from privileged backgrounds, and to foster the student-faculty interaction that makes USF unique.”
- “Train your staff and permanent faculty to respect all and give all faculty the benefit of having a voice (in an easy and effective delivery method).”
- “Enable and Empower Staff, Faculty, and Students of Color to speak about their experiences for healing. Hire Diversity and Social Justice Coaching Firm such as Aorta to do training and follow-ups. Work toward measurable mission driven goals of diversifying the space and take institutional responsibility for equity.”
- “Yes. In addition to supporting our marginalized students, we can do more to support our marginalized professors (and staff--I imagine). We can provide opportunities to not just recognize that faculty have been here for a long time, but to keep them by providing opportunities for promotion (from adjunct to full time and from nonrenewable to renewable term). We can find ways to better inform fellow faculty on what the other faculty do--many tenure track have no idea what the term faculty contribute to this university.”
- “More training for men to recognize when they speak down to women or treat women differently than male colleagues.”
- “The university needs to take complaints more seriously. I'm tired of experiencing bullying from co-workers and nothing being done about it. It creates a hostile work environment. I keep being told "oh i talked to them and they said they would apologize and it will get better" but they don't even apologize and the behavior never changes. It's unacceptable to have such sexism and bullying. The emotional labor that female faculty take on is unacceptable. The amount of service that female faculty take on is out of proportion to the work load that our male counter parts do.”
- “White faculty should take mandatory diversity training *without* the presence of their faculty of color colleagues. (I have seen myself, and have read research to support this, that when both groups are involved in the same training the situations end up centering

and even reinforcing white defensiveness and their experiences.) - Something must be done to address the unspoken sexism that pervades upper administration. A good place to start would be by correcting faculty salary disparities. - Faculty of color who informally mentor students of color should be able to have this recognized or acknowledged in some way as part of their overall service. It is incredibly important work. - The power structure at USF ensures that chairs and directors have very little management of their own departments. Upper administration should do a better job of trusting their chairs and directors. The lack of trust has led to a very demoralized atmosphere among many faculty. I have observed that upper administration tends to lead by fear rather than encouragement, and this too leads to a demoralized atmosphere.”

- “...Increase faculty, staff and most importantly administrative training in handling and responding to Diversity, Equity, and Inclusion issues. Over the past year, I've watched administrators make the climate worse with their poor handling of DEI issues...”
- “Create systematic research-based program to foster inclusion and support of underrepresented members of the community.”
- “When you look up at the leadership and see white men overrepresented, that has an impact on the climate. Recruiting at the highest levels with diversity as a criteria would be a boon to a place like USF.”
- “We need to do more to support diversity at USF. We talk a good game in our classroom, but different social norms rule in the dorms. Students tell me about the subterranean cultures of sexism, racism, and bigotry toward non-native and first generation students. We need to develop deep and ongoing campus-wide conversations about race, class, sex/gender, and privilege.”

The second theme was Faculty respondents' anger with leadership. Respondents offered the following:

- “new provost's devaluing of faculty was very troubling”
- “bullied by administration”
- “Lack of vision coming from administration with an increase in business like practices that undermine education.”
- “Very poor leadership from Deans up. The higher up, the worse the leadership.”
- “poor campus leadership-- esp since 2015”
- “Disappointment in President's Leadership”
- “disappointment with the administration”
- “abysmal leadership of the university”
- “Dissatisfaction with university leadership”
- “Typical in academia. Top heavy over paid administration that doesn't care.”
- “I think that Provost acts in a very rude and disrespectful way to faculty. I feel that my work is undervalued, and that the upper administration does not understand how much work faculty do for the university and our students.”
- “I have not been at USF long enough to have strong opinions on some of these questions. I do sense tension between the faculty and the administration in the university as a whole and for certain within my department. There is an overwhelming sense that the

administration is not always as responsive as it needs to be to overwhelming departmental needs.”

- “In my experience, the Dean's Office has always been welcoming and responsive to faculty input. The new Provost, however, does not seem to value the input or contributions of faculty.”
- “President and Provost do not take the faculty seriously, they practice top down leadership and have openly lied to the faculty. Serious credibility issues with the President and the Provost.”
- “My dean takes concerns seriously, but not upper administration such as President, Provost, Sr. VPs.”
- “In the previous administration, there was more flexibility about the workload and work schedule. My status (gender, nationality and race) are considered valuable. Under the current leadership, the working condition has become highly deteriorated and I no longer feel valued. This coincided with the rising cost of living (i.e. housing) in the city, as well as with de facto pay cut by this administration. As a result, I am feeling extremely demoralized and undervalued while my workload and work condition increased enormously. It feels as if this is an entirely different type of institution than I was first hired a decade or so ago.”
- “Senior administrators are detached, arrogant and have totally failed to convey any sense of strategic direction. Their eloquent rhetoric on diversity does not match actual university policies or support which are woefully lacking. Faculty are not listened to by administrators who would much prefer to reduce faculty roles to nothing more than an employee to be hired and fired at will.”
- “I think we do ok. I do sense a change with the new administration though. Past president and provosts were far more connected to students and faculty and seemed to share vision of USF as place of learning and social justice. New administration has been slower to show us they value what we do and who we are. More talk of new (Honors College, School of Engineering, fundraising) than celebrating and supporting what we do well and our place as a liberal arts university committed to student learning.”
- “These days, not that well. I have heard trustees at events talk about hating the poor. I have heard a general sense that we are drifting from the mission and towards a climate of business over mission.”
- “Under the past President, we did an exceptional job trying to align Jesuit values with the practices of the University. Now, it seems we have gone off course and it is some arbitrary business model that is directing the practices of the institution. We need to return to our moral and ethical code to structure the institutional practice - then the faculty will again support and breathe life into the university as a cohesive unit.”
- “The President does not value the whole person and is not leading the faculty based on social justice values.”
- “The senior administration are hypocrites - they talk about openness, transparency and inclusion but they are elitist, secretive and exclusionary. The place is run like a closed old boys club on the basis of long-standing friendship networks. If you are not a part of this, look out!”

Ideas offered by respondents for improving in this area:

- “I think that the Provost and President need to show faculty more respect and to recognize the real challenges faculty face in terms of the cost of living in the Bay Area and long commutes to and from campus. In my experience, Provost Heller talks down to faculty, belittles our concerns, and does not embody the mission and values of the University.”
- “More leadership from top administration, with concrete initiatives, that are mission driven.”
- “We need to hear seriously from our president and provost about how they are going to re-center on our mission. We need to hear clear explanations (and see some real transparency) about financial issues and why they are going forward with things like buying a farm and a school of engineering, rather than working with existing programs to create new opportunities. We need less of the business-style model and more of the cura personalis model back. I currently feel very unsupported by upper administration and they repeatedly do things which makes it seem like they don't care about the people working here and our efforts. I have not personally had issues with feelings of discrimination or being attacked for who I am (but I am a white woman). But, I do know from my students that many of them feel betrayed - they are drawn to USF because they are told we have this mission and work for inclusivity and then they get here and feel like they have been sold a bill of goods.”
- “- We need new leadership - USF used to be a place where we worked together through tough and lean times. Now it's antagonistic. Especially after the recent contract negotiations. - I actually think issues of diversity are not well addressed either. Again, at the top, there's a lot of attention being placed in 'looking good' especially in the city but less attention in how people are actually experiencing the day to day at USF - some attempt to try to help departments through conflict management.”
- “The President and Provost and others on the leadership must show a willingness to listen, be less defensive, and make serious effort to know their faculty who are fellow/key stakeholders in making USF a distinct and special university.”
- “Need a new president, one that doesn't sew negative seeds. Need a new president, provost, and CAS Dean - people with vision, not people who look at USF as a business.”
- “Review all the Deans. There has been no review of the Deans and some of them are really awful and are playing a role in silencing people and making folks feel they are not valued.”

The third theme was Faculty respondents' issues with work-life balance and valuing families. Respondents offered the following:

- “When I took my parental leave several years ago, USF was very supportive. I've heard stories from younger colleagues more recently, however, that suggest this has changed.”
- “Child care is major issue that has never been properly handled at USF. I think there should be on-site childcare if we are truly supporting an inclusive campus, and one that positively supports life-long learning. Health care is a major for everyone. I think that USF might consider working with other Jesuit universities to provide a far better health package.”

- “Despite the long distances faculty with children typically commute, there is no day care center on campus. This means that many faculty--unfortunately more often women than men--spend a great deal of time and energy arranging childcare, which impacts those faculty members' professional development, and takes away from campus life.”
- “Pay is severely un-competitive, considering cost-of-living in usf community. I know of several people who would have been excellent job candidates at usf who did not submit applications, due to the fact that they could not conceive of being able to establish and sustain a permanent home and family with usf's pay, lack of true childcare subsidies, and lack of commuting support. if this doesn't change, I foresee usf no longer attracting top scholars and educators in their fields.”
- “In terms of work-life balance, the major restriction is housing - particularly for faculty hired in the last four years. More must be done to ensure that faculty can live comfortably near campus. In terms of work-life balance, more can be done to make campus more kid-friendly - including child care services, and making it a point from the top of the administration that USF families are welcome at USF events.”
- “For adjunct there is nothing like childcare available.”
- “...Its housing and childcare. These issues affect all Bay Area institutions. We make much more than SFSU, across the City. We are competitive with Stanford on salary. But we fail on these scores, and I certainly has affected Recruitment of high quality faculty and USF Rankings.”
- “Why doesn't USF have a childcare facility? Laziness? Disinterest in women in the workforce? Jesuits forgetting that people procreate?”
- “As for child care benefits, the subsidy is ok, but is minimal compared to the costs we encountered with 2 kids in preschool. We were literally bleeding money with two working parents. We used all savings and literally had to borrow money to make ends meet. This while both parents were FT employed by USF!!!! It has been crazy. More child care subsidy would not only be fair, it would be necessary.”
- “I don't think I need to say much about the competitive benefits here -- the outrageous costs of housing and the ever-more-burdensome commutes are having a depressive effect on our ability to attract and keep faculty. Also the childcare subsidy is capped by federal guidelines -- why not be more generous?”
- “On the national scale, our salary and benefits are competitive, but if you consider the cost of living in bay area, it is not enough at all to raise a child, save for retirement and secure a housing. Many of us who arrived at USF after the housing market surged, have experienced no fault eviction, being slapped with high rent, and impossibility to own a home since a small home now costs more than 1 million dollars. Child care cost eats up most of my monthly wage. If we are opt to live far away and commute longer, we will have to spend more money on child care while spending less time on work and family. In the past contract negotiation, the administration insisted that our salaries are too good or competitive enough but they are not being realistic about the cost of living in the SF and bay area. Without homeownership, it is impossible to save for education and retirement for some of the faculty members at USF. Yet, the university has imposed draconian schedule on the faculty, limiting us to teach more 3 days a week schedule and at non-prime time slots. This increase our need to hire extra child care and made it impossible for us to secure time to do any research or mentor our students. Since I started teaching 3 days a week, my time to spend with students and on my own research decreased

drastically. 3 days a week schedule makes it very difficult for me to schedule committee meetings and appointments with students. Due to the working conditions, wage relative to cost of living, and workload, I found my job at USF less competitive and attractive than 10 years ago. I really wished I had chosen other job over this place.”

- “... of childcare, classroom scheduling, transportation and other time and cost related issues are the real climate detractors.”
- “By paying for childcare through the IRS Dependent Care account, the university has conveniently capped it's maximum at \$5k. There are other ways to administer this benefit that would not have arbitrary caps. \$5k won't even cover part of a year of child care for one child, not to mention if one has several children. And consider that younger faculty are the ones whose salaries are lowest (and struggling towards tenure!). The benefit has in no way increased with inflation over time. The university CAN and SHOULD do better.”
- “Child care would be great, even for rare occasions, like when schools close for teachers' meetings.”
- “we were promised a child care center for years . . . now my kids are too old to take advantage if there was such a thing here.”
- “I am overall a great supporter of USF but I must say that it is the most family-unfriendly university I have ever encountered in terms of climate (not in terms of policy). I have worked at three other universities, which provides me points of reference and comparison. I have observed and heard countless anti-parent remarks here. It is also a well-known, open secret that upper administration at USF is deeply sexist, which likely contributes to an overall anti-woman, anti-mother climate.”
- “Other universities have more flexibility about workload, work schedule and more benefits such as childcare facilities on campus, while the cost of living is lower than bay area. USF may seem better on paper, but this is a slave ship in reality.”
- “Cura personalis seems to be strongly emphasized for students, but not staff or faculty. Work/life balance is impossible on the tenure track, even more so for those who cannot afford to live in SF and have families, and especially for female faculty of color responsible for juggling multiple program committees. I do not know how I could ever be "a whole person" in that context.”
- “There is a housing crisis that needs to be addressed. USF faculty who do not have a wealthy partner/spouse or family money *cannot* afford to live here, and it seriously strains our ability to serve the campus effectively. Faculty have to move further and further from campus (students, too). Bay area traffic then becomes an impediment-- students are routinely late to my classes in ways they never were before. Some faculty have left USF because they could not afford to stay. These problems are exacerbated for single working parents, because there is just one income, child costs are extremely expensive, and there is no daycare at USF. The childcare subsidy is truly a drop in the bucket compared to the actual cost of childcare. More lengthy childcare is needed if there is a long commute time. And housing is more expensive when housing a family. As a single working mother, I do not feel like USF makes an effort to value my position at the university in ways that help me live in this community and provide for my children. It feels like an extremely inhospitable place for people in my position- and yet we espouse the importance of economic/class diversity. My students also have a desire to be heard on issues important to them, that is not being met. Whenever there is a forum to voice

concerns, they feel their questions are met with dismissive non-answers, not productive dialogue.”

- “USF is a commuter campus. Most faculty cannot afford to live in SF and cannot participate in on-campus events in the evenings. The commute of 3h/ day is a huge burden and limits faculty productivity.”

Ideas offered by respondents for improving in this area:

- “Every new staff member should be required to have an on-boarding session with the school's HR manager or representative. That individual would be responsible to discuss benefits, unions, mandatory costs, career opportunities etc.”
- “Pay competitive wages (for both tenure track and adjunct faculty). Readjust unrealistic expectations and workloads (demands of research / teaching / service) for faculty.”
- “There should be a committee charged with researching current employment practices and finding solutions for greater equity. This committee should include representatives of all employee groups in representative numbers.”
- “The administration and Board of Trustees need to listen to the faculty better and stop pushing so much administrative work on us. They need to consider the mission of "cura personalis" it claims to support not only among the students, but the faculty and staff, as well. We have our own lives, families, physical and and mental needs to tend to, which is extremely challenging given our workload. They also need to do a much better job at addressing inappropriate behaviors among the faculty to prevent them from constantly occurring.”
- “Faculty are overburdened from bureaucratic service responsibilities that sap their energy and vitality to do what should be central to their jobs: educate, nurture, and inspire our students and our whole campus community in ways that will bolster forms of inclusion and diversity on this campus that are meaningful and authentic. Here are some practical ways to increase the seriously LOW faculty morale at USF: 1) Change the sabbatical clock to include an option for 1 semester off after every 6 semesters of work (or 1 year off after every 6 years of work) 2) Allocate some financial resources to hiring teaching assistants for faculty who are regularly teaching large core classes 3) Allocate some financial resources to hiring support staff whose job is specifically to assist with bureaucratic work loads such as learning assessments, etc”
- “Provide more cost-of-living support for faculty and staff, including realistic housing and childcare assistance. Clarify service standards for all, and review whether or not service at the university is equitably shared and compensated. Recognize and reward work that contributes to mission. Cut superfluous administrative positions, and limit bureaucratic demands (eg assessment) that take away focus on teaching and research. Provide better resources and qualified leadership for DECO. Discontinue neoliberalization of university, and rebuild a culture of learning at usf among students. Make real diversity training mandatory for all usf employees.”
- “Allow equal access to benefits to all employees, including the adjunct faculty, and food service workers. Additionally more encouragement engagement among faculty across disciplines.”

- “Please provide more substantial support for faculty and students in terms of housing and class schedule. This will take a lot of pressure off of us and allows us to facilitate meaningful academic experience.”
- “Proactively help faculty get housing so that we can continue to recruit and retain high quality faculty. Continue to talk about campus climate, so it stays on people's minds as an issue. I think the existence of this survey alone raised awareness.”

The fourth theme was Faculty respondents' adjunct faculty issues. Respondents offered the following:

- “Ad-junct life is tenuous at best - we are supposed to inspire but we have few opportunities ourselves.”
- “Not tenure track and possibilities for change in that regard appear limited.”
- “I am paid well as a part time faculty member but not enough for my family.”
- “Administration doesn't care about ad-juncts. A dean didn't bother to show up to a scheduled meeting.”
- “As a part time (at will) faculty member I sometimes feel disrespected or ignored.”
- “Rather than a particular incidence, there has been an overall increase in disregarding adjuncts' accomplishments and promoting their inclusion as important and valued faculty members.”
- “I teach on an adjunct basis, and each semester I have to actually check to see whether or not I'm on the schedule. I am in the PHP (Preferred Hiring Pool) which means I have seniority among adjuncts, yet I am still never consulted when it comes to scheduling. This is problematic because I have to teach at several schools, so coordinating schedules is crucial.”
- “Compared to some of the harms being listed in this survey, my issues seem to pale, but it speaks to the reason why the campus climate has some of the issues seen. Moving from adjunct to full-time or non renewable to renewable is nearly impossible in this university, despite having many years of experience with the school and student population. In addition, I have noticed that the role of term faculty is not understood nor valued in the same way as tenure-track, despite the programs introduced, service roles completed, and value brought to the university through pedagogical advancements. This division among faculty and lack of recognition for term faculty (and opportunity for advancement) promote a lack of unity and stability on the campus--making it more difficult to implement programs that promote a better campus climate.”
- “Even though I have PHP status my classes can be taken by Tenure Faculty. Consequently there is no real job security. And where I would hesitate to take a class from a lower ranking Adjunct they see it as there unquestionable right to take a class from Adjunct faculty.”
- “The inequality between adjunct and full-time faculty in terms of recognition, inclusion, and compensation is significant. This prevents many adjuncts from being engaged to the full extent of their qualifications and possibilities, and leads to low morale - particularly among those who have been teaching at USF for a long time and for whom this employment is the only or a major part of their income.”

- “As a term faculty member, I do not feel that I can turn down additional service requests, even when I have absolutely no time to fulfill them, since legally my contract does not have to be renewed when it runs out. With respect to the distribution of department work, many of my tenured colleagues perform work in other departments, so it is mostly the term faculty that performs the service for my department.”
- “I feel that certain tenured faculty in my Department do not respect those of us who are nontenured. They will call us out at Department meetings and it is very uncomfortable.”
- “Adjuncts are consistently undervalued and overused in ways that couldn't possibly advantage students. There is no room for advancement and therefore no impetus to excel as a teacher here.”

Ideas offered by respondents for improving in this area:

- “Better conditions for and inclusion of adjuncts. Continued work toward an equitable contract (step system, increased benefits, fair course appointments, fewer adjunct faculty to better support and promote faculty already at USF, etc).”
- “More job security and clearer process of evaluations and promotion for adjunct faculty.”
- “Yes, create a more equitable situation between "part-time" and "full-time" faculty.”
- “more transparency in financials, leadership models, goal projections, opportunities for advancement, work beyond adjunct maximum class loads, break the mold of indentured part timers that plagues universities nation wide”
- “Pay adjuncts a livable wage. It is a total travesty that after some 15 years of service to USF, I don't even earn 30,000 per year. And I work FULL TIME, every semester.”
- “Give part time faculty a living wage, step raises, and medical-dental after one year of employment.”
- “I think providing adjuncts with competitive salaries and opportunities for adjuncts and term faculty to become permanent faculty would help tremendously.”

General ideas offered by respondents for improving:

- Restore the balance of teaching, service and research. Cut down the reliance on teaching evaluations. Cut down service demands inside USF and let the managers manage (rather than putting it all on faculty members to serve in pseudo managing capacities). Encourage service outside USF e.g. in their professions. Allow time for faculty to conduct research. 2. Focus on substance rather than inter-personal relations in order to right the climate.
- “Better orientation to all faculty with specific discussions about the classes they will teach and the influence of social justice, i.e. organic chemistry here should be different than organic chemistry at say, SFSU. We should not only be teaching the material but if all knowledge is power, we should be challenging our students to think about how they will use that power.”
- “I think faculty need more training in teaching/pedagogy than we have, and many of the conflicts that may arise between students and faculty could be addressed through periodic teaching training. I know that is tricky with adjunct faculty, since we are here for limited

time on campus, but perhaps more on-line tools like the sexual harassment modules we do every couple of years, but open for more topics?"

Staff

The overall perception of the campus climate within the qualitative comments from the College of Arts and Sciences Staff population, was negatively skewed. There were, however, a number of positive comments, such as:

- “Just super grateful to be here- love my job, thanks.”
- “My supervisor was supportive of an educational leave over the summer to do research. I am grateful for tuition remission.”
- “I’ve been impressed with the caliber of professors and the openness and diligence of the students.”
- “I’m very thankful for the opportunity to study while working. It has been a life-changing experience for me.”
- “Overall I’m grateful that the university does its best at creating an inclusive environment.”

There were four major negative themes that emerged within the qualitative data for Staff respondents, that were supported by the quantitative analysis as well. The first theme was Staff respondents’ issues of diversity and discrimination. Respondents offered the following:

- “massive institutional racism within the St. Ignatius Institute”
- “general climate regarding change or advocacy for equitable support is typically shut down/derailed by the institution”
- “witness and first responder to bias related incidents/ hate rhetoric etc”
- “I have noticed there is little training involving healthy practice for gender identity inclusivity. Much of the time when someone does bring in those healthy practice into a space, they are ignored, not continued, and/or silenced.”
- “I’ve seen female administrators regularly treated disrespectfully in meetings with leadership - interrupted, talked over, dismissed, having their legitimate concerns and points of view minimized or mocked. It very much has a "boy's club" feel.”
- “What I observed was a microaggression and I really didn't know how to respond. I think that there needs to be more mandatory training on this type of thing (the 2 minute video in the anti harassment training on microaggressions is insufficient).”
- “I heard from another colleague whose department was doing a faculty search that when someone wanted to interview an Asian applicant, another faculty member did not want to interview that applicant because that meant they had to interview all of the applicant of color. Thus they did not interview the an Asian applicant.”
- “A committee member suggested diversifying the hiring pool for a Faculty position and was aggressively shot down by another committee member who thought he was just

picking people based on their race (he was merely erring on the side of diversity when two applicants had relatively equal experience/credentials).”

- “After attending anti-bias training, I am hyper aware of this. I think there's a common bias that older candidates lack technological skills that are needed. I am committed to working to dispel this when I see it.”
- “Male counterparts make more money for the same job.”
- “Faculty are dismissive of staff, especially older staff. The older staff has a lot of experience and perspective that can be of benefit to the community. Please show some respect!”
- “More training on diversity/inclusion for all - students, staff, faculty - would be great. Activities such as Step Forward/Step Back, not just talks.”
- “I think there needs to be more requirements and initiatives for sensitivity training especially training around race and gender bias. In the programming that exists, it always seems to be the same people attending which is great but those who really need to attend such trainings are not showing up and affecting the campus climate negatively.”
- “My experiences have massively shifted since transitioning from student designation to staff. As a student, I was completely unaware, and uninformed about the racism that had been taking place in my department, and likely others, on campus.”
- “USF is whiter, more affluent and more homophobic than outside USF.”

Ideas offered by respondents for improving in this area:

- “Change in leadership. Providing trainings, required sessions on cultivating inclusive communities for top-level leadership. Spaces for open dialogue around racism, sexism, classism, ethnocentricity, etc. and continued learning sessions on all these topics, open to the whole campus community.”
- “Yes. Take issues of sexual assault and racism more seriously, and be more open with the student body about these issues. Often, the students at USF feel uninformed as to what USF represents, and defends publicly. For example, the ICE protocol was advertised as available to staff on campus for MONTHS before we were actually given access.”
- “Adopt a need blind admissions process. Low income people are currently excluded from being students at USF due to USF's lack of a need blind admissions process. Do more things to be supportive and inclusive of low income students and staff at USF.”
- “The leadership team seems completely inaccessible to most of the community and it doesn't help that the leadership team is made up of 7 white males of a total of 11 people. That is not representative of the employees who work here and it does create an unfortunately hierarchical distance.”
- “Disability and ADA compliance are lacking in many of the buildings and grounds. Simple things like ADA ramps that end: in a staircase. or sidewalks that do not have ramps, and end abruptly into the street or parking lot with no where to go. I'd also like to see at least the website be available in more than one language.”
- “More required opportunities to learn about bias, inclusion, and more chances for real dialogue.”

- I think USF does a lot overall to cultivate mission through social justice. I think transparency over pay would help address the gender gap that I know exists. I also think on-site childcare would help women advance professionally.

The second theme was Staff respondents' anger with leadership. Respondents offered the following:

- "Lack of trust in leadership"
- "lack of leadership within my unit"
- "I find that the Dean's Office (of the College of Arts & Sciences) is not always helpful or able to deal with problems in a timely and competent manner."
- "Nothing to report explicitly, it's just that under administration did not respond to what has been happening politically in a supportive and inclusive way."
- "USF staff and administration tries hard on an administrative level. The HR department tries hard as do other departments. The issue is that low standards of behavior/academics are tolerated at the Deans' level. We are encouraged to do less because initiative is frowned upon."
- "I believe the majority of staff, faculty and students have deep connections to USF stated values, and strive to live them in their work and connections with each other and in the broader community. USF is a great place to work overall. However, I do not feel the current top-level admin leadership of USF lives the values, and we are starting to see this trickle down and affect morale and campus climate. A clear vision from current leadership has not been expressed, to my knowledge, and it's hard to know what they stand for or how they are supporting the mission. Often when members of the leadership team speak out, they use language that can be more divisive than uniting, and seemingly without a deep understanding of the real issues."
- "For the most part, USF is great place to work. I feel appreciated and a part of a group of colleagues that are supportive. However, there are a couple of executives who need to retake the harassment training because their behavior is contrary to the values and principles of USF."
- "I think that overall, USF does a good job with this and it's one of the reasons I came to and stay at USF. Unfortunately, despite my best efforts, I don't think these values have been applied in the administration's/my direct supervisor's treatment of me in regard to my disability."
- "I feel that the USF community does an excellent job of embodying these values and doing our best to be a welcoming, pluralistic community based on mutual respect. Of course, there are challenges and conflicts, but I don't feel that they are systemic. My concern lies at the leadership level, where I see troubling patterns around treatment and inclusion of women, and a style of interaction that could be interpreted as bullying or disrespectful."
- "The biggest challenge right now in the campus climate is that we are working under conditions in which a beloved female provost was replaced. IN the time since then, under the current president and provost, female faculty feel less respected, and both faculty and staff feel less certain of their stability here. This creates a tense climate. Interactions with the provost-level and above are fraught with a sense that we (below this level) don't really

matter. That we are working at the pleasure of the provost and president rather than working TOGETHER towards a mission of education for the common good. This shift is saddening and makes many of us feel much less devoted to the institution, which is unfortunate.”

Ideas offered by respondents for improving in this area:

- “More transparency in upper administration”
- “Better communication on the improvements that are going on around the University or that are planned for the future.”
- “There needs to be more transparency from top administrators and members of the leadership team and meaningful conversations without the fear of losing one's job about why the climate on campus is so bad at the moment. There needs to be more inclusion of staff members especially those who feel like they are the bottom of the totem pole. I think drawing on our Jesuit Catholic tradition and mission could help to heal the wounds and give a clearer vision of what USF has the potential to do as an academic institution.”
- “Have supervisors and ADMINISTRATION attend trainings about disability sensitivity and practices that align with the mission of USF so that their actions align with the University's stated mission. Additionally, emphasize to Faculty and higher ups that staff are an integral part of what makes USF work and try to foster equal respect for staffpersons [sic]. I feel we are usually an after thought and our opinions are dismissed (although it's rare we're ever asked in the first place).”
- “Have more opportunities to diversify leadership. I know there's a belief that there is diversity, but there's a need to have leaders with an articulated vision and diversity of values (including and beyond fiscal soundness) consistent with the mission. Continued support of initiatives/programs designed to better integrate diverse students yet sustain their unique cultures.”
- “Please do solicit more feedback from faculty regarding the administration, both the presidential and provost levels, but especially at the college level (we've had almost no chance to do this since 2009, when the current dean came into the job).”
- “Considering that faculty were denied cost of living raises for the next two years in the most expensive city in the nation, the administration needs to do more to show faculty that they're contributions are valued. The provost needs to stop saying that the faculty are "underworked and overpaid." It's demoralizing, considering how hard we all work.”

The third theme was Staff respondents' experiences of a hostile work environment. Respondents offered the following:

- “There is a hierarchy. The tenured and tenure-track faculty in my department (Art and Architecture) fight with each other and bully the staff and some of the adjuncts. It is incredibly toxic and it undermines our ability to deliver quality programs to the students. I have received cruel emails and been subjected to cruel in-person accusations. I have also witnessed this happening to others.”
- “Harrassment [sic] by supervisor and the administration”

- “I was pulled into meetings where my boss sobbed uncontrollably to me while blaming me for various things.”
- “It's an issue where ‘Captains’ request opinions on CRM decisions but then disregard or dismiss "non-Captains" in a silencing way. This has happened at nearly every Slate CRM meeting that I have attended.”
- “I felt threatened and harassed over a disability I cannot control and considered leaving USF. I've been dedicated to a place that preaches its mission and doesn't seem to be living it out in its treatment of me. I felt confused/singled out.”
- “My experience was not due to bias or to being treated differently due to identity, but a result of a general climate of bullying and incivility that is all too common within the leadership.”
- “Some staff are treated better than others. Faculty is treated better than all staff. I was given no leeway when caring for an elderly parent, while faculty were given leeway for having to walk their dogs during work hours.”
- “Some staff who have worked at USF for many years and have done excellent work were let go for no reason except their salary. One person in particular was escorted out as if he was a criminal which was unacceptable at a Jesuit university. This person gave many years to USF and was a loyal and effective staff member.”
- “I never know semester to semester if I will have a job.”
- “I have been in the workforce since the 1970s, in various work environments. Never ever have I witnessed faculty who were allowed to make such rude, accusatory and bullying comments to others and to me, as I have at USF. There is so much hierarchy and so many rules, that we ignore decent kind behavior. I am very unhappy here and dread going to work everyday. It's sad because there are nice people here.”
- “unfair annual review and blame for incomplete work while out on medical leave”
- “One thing about being a staff with a disability is you can't raise any issues with it. If you start to ask too many questions or ask for too much, you are a target for harassment from labor relations. I show up to work with a fake smile even when I'm sick and in pain because if I call in sick too much, I'll be harassed.”

Ideas were not offered by respondents for improving in this area.

The fourth theme was Staff respondents’ work load and compensation complaints. Respondents offered the following:

- “I do much more work than colleagues in the same or similar position to my own. I am asked to work outside of my classification, and yet am not given the title of the new classification or a raise for doing work outside of my classification.”
- “I think the appraisal process for OPE staff members isn't productive at all and often times feel meaningless. Also, because I am a competent employee and have been recognized by my supervisor to be someone who can handle multiple tasks, I've often been tasked with others' responsibilities who have failed to get the job done without any extra compensation.”

- “Additionally, I have seen more than once that fellow staff members are punished for asking for more support to alleviate their workloads. I do not feel protected by the union contract; only punished.”
- “Assumed my coworkers job when they quit suddenly. took on this role in addition to mine for 5 months. no increased pay and was told i wasn't completing tasks in my usual time frame and had to be micromanaged.”
- “It can be challenging when you have to fill in with assisting duties for another program on top of your own department, particularly if you are put in a position that you did not interview for and without discussing the duties first.”
- “I feel that my OPE staff position is much more demanding than many other OPE staff members. I am consistently working over my scheduled hours, but because I know this is not "allowed" I am often too embarrassed to report these hours for compensation, as it feels like a sign that I am not competent enough to complete my job. However, on a daily basis, I feel I am tasked with more than my similar-level colleagues.”
- “Compensation is not distributed in a way that makes one feel valued. Given that the workforce is mixed with union and non-union employees, there is an ‘unfairness’ to the salary increases that are available to the non-union employees. While the appraisal process allows one to get credit for ‘a job well-done’ it doesn't translate to monetary compensation. Additionally, it seems like the "squeaky wheel" phenomenon is at work here at USF. One can really love one's job, but feel unappreciated for it by admin.”
- “Staff salaries are becoming less and less competitive with the current overall climate of San Francisco.”
- “Overall, USF is a good place to work; however, as a staff member, I do not always feel that my value is fully appreciated. Also there are few opportunities to increase my development or advance in my career. Pay could definitely improve as the Bay Area is very expensive to live and commute in.”
- “Judging by the fact that no program assistants were even invited to be on the campus climate committee until one attended a meeting in a faculty member's stead, I think it seems pretty clear that our feedback is never solicited. And after the recent union negotiations, I find it laughable that USF would think they offer competitive salaries for life in the Bay Area.”
- “I think that in Higher Education USF is competitive as far as salaries and benefits but that in the Bay Area in general it is not.”

Ideas were not offered by respondents for improving in this area.

General ideas offered by respondents for improving:

- “So far I have enjoyed my experience working for USF. I previously worked at two other universities that were not Jesuit schools, and the differences are very plain to me. I appreciate USF's dedication to inclusion, fairness, diversity, and equality. That being said, I think mental health resources for staff would be an invaluable improvement. There are some offerings, but I would like to see more.”

- “To improve the climate with staff and faculty, I think that setting clearer boundaries and expectations of what roles each team member is responsible for (faculty, staff), would be helpful. Improving communications and expectations based on those clear duties might ease tension within a department.”
- “Please clarify people's roles and responsibilities, especially those of staff. Please celebrate your staff. They are awesome -- as awesome as the faculty. Please treat them with respect.”

Conclusion

The primary purpose of this report was to assess the climate within the College of Arts and Sciences at USF, including how members felt about issues related to inclusion and work-life/school-life issues. At the very least, the results add empirical data to the current knowledge base and provide more information on the experiences and perceptions of the College of Arts and Sciences. However, a projected plan to develop strategic actions and a subsequent implementation plan are critical to improving the climate within the College of Arts and Sciences, and thus the overall campus climate.
